Bet you wish you had one for sale.
The last good one I saw went for $300!
I never got stoned but if it feels like this I like it!!

And by the way, yore is spelled "your".
Besides, you should have used "you are" or "you're"

And by the way, yore is spelled "your".
Besides, you should have used "you are" or "you're"

Isn't everyone. I mean, this is a swap/equipment/marketplace newsgroup.
SPAM is what was ordered!

I personally enjoy good spam, and Mr. Russo's isn't half bad!

:-)

Some morons never get it.
Like I told the other moron,
I bet you wish you had it to sell.
It was nice of you to view it anyway.
Thanks for your time.
BTW, always??
Get a life, or at least a job.
You have way too much time on your hands.

Looks like you'll have it to sell for a long time
with that price tag. (spare me the inflated sale price
yore likely to post) I'll give you 50 bucks for it.

Covers 10 meters, 6 meters, 2 meters, 440 MHz FM. True dual bander, VHF/UHF, VHF/VHF, VHF/HF crossband repeat, etc. Bought at Dayton 2003 and in very good condition. Mobile bracket, standard hand mic with touch tones, power cord, all hardware, original packing. Planning to buy an Icom 706 and need to move this one first. $300 shipped in the continental US. Info on the 8900 available at Yaesu's website. www.yaesu.com

Sorry my boy.
It sold for $154.00
Inflated prices are for new or current items of any kind.
example: if you went to circuit city to buy a 50 inch TV, their price
was $500 dollars. Now you went to the wiz and saw the same exact TV
for $700 dollars. Now that would be the inflated price. Now who would
you buy it from?
Old classic stuff of any type might go for much more than the original
new price. In this case the radio
sold for $180 dollars (1967 dollars).
Old classic stuff is only worth something to someone who really wants
it.
Or somebody who wanted the item it their youth and could not afford it.
Or somebody who wants something that nobody else has or nobody else can
buy.
Anyway, enough time wasted on you.
I won't reply to your crude and nasty reply.
Be a good boy.

hi all,
i have a yaesu ftv-901r transverter with the 2mtrs and 70cms modules fitted and theres a spare bay left so u could fit a 6mtr module as well,i have tried it on 2 and 70 and has a very nice rx ,when used with my old 101zd(which i no longer have hence the sale)the rx was slightly above my newer icom 746,imoresive ehh,also i have a yaesu ftv-650b which is the mono band transverter which covers 6mtrs and is valve output compared to the 901r,but the 650b has a higher output power of nearly 50 watts ans i hae 2 spare output valves and a driver also in good working order,ok price well i would like to try and swap for some equipment i am looking for,i am intrested in any 144mhz stuff like pre amps(prefferabley mast head) amps any thing 200watts and above,amateur television i have a microwaves module 70cms transmitter but i need the rx converter to plug into the back then into my tv for recieve,so anything to help me with this,also any 23 cms atv as i would love to get started on this band on atv so a simple set up would be considered,ok if ur intrested please email me and we can work something out,i would like to get these units a home because its a crime to have them sitting in a drawer collecting dust,so please email and we can work a deal,73 all

I'm in the market for a IC-98S microphone, thought I'd try the used market first.

My original was stolen out of the console of the car (they busted the $300 right door window) along with some Wuthers candies, the cup holder insert and parking meter change. They scattered papers and napkins out of the console all over the floor and that was probably why the little buggers didn't see the IC-2100 under the seat.

Absolutely nothing. There are a group of people who specialize in sending such tripe to as many UseNet newsgroups as possible -- possibly just for the disruption value, possibly to send covert messages, possibly for other reasons. The first has become known as "HipCrime" (or "DipSlime"), and his followers are generally known as Hipclones.

I have for sale an as new MP-1 Super Antenna system which covers 40-6meters at 150 watts maximum. The antenna come with the following:
Mount with clamp
Counterpoise wires
Base rod
Coil slider
Telescopic whip
I am also including the following Super Antenna accessories:
Tripod for the MP-1
80 meter coil
Mobile kit which includes a 4 foot stainless whip and a 2 foot base rod.
This antenna was used in the house as a portable antenna for a Yaesu FT-897 when I did not want to go to the shack in the basement. All items are as new. I have all of the paperwork. You can see this entire system on the

Super Antenna web site by going to
www.superantennas.com
I am the original owner and can truly say that this antenna has only been
used no more than 3 hours. Flat matches can be acheived with this antenna
without any problems via the sliding antenna coil.
I am asking $145.00 shipped CONUS

I have decided to put out an interface board that works for Echolink
and other digital modes. It's a very compact package. Please email me
for details and questions and pictures. Thanks.

Found on pg. 138 of 11-46 Radio News. Converted 88-108 into 8 mhz segments
consistant w. original 42-50 band. Converters called Type A, B, & C.

Gon-set was then a line made by Waterproof Electric in Burbank, CA.

Looks like Faust Gonset of later "Gonset Communicator" fame got started
there

Newsie stuff said, I'd like to have one of those converters.

If anyone'd like to see a picture, I can scan.

Beware it's unglamourous. Looks like a big IF can.

Thanks!

Marty

I have a brand new, never opened Icom IC-2720H dual band mobile radio for sale. I bought this with good intentions of installing it but have decided to go to a HF mobile rig instead. This radio is as it came from the factory.
I am asking $300.00 shipped CONUS.
NO TRADES PLEASE.

I have for sale a new Comet dual band mobile system which consists of the following:
Comet C767 Dual band mobile antenna 2m/70cm
Comet EM-B80 trunk lip mount
Comet CK3M5C coax assembly
This entire system is brand new and has never been out of its packaging. I was going to install it on my car and decided I wanted to go with an HF mobile rig and a screw driver antenna. I am asking $80.00 shipped CONUS.

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $450.00 shipped CONUS.
NO TRADES PLEASE

Hi gang

I was cleaning out my spare radio box and found 2 Motorola 16 ch HT1000's R model 403 to 470 handhelds that I forgot about, for sale or trade
I programmed them up on the local ham repeaters and a couple commercial repeaters and they work great, they both show signs of normal use, but not beat up
Radio's and antennas only

I also have a brand new in the box battery eliminator/test box for a XTS 3000 handheld

Things I'd be interested in trading for
Low band (42 to 50) hand held, pc or self programmable
handheld that will do 6 meter.
210 ch vhf king handheld (front panel programmable)
or other radio gear? see what else you have that I may be interested in or make a cash offer

thanks
Steve

SB-200 (relist)
FS: Heathkit SB-200. No Mods
New full output 572B tubes. Recently gone through by experienced HAM
Amp-builder and all components tested and replaced with new components. New
faceplate (original had some lettering worn off. Cleaned all bandswitch
contacts last week. Reason for selling: Moving to a new solid-state amp.

SB-200: $325.00 (OBO) Shipping $27.00

Thanks,
Joe

I have a brand new, never opened Icom IC-2720H dual band mobile radio for
sale. I bought this with good intentions of installing it but have decided
to go to a HF mobile rig instead. This radio is as it came from the factory.
I am asking $300.00 shipped CONUS.
NO TRADES PLEASE.

```

I have for sale a new Comet dual band mobile system which consists of the following:
Comet C767 Dual band mobile antenna 2m/70cm
Comet EM-B80 trunk lip mount
Comet CK3M5C coax assembly
This entire system is brand new and has never been out of its packaging. I was going to install it on my car and decided I wanted to go with an HF mobile rig and a screw driver antenna. I am asking $80.00 shipped CONUS.

I have a brand new, never opened Icom IC-2720H dual band mobile radio for sale. I bought this with good intentions of installing it but have decided to go to a HF mobile rig instead. This radio is as it came from the factory.
I am asking $300.00 shipped CONUS.
NO TRADES PLEASE.

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10

out of a 10 electronically and cosmetically. I am asking $450.00 shipped
CONUS.

Hey gang,

Have a very worn out HM56 mic for my "still working fine" 3220 dual bander.
Im looking for a DTMF mic (new) for my radio and cant seem to find one. The
56 is a discontinued item and Icoms response was the 36 (current model).   I
was wondering if I could take a dtmf electret "modular" plug mic and simply
change the plug to the 8 pin? The 36 is a nice mic but doesnt have DTMF.
Mics Im looking at are the HM77,100,118.

Thanking the group in advance and wishing you all a good holiday!

73's
Rod Barton

***** Roller Coil ******

La Pointe L-0201 406-1 (identical to a Johnson 229-201) 10 uH. used
good,
$30

New! GE Ceramic end plates, part no. 7463338, for a GE roller coil.
$10 pair

*****   B&W Air Dux coils *****

These are NOS, 10" lengths, unless noted otherwise

#1208T 1.5" dia, 8TPI, #16 wire, slight tarnish $20
#1216T 1.5" dia, 16TPI, #20 wire, somewhat tarnished $20
#1006T 1.25" dia, 6TPI, #14 wire, somewhat tarnished $15

plus a NOS partial length

#1008T   1.25" dia, 8 TPI, #16 wire, 8" long -- $12

--- some other partial lengths

#2408T   3" dia, 8 TPI, #14 wire, 4" long shiny -- $15

#2410T 3" dia, 10 TPI, #14 wire, 2.5" slightly tarnished -- $10

#3030 2.5"" dia, 8 TPI, #14 wire, 4" tarnished -- $10
#3031 2.5"" dia, 10 TPI, #16 wire, 3" long somewhat tarnished -- $10
#3031 2.5"" dia, 10 TPI, #16 wire, 1.75" long somewhat tarnished -- $5

---a couple of Illumintronic Engineering parts

375 7367-P1 -- 1.5" dia.x 5.75" winding w/ indented turns, 14 TPI, #17,
7" overall including plastic center support, un-used somewhat tarnished $25

980-0121-000 -- 2.5" dia. x 7.5" winding w/ indented turns, 8 TPI, #14,
9.5" overall including plastic center support, used somewhat tarnished but, no
turns soldered $30

--- some other coils:

6.5 turns, 2" diameter 2" long silver plated .185" diameter copper tubing
-- currently tarnished but, should clean up nice -- $15

6 turns, 2.5" diameter 2" long silver plated .25" diameter copper tubing
-- lightly tarished. Ends are flatteded to one inch long tabs with a hole for say a #10 screw. There is a crack in the tubing near one termination which may be easily repaired with silver solder. -- $20

A large RF choke -- #22 enameled wire space wound 24 TPI for 2.75 on a 1"
diameter grooved fiberglass form 5" overall -- $5

Miller 62A024 series (.173-.272uH I think!?) coils, 1/4" diameter wound
with a 5 turn coil. Blue (carbonyl SF 40-300 MHz) core. 4 terminals,
2 currently unused. NOS. 2/$1

Toroidal Tank coil -- The core is fiberglass & resin encased. It is currently wound with 20 turns of #12 wire. There are notches in the form for up to 40 turns. It is a bit over 4 inches in diameter and about 1-3/4" thick. This was made by W6YUY. See his article in August 1985 Ham Radio magazine "Design a Toroidal Tank Circuit for you Vacuum Tube Amplifier". $50

*********** Air Variable Capacitors ********

Cardwell XR-1000PS 1000pF About 4.5" x 4" x 3.5" overall including plate travel. .025 air gap. Used, Good condition. $20 ea.

Cardwell XR-1000HS (about 950pF max measured) These have slightly contoured plates for improved tuning resolution at minimum C. .025 air gap. About 4.5" x 4" x 3.5" overall including plate travel. Used, Good condition. $20 ea.

Cardwell 30-900pF (measured) (XR-900PS? -- 4 fewer plates than the above units) .025 air gap. About 4.5" x 4" x 3.5" overall including plate travel and mounting ears. used, Good condition. $20

Hammarlund SM-50-X, 7.5-50pF, .064 air gap, Just under 2" x 2" x 2" overall not including 1/4" shaft. Good condition. $10.

Johnson T9-5 miniature vertical PC mount trimmers 1.9-15.7 pF, Silver Plated machined plates -- NOS 2/$1

Johnson 154-1, 12-244pF, .05" air gap, about 3" x 3" x 3" overall. Rear shaft has been cut flush with bushing and the rear mounting tab has been shortened a mite. Otherwise, excellent condition, $25.

Johnson 154-34-3, 20-400pF, looks like .03" air gap, about 3" x 3" x 3" overall not including 1/4" shaft which is about 2-1/2" long. Excellent condition, $25.

Johnson 500E20 (modern equivalent 154-3), 500pF/2KV, looks like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is about 1-1/2" long. Good condition except the rear mounting tab has been removed and it looks like a couple of the plates arced at one time and were subsequently filed down a mite. $25.

Similar to the part above but, NOT a Johnson, another 500pF/2KV, looks like .05" air gap, about 3" x 3" x 4.5" overall not including 1/4" shaft which is about 1-1/2" long. Good condition except the front mounting tab has been removed. $25.

National Type DX 500pF variable capacitor, approx. 3" X 3" x 3" overall fairly good condition. Last one, $10

Remler "scissors" variables. Type 630 350pF $25
Type 631 500pF $25

4 Section capacitor 20-550 pF per section large receiving style capacitor,
$25

**** Ceramic Doorknob & Disk caps ***

These are used Centralab or similar -- $5 ea or 5/$20

68pF 5KV 850 series

These are NOS disks by KD & Erie $3ea or 4/$10

1500pF 7.5KV
.01uF 4KV

NOS Silver Mica caps

2200 pF 500V CM06 $1 ea
5100 pF 500V CM07 (high current rating) $2 ea

*** Resistors ***

Four 37.5K 78W power resistors, used w/mounting clips -- $8

Two 200W (or so -- 10" long) 1.5K ohm 10 tap (every 150 ohms) power resistors, used. $12 pair

Dale 1.5K, 225 Watt power resistors, used. 3 pieces -- $12all

Ohmite 2K, 225 Watt power resistors used w/mounting clips -- $5 ea (10 available)

Ohmite 3K, 225 Watt power resistors used w/mounting clips -- $5 ea (8 available)

*** Carborundum type SP resistors $10 each ***

30 watt parts (2.5" long) 1 ohm 65 ohms

100 watt parts (6" long) 1 ohm 30 ohms 240 ohms 270 ohms

125 watt parts (8" long) 35 ohms 200 ohms 220 ohms (I've about 10 of these) 250 ohms

The numbers have partially worn off some of these units so, some of the above numbers are measured values.

All of the above plus shipping, if necessary, naturally.

***** New Coax Connectors *****

Amphenol MHV connectors
  Two 28100 right angle cable males
   & two 27025 panel mount females. NOS $50 all.

UG-560/U HN Female Panel mount connector NIB -- $10 ea

82-843-1050 Amphenol HN Female sealed round panel connector NIB -- $15 ea

Kings KH-39-11 HN Female Cable connector NOS -- $15

F-81 F-female/F-female barrel connector NOS -- 3/1$

Below are all new crimp on connectors, with all hardware, in individual
plastic bags; early-mid 1990's date codes.
I believe that they are all for RG-59 size cable.

Kings Electronics
   KC-59-642-M06 BNC Cable Male   -- $1 ea
   KA-59-385-M06 TNC Cable Male   -- $1 ea
   KA-19-43 TNC Bulkhead Female   -- $1 ea

**** Coax Switches & Relays *******

Bird Model 72-2 DPDT Coax switch w/N connectors complete with knob & dial plate, used, good condition -- $50

ESCO Model 09-08-13180 1 in, 8 out coax relay with N connectors, 28 VDC coils. NOS. -- $80

***** Used Coax Connectors ****

These are used, fairly clean, mostly vintage Amphenol parts; No imports. Quantities up to 20 of available for some of these.

PL-258 UHF female - UHF female barrel connectors -- $1 ea

UG-255/U UHF female - BNC male adapters -- $2.50 ea 5/$10
UG-273/U UHF male - BNC female adapters -- $2.50 ea 5/$10
UHF F-M-F Tees   -- $2 ea

UG-27/U N Right Angle -- $2.50 ea   5/$10
UG-57B/U N Male-Male connector -- $4 ea
UG-131/U N Female to ?? (maybe a BN?) -- $3 ea
UG-259A/U 91836 -- HN female to LC female bulkhead adapter -- $30

SMA Female-Female Bulkhead connector -- $1 ea

N Female Chassis Mount connectors with gold (plated/flashed) PC style center pin (extends about 1/8" back from the insulator) -- $1ea

All of the above plus shipping, if necessary, naturally.

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $450.00 shipped CONUS.

Want to buy a DTMF microphone for my 706MK2G. The new ones cost over
$60.  Looking for a good used HM-118TN or a good used HM-77A.  Would
also be interested in a good used HM-14 that I could use with the
modular to 8 pin adapter.  Price to include shipping to 23323.
K4WYS,  <wrhood@exis.net>

New in the box

Siemens S46 Auto selecting GSM/GPRS & TDMA phone..

Mobile Internet & E-mail

2 way text messaging, voice dialing..

I was told this phone will work in the US and overseas.

Somehow the wall charger was lost.

Come with ear piece, full manual and software ?? Belt chip..

BEST OFFER

Excellent condition $100.00 + shipping

Don't know if upgrade has been done (I keep hearing about a upgrade) I
purchased it from a local ham, plugged it in, worked, never used it again.

Email if interested

For Giveaway: Globe Chief 90A Novice CW Transmitter. A classic Novice CW
transmitter form the late 50's. Was working the last time I fired it up.
It would be a nice addition to a home museum. Free to some one in the
Seattle Area.

I have a very nice Heathkit HW-99 CW Transceiver for sale. It looks almost
new. The front panel is perfect accept for a small mini toggle switch
installed below the Band
Switch. You turn this switch in the up position to access the 10
meter Band. This appears to be the only modification and the construction of
the kit is excellent. I checked it out on all 4 Bands, 80, 40,
15, and 10 Meters. It puts out well above 50 watts on each band. The CW tone
is excellent and the receiver is very stable and sensitive. It has a built
in 120 Volt Power Supply and speaker. It sounds better on an external
speaker.
This is a great little CW rig. All you need is a key and an antenna to be on
the air. The rig sold for $300 in mid 80's
and they only made it for a couple of years, so it is rather rare. The
original manual in included. See
Product Review in March 1986 QST. Price is $225 shipped in lower 48..
Thanks, Charlie Hugg,
K5MBX

FS a MFJ 989C Antenna Tuner. This is the high power, 3KW Roller Inductor
antenna tuner with build in Dummy Load,
antenna switch, and Peak Reading Watt/SWR Meter. This is the older version
```

with the black cabinet. Included is the Original
Manual. This tuner works fine. It is in good condition cosmetically with a
few small spots in the paint. There is a ding in the
aluminum insert of the large Inductor Tuning Knob, not bad. Price is $195.
Thanks, Charlie Hugg, K5MBX

I have a new in box Motorola M1225 LS 25-40Watt Mobile Unit,
MINT/UNPROGRAMMED. still with mic and clip, hardware, manual, and safe op
manuals. The split is 450-470 UHF. Never programmed. Photos upon request
Model # M44DGC95A2AA
asking $275.00

 With whip rubber duckie, Kenwood rapid charger and 1 good battery.
I will sell for $90 shipped CONUS. Photo upon request

 Also for sale, cleaning up:

 I was given a new RS pro-96 for a present. We do not have digital
  here. I am selling it since I already have a BC780XLT. The package
is complete from RS, box, manual, antenna, clip and regulated
external PS. I will sell the package for $475 shipped. POSTAL MO
only.

Also, 1 pair (2) Motorola 2 channel Radius P110 with 1 good battery (new one
costs $30) ,
antennas, 2 chargers.
Model #'s P44QLC20A2AA

Asking $220 for the set OBO

 Photos of
all  units available. Postal MO preferred. I do not use paypal. I will
consider COD if paid by buyer.

Please let me enlighten some of you "youngsters" and some rather lazy ones I might add on what us "oldtimers" consider ham radio really is. Amateur Radio is truly changing .... right. It truly started with a Mission Statement to serve the public in case of emergency. It's become a super CB'er gab medium "legally" allowing more distance and power.
1) Back in the mid 50's we had to travel to an FCC office and pay a few bucks to take a supervised exam both written and International Morse code. Under those non VEC conditions I received 4 full college college credits for my General Class license that to this day appears on my transcript from Univ of the State of NY.
2) Back then ALL us hams read thoroughly the ARRL Amateur Radio Handbook, some of us built our first receiver (usually super-regenerative) others purchased our receiver but definitely we all built our first transmitter from "junk" parts or purchased a kit.
3) In keeping with the Amateur Radio Mission Statement us "old timer real ham" ultimate dream was and still is today to possibly someday save some lives of public that may be in distress by monitoring one of the international distress frequencies almost daily.
4) For those of you interested try some of these links for ideas to set up a schedule.
http://www.tpub.com/content/istts/14225/css/14225_25.htm
Because of propagation skip I monitor at home here in Phoenix:
* 500 kHz -- International CW/MCW distress and calling (Because I do copy CW 60+wpm)

* 2182 kHz-- International voice distress, safety, and calling (Thanks to Ham radio I speak 6 languages fluently and 9 more broken enough to pass an urgent message)
* 8364 kHz-- International CW/MCW lifeboat, life raft, and survival craft (CW proficiency plus past USN enlistment)
* 121.5 MHz-- International voice aeronautical emergency (am licensed private pilot - single engine/land)
* 3023.5 and 5680 kHz-- International SAR frequencies for the use of all mobile units at the scene of a search. Also for use of shore stations communicating with aircraft proceeding to or from the scene of the search. CW and voice. (I am involved in Search & Rescue being member of volunteer branch of local Sheriffs Department and a private pilot)

5) In case some of you "modern VEC hams" aren't aware a signaling device capable of CW can be made from something as simple as a "back wired" cheap transistor broadcast receiver capable of signaling a monitoring "old-timer antiquated" ham like me to summon help thus saving lives. I have to date logged nineteen (19) actual distress calls since 1954 including 9 merchant ships, 4 military aircraft, 2 commercial pleasure cruisers, one 52 ft pleasure sailboat in S Pacific, and 3 lost private aircraft. Most have been "CW" and only two were AM voice. Lets hope that if you happen to be among survivors of a disaster there is a "real old time ham" available that can from the most simplest "junk" signal for help to another "real old time ham antiquated" just in case your $3000 SSB transceiver is damaged beyond toast and unusable. (hihi) It never ceases to amaze me that you die hards seem to think that the only thing not damaged in a distress situation will be your modern technology transceiver (of which I have three).

6) Lastly: Believe me I have spent my share of years "ragchewing" SSB, SSTV, ATV, AM, packet (both landbased and with space shuttle), but mainly daily my specialty is mucho, mucho CW. Man I do love it!!!

Summary: Well, if you have read this thread this far you must know that I know my xyl and I are excessive because we can signal with a flash lights, automobile horn, and even with semaphore, etc. Repeating Amateur Radio's Mission Statement deals first with the commitment to aid the public in case of emergency and secondly with self pleasure. I personally don't feel a person should be able to call themselves a "Amateur Radio Ham" if they can't from the simplest means be able communicate with others in an emergency situation to offer service to the public. A lot can be done with just 5wpm CW by signaling with horns, lights or a simple "dirty" (spurious) transmitter. We recently had a ham with a flash light AND a mirror that did not know simplest CW go as far as setting an entire forest on fire destroying property and homes to signal a helicopter for help. Dumb!!!!

No, my friend CW will never be "toast", thank god for the lives that have been saved in the past and will be in the far future centuries to come and forever. You and others like you definitely won't be a part of it though ....unless you change your attitude. Nothing will ever replace it because it is so basic and simple!! Unfortunately many hundreds or even thousands have been lost because of not knowing this simplest means of communications .... International Morse Code. Some old timer friends and I have been working on a transmitter technique

using natural surrounding minerals using damp tree branches for an
antenna and without using batteries, tubes, or transistors, that
generate legible spurious noise heard by any sensitive receiver for
signally .... that is by CW, of course, sorry no USB/USB or AM!! (HIHI)

I want to be a doctor but why should I have to take those tests for.
Lets get rid of thoses tests.

The Man said it all only those cry babes that are to lazy to learn
something new. Get a Life If you dont like learning code then go to
the Internet or CB..........

Incorrect analogy.

Here is an appropriate one; if I want to become a doctor in society
TODAY, as in, right now, the time that I live in, what's the point in
takeing classes, courses and earning degrees in alchemy and astrology
and waisting time learning about the black arts, potions, witch's spells
and/or voodoo? They're out of date.... there are new more effective
and applicable methods to get the job done.

Would you call a person with a PhD in brain surgery "lazy" if he
didn't want to learn how to brew bat wings in the blood of a newborn
pig under a full moon in order to get rid of headaches?

Thank you for playing, goodbye.

Clint

While I do tend to agree that cw is mostly an older form of communications and agree with Roland (btw, well said Roland) I would like to ask the "old timers" as to how many of you have recently, within the last 3 years, have actually taken someone aside and offered to try and teach them cw??? I have been slowly trying to learn cw but have found that locally VERY few people actually willing to try and teach cw to anyone. It seems odd to me that so many people are so willing to complain that no one wishes to learn cw when in fact I belive its the other side of the coin in that so many are unwilling to teach it to younger people. Thanks for your time,   73,   Billy

Perhaps a better question would be: "How many of you old timers have had people express an interest in ham radio and asked for help in learning CW".

Answer: Several for the first part, zero for the second part.

Hi,
Wrong! Nothing goes out of date. We learn and build from old.
I am still using CW regularly.
I am on other modes as well but not as much interested as CW.
I see still people riding horse drawn buggy and climb mountains on foot.
I still see people writing letters instead of emails using fountain pen.
Still people paint pictures instead of snapping with digital camera.
I dont see anything wrong with that.
Let it be and let everyone do/enjoy whatever s/he likes.
Season's greetings, 73.
Tony, VE6CGX
P.S. How about guys who do not know how to drive manual?
Are they real drivers? They should give driver test
using stick shift.

Clearing out shack storage bins due to relocation.
I have a bunch of loose transformers from old printers and radios.
Please do not ask specifics.
Also have a bunch of loose ic sockets, some ic's, resistors, belts,
heatsinks of various sizes, assorted nuts/bolts/screws, motors out of
vcr's, tape players, stereos and a few stepper motors.

For info, best bet is to email direct along with posting in here.

Tony KC8EWU

I am also looking for a dual band ht antenna with sma connector and if
possible a manual or info on where a manual could be found for a GE
Searcher 2+2 radio.

Hi Billy,

Thanks for answering with your very intelligent response. Although I am 60+wpm I was not naturally that speed at birth. Here is the very simple secret to learn CW and is taught to USN Radio operators with amazing 99.9% results. I was already a ham for 5 yrs with I joined the USN in

1959 but I saw guys & gals from tractors on farms to large urban cities learn CW with great ease and fun.

Yes, Billy, I have directly taught scores of boys/girls men/women CW with the following method:
1) CW is rythmn!!!!!! Like music with a metronome!!!! CW was taught in the USN with music playing in the background at a "medium" speed.
2) Every student Radioman had an old fashioned "straight key" connected to a code oscillator and then learned to SEND CW starting with the letter A, B, C, etc. They learned the structure of letters by sending them thus "automatically" learning to RECEIVE CW. Great, huh?
3) So, forget code tapes and code broadcasts until you learn the structure of the characters again by sending plain text (newspaper, magazines, etc) to yourself at the rythmn of music or just patting your foot!!!
4) If you want some help getting started I can do it by telephone to start you with the rythmn needed. Simply email me with your telephone number at address below.

>>>2) Back then ALL us hams read thoroughly the ARRL Amateur Radio
>>>Handbook, some of us built our first receiver (usually
>>>super-regenerative) others purchased our receiver but definitely we all
>>>built our first transmitter from "junk" parts or purchased a kit.
>>>3) In keeping with the Amateur Radio Mission Statement us "old timer
>>>real ham" ultimate dream was and still is today to possibly someday save
>>>some lives of public that may be in distress by monitoring one of the
>>>international distress frequencies almost daily.
>>>4) For those of you interested try some of these links for ideas to set
>>>up a schedule.
>>>http://www.tpub.com/content/istts/14225/css/14225_25.htm
>>>Because of propagation skip I monitor at home here in Phoenix:
>>>* 500 kHz -- International CW/MCW distress and calling (Because I do copy
>>>CW 60+wpm)
>>>* 2182 kHz-- International voice distress, safety, and calling (Thanks to
>>>Ham radio I speak 6 languages fluently and 9 more broken enough to pass
>>>an urgent message)
>>>* 8364 kHz-- International CW/MCW lifeboat, life raft, and survival craft
>>>(CW proficiency plus past USN enlistment)
>>>* 121.5 MHz-- International voice aeronautical emergency (am licensed
>>>private pilot - single engine/land)
>>>* 3023.5 and 5680 kHz-- International SAR frequencies for the use of all
>>>mobile units at the scene of a search. Also for use of shore stations
>>>communicating with aircraft proceeding to or from the scene of the
>>>search. CW and voice. (I am involved in Search & Rescue being member of
>>>volunteer branch of local Sheriffs Department and a private pilot)
>>>5) In case some of you "modern VEC hams" aren't aware a signaling
>>>device capable of CW can be made from something as simple as a "back
>>>wired" cheap transistor broadcast receiver capable of signaling a
>>>monitoring "old-timer antiquated" ham like me to summon help thus saving
>>>lives. I have to date logged nineteen (19) actual distress calls since
>>>1954 including 9 merchant ships, 4 military aircraft, 2 commercial
>>>pleasure cruisers, one 52 ft pleasure sailboat in S Pacific, and 3 lost
>>>private aircraft. Most have been "CW" and only two were AM voice. Lets
>>>hope that if you happen to be among survivors of a disaster there is a
>>>"real old time ham" available that can from the most simplest "junk"
>>>signal for help to another "real old time ham antiquated" just in case
>>>your $3000 SSB transceiver is damaged beyond toast and unusable. (hihi)
>>>It never ceases to amaze me that you die hards seem to think that the
>>>only thing not damaged in a distress situation will be your modern
>>>technology transceiver (of which I have three).

>>>6) Lastly: Believe me I have spent my share of years "ragchewing" SSB,
>>>SSTV, ATV, AM, packet (both landbased and with space shuttle), but
>>>mainly daily my specialty is mucho, mucho CW. Man I do love it!!!

Because when the FCC, in their infinite wisdom, decided not to require a
sending test any longer. Everyone stopped bothering.

That is how I learned CW, back in 61. It worked for me. I now do 50 easy.
And have done so for years.

Roland is right on target. And BTW Roland I have saved your comments. Glad
to meet a real ham.

That's a wonderful argument -- and the FCC has set up radio services

for folks with your mindset: family service radio, citizen's band
radio -- or if you're willing to take a simple written test, the
technician license for amateur radio. If you're willing to work a
little harder, pass 5-words-a-minute code testing and more difficult
written exams, then you can get full amateur priviledges. What's there
to complain about?

Hi,
I am a life time tuba player, hi.
There are many musician CW ops.
Season's greetings.
Tony, VE6CGX

Exactly Clint. You have in fact SUPPORTED his point.

You should stay with the internet and FORGET amateur radio.

It's far too "dull and old fashioned" for a trendy "modern"
guy like you!

Stay off the air and we will ALL be happier, including you!

Can you guys talk to him some more HERE please, so
he will be too pre-occupied to get on the radio?

Thanks!

Lets see what the FCC has to say about that, Albert. In the Report & Order following the last round of restructuring, the FCC said;

"We are persuaded that because the
amateur service is fundamentally a
technical service, the emphasis on
Morse code proficiency as a licensing
requirement does not comport with
the basis and purpose of the service.
We note, moreover, that the design of
modern communications systems,
including personal communication

> services, satellite, fiber optic, and high definition television systems, are based on digital communication technologies. We also note that no communication system has been designed in many years that depends on hand-keyed telegraphy or the ability to receive messages in Morse code by ear. In contrast, modern communication systems are designed to be automated systems. Given the changes that have occurred in communications in the last fifty years, we believe that reducing the emphasis on telegraphy proficiency as a licensing requirement will allow the amateur service to, as it has in the past, attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves in the areas where the United States needs expertise."

Clearly, Morse code proficiency as a licensing requirement is out of place in Amateur Radio today, Albert. As is your attempts to urge anyone who opposes code proficiency as a licensing requirement to "forget" about Amateur Radio. The radio world is moving forward. Either we move forward with it or we become irrelevant. If we choose the latter path, we will no longer be worthy of the massive frequencies and operating privileges we enjoy - no irrelevant radio service is.

Actually, I like the "code quick" program, myself. I am in no way affiliated with the company that markets it, but it's money well spent. I don't recommend the computer program, as much as the tapes, but the computer program does allow you to paste in ANY text, and have it sent in morse code, (your email, etc) thus giving you fresh stuff to copy all the time. The tape set works with you on a more personal level, and actually uses about 5 different methods, at once, to get the code stuck in your head. It ignores the dits and dahs, and teaches you the characters by the sound of the entire character, likening it to a phrase, which sounds just like the character, when sent.

Here is an interesting, and true story. I took a total of 9 cbers, who were all dead set against the code, but finally decided it wasn't going away any time soon. All of them wanting to get on HF, and with a little prodding by the origional fellow who agreed to let me teach him well enough to pass the test in less than two weeks, guaranteed. They showed up for one hour a night for nine days. The nine day mark just happened to be the first available code test, after commencing our little project. All of them, seeing how easy, and fun it was to learn code, decided to take a whack at it at that code test. All of the nine, except 1, passed with perfect copy, and didn't even have to take the multiple guess test. Of the 9, one was totally blind, and took the test with earphones and a "blind typewriter" (not knowing the correct term for this device). The one fellow who failed, had only been attending the group for about 4 days, but just had the balls to give it a go, anyway. He later passed on his own.

I taught them using the code quick method, lacking all the tapes, and materials. I just did it live, using the guys HF rigs built in keyer, set to no break in.

Just to let you know how easy it is to learn code, ONCE YOU DECIDE TO DO IT... I'de be willing to bet you that I could teach a monkey to copy, in his head, 3 characters, in a days time. The hardest code test to pass will be the 5wpm... why? Because first you must get over all the reasons why you

1)don't have time to

2)are never going to use it

3)shouldn't be required to

4)can't learn it

AND JUST DO IT!

Once you see how easy it is, when motivated, you'll probably start using it because learning a new skill is fun to do. when you use it, your speed will increase without even trying. I really feel sorry for you guys who will never do it. All I can say is, upon passing my 20wpm test, and walking out the door to meet my buddies, with that piece of paper in my hand, well.... I haven't felt that good, no... GREAT, since christmas morning, when I was 3 years old, and got my first bicycle. And yes... I did conform to the rules, and learned to ride with training wheels... I didn't think I should just be able to ride it, without working on it first. And by the way... I'm no brain surgeon, and I went from no-code to extra in 4 months time. Since then, serving on a VE team, I've seen several foriegn exchange students sit down, and go from ZIP, to extra, in a matter of hours... including the old 20 wpm code test.

Anyone want help in the WNY area, I'll help you too. It really is much easier to pass the code test, than to learn all the extra info to pass the expanded written exam. Just respond here, and we'll see what we can come up with.

"Roland" <nospam@nospam.com> wrote in message news:3FE51E5C.9010801@nospam.com...

> Please let me enlighten some of you "youngsters" and some rather lazy ones I might add on what us "oldtimers" consider ham radio really is. Amateur Radio is truly changing .... right. It truly started with a Mission Statement to serve the public in case of emergency. It's become a super CB'er gab medium "legally" allowing more distance and power.

And we still are capable of performing emergency communications regardless of your downplaying a hobby that you participate in like a self-hating ham. Many of us train regularly with ARES/RACES groups and are ready when called.

> 1) Back in the mid 50's we had to travel to an FCC office and pay a few bucks to take a supervised exam both written and International Morse code. Under those non VEC conditions I received 4 full college college credits for my General Class license that to this day appears on my transcript from Univ of the State of NY.

Some universities might still do that. As far as the FCC issue, thank god they did that..... less government intervention in my life is better. Only a liberal democrat would wish it go back to the old scheme of testing.

> 2) Back then ALL us hams read thoroughly the ARRL Amateur Radio Handbook, some of us built our first receiver (usually super-regenerative) others purchased our receiver but definitely we all built our first transmitter from "junk" parts or purchased a kit.

Guess what.... some of us still do today! Generalizing the whole hobby by experiences with a selected group does nothing for the growth of the hobby.

> 3) In keeping with the Amateur Radio Mission Statement us "old timer real ham" ultimate dream was and still is today to possibly someday save some lives of public that may be in distress by monitoring one of the international distress frequencies almost daily.

And you were living in a delusional world if you think you were/are that self-important but training in message handling and communications is important if that ever does happen. Personally speaking, I also monitor quite a few frequencies as well.

Get with the times man, instead of dwelling on the past.

I wasn't trying to guilt trip anyone, I was only trying to get others
to look at themselves instead of knee jerking and complaining about
the lack of people who seem to be interested in cw. I myself have not
taught anyone in the last 3 years but I am just a no code ham trying
to learn myself. Thinking about an old saying, if you wanna change
the world, start with the man in the mirror. Cheers, 73

Iff you read afgain at the top I did not address that issue.

You had been going on about the technical frontiers and what is and is not "with it" today - FOR YOU (unlike the many thousands of CW ops)

My remarks and your response are almost entirely unrelated.
You have difficulty understanding logic and plain English, aparently.

I merely suggested that if you don't like old fashioned things like HF and CW that you stay on the internet where you will be happier.

It was about YOU not the FCC.

>Albert. As is your attempts to urge anyone who
>opposes code proficiency as a licensing requirement to "forget" about
>Amateur Radio.

Not anyone - YOU!

You obviously don't LIKE muych about amateur radio and are far more comfortable grousing about it on Usenet. So fine! Have at it!

>The radio world is moving forward.

No shit!

>Either we move forward
>with it or we become irrelevant.

Again you are using totally faulty logic.
I am involved with digital communications using the latest techniques.
And that is NOT via an old-fashioned cable or twisted pair
like Usenet has to rely on (grin!)

>If we choose the latter path, we will no
>longer be worthy of the massive frequencies and operating privileges we
>enjoy - no irrelevant radio service is.

Well you are entitled to your opinoin, no matter how confused you try to get yourself! Enjoy the new frontier. I will enjoy BOTH the traditional AND the new.

Attacking CW is absurd, and as was pointed out in another thread, the nastiness always starts with the anti-CW mob.

I don't give that much of a rat's arse about whether the testing gets stopped, because I don't think it will be the death nell of amateur radio any more than hundreds of other change sthat have aoccurred in the past 25 years by the FCC and by hams.

However, I DO think that what bodes ill for amateur radio is the ATTITUDE and BEHAVIOR of aggressive, divisive people!

My comments were for you personally, and not about the
proposed changes for VEC testing etc.

Again, my suggestion for a guy who dislikes CW and HF is
this, Dwight:
You should probably stay with the internet and FORGET
amateur radio.

It's far too "dull and old fashioned" for a trendy "modern" guy
like you!

Thanks for the honest response Billy, and I truly wish you success in mastering the code. You will NEVER regret it, even if they no longer require it at soime point.

It's one of the most pleasant and ralzxing modes you can
ever use!

73

Good grief, Albert. You can't even figure out which person you're talking to. I didn't say any of those things and you didn't say any of those things to me. That was a discussion you were having with Clint, not me.

I, on the other hand, addressed your opinion that those more interested in modern electronics and radio than CW (what you called "trendy modern guys") should "stay with the internet and forget amateur radio." And I did so by pointing out what the FCC said about the need to reduce the emphasis on telegraphy proficiency as a licensing requirement to "attract technically inclined persons, particularly the youth of our country, and encourage them to learn and to prepare themselves in the areas where the United States needs expertise." Clearly, even according to the FCC, the United States does not need expertise in CW today.

> Again you are using totally faulty
> logic.

I guess it would appear faulty to a person who can't follow along well enough to figure out which person he or she is talking to.

> Well you are entitled to your opinoin,
> no   (snip)

It's not just my opinion, Albert. It's also the FCC's opinion - you know, the federal agency that regulates Amateur Radio.

> Attacking CW is absurd, and as was
> pointed out in another thread, the
> nastiness always starts with the
> anti-CW mob.

I've said nothing nasty to you, Albert. The only nastiness, in the discussion between you and me, is coming from you..

> I don't give that much of a rat's arse about
> whether the testing gets stopped,   (snip)

Since the use of CW itself is not threatened in any way, the only issue at hand is the telegraphy proficiency licensing requirement (the code test).

> However, I DO think that what bodes
> ill for amateur radio is the ATTITUDE

> and BEHAVIOR of aggressive, divisive
> people! (snip)

The only bad attitude, bad behavior, or divisive behavior, here is your own. You're telling people who don't like CW to forget Amateur Radio. You've used more foul language in one message than I've used in these newsgroups in perhaps the last ten years.

> Again, my suggestion for a guy who dislikes
> CW and HF is this, Dwight: You should
> probably stay with the internet and FORGET
> amateur radio.

And my suggestion for someone obsessed with CW enough to urge others with different views to stay away would be to get out of Amateur Radio - attitudes like that don't "comport with the basis and purpose" of this radio service.

The response was addressed to the person who wrote it,
Clint.

If that wasn't cl;ear I am sorry, but I think we can all figure out
who the writer was even if the attribution got screwed up.

Sorry you are still in shock, OM!

the FCC is not tasked with deciding what we NEED. Rather they are tasked with regulating what we DO with amateur radio.

Your statement is totally dishonest and is not worthy of discussion.

Twist twist twist....

You would make Chubby Checker proud!!

You are SO adept at twisting what others say.

For the confused, grumbling babies like Dwight, who think that
CW is dead, here is great evidence to the contrary:

TEENAGERS WHO LOVE CW:
http://home.alltel.net/johnshan/cw_ss_teens.html

http://home.alltel.net/johnshan/links_ss_cwin.html

YMMV

Try CW - it might just lower your blood pressure about 90%
there Dwight, old boy!

LOL!

Ahhh, so if you are not a CW fanatic, then you don't like amateur radio.
Such a negative attitude as yours has been part of the reason why
amateur radio has been in decline. Here in VK, recent meetings between
the government communications body (ACA) and amateurs has seen
overwhelming numbers in favour fo the removal of CW for the access to
the HF amateur frequencies. In the meeting that I attended, only one
amateur was in favour of the retention of CW as a mandatory access
requirement for HF. Of all of the amateurs at the meeting, only one
person in favour of the retention! Surprisingly, even the unrestricted
operators (equivalent to extra calls) were all (bar the one anti) in
favour of removing CW as an uneccesary barrier to HF access. As a
result come 01 Jan 04, CW is not required in VK for access to HF. We
still support it as a historical part of amateur radio, and indeed hope
that it doesn't die off as a mode that amateurs use. Funnily enough,
now it is not required (well in about 4 days anyway), the concensus is
that it will probably become a more popular mode of comms - but in the
end, that is what it is - merely one of the many modes of comms that is
available to amateur operators. Long may it prosper, but not as an
uneccesary barrier to HF access.
The bitterness does not start with just the anti CW mob - it is both
their fault and those of the anti change establishment. To say that the
anti CW individuals should stay on the internet is at best shallow, and
at worst stupid - sorry, but I say it as I see it. If it hurst, then
there may well be an element of truth in it. Have a think about it.
Never know your bad luck, you may well hear me on HF come 0100 (LIMA) on

01 Jan 2004 (that would be about 311300Z Dec 03 where the ruling in VK
changes all over the country). Hope you welcome all of us newcomers to
HF - many of us have been on HF for years on military and commercial HF
freqs, so are not exactly newcomers to the band in general. Hope to
speak with you then.

Matt

I wrote the words in the message Albert replied to and Albert properly attributed those words to me. However, Albert started out that message by blaming me for the things Clint had said in earlier messages.

No, the FCC is tasked with deciding what the basis and purpose of the Amateur Radio Service is and what we need, from a regulatory perspective, to be able to meet that basis and purpose. The FCC clearly addressed that when they said "the emphasis on Morse code proficiency as a licensing requirement does not comport with the basis and purpose of the service."

> Your statement is totally dishonest and is not
> worthy of discussion.

I've simply quoted, and agreed with, what the FCC has said. If you think that is dishonest, perhaps you should take it up with them. However, I don't think it is dishonest for the FCC to say that "...no communication system has been designed in many years that depends on hand-keyed telegraphy..." And I don't think it is dishonest to say that alone is justification to eliminate Morse code proficiency as a licensing requirement.

Excuse me, but I have never once said, suggested, or even hinted, that "CW is dead." My comments throughout this entire discussion have solely addressed telegraphy proficiency as a licensing requirement.

> Try CW - it might just lower your blood
> pressure about 90% there Dwight, old boy!

And learning to read what a person has actually said, instead of blaming a person for things that person never said, may help lower yours.

Sadly, the near future is not so bright here in the USA. I suspect it may be five, ten, or perhaps more, years before telegraphy proficiency as a licensing requirement (code testing) disappears in this country. At this point, the FCC (our government regulatory agency) has decided to do nothing until a consensus on the issue is reached within the Amateur Radio community. Clearly, there is no consensus whatsoever at this time. If a consensus is reached, it will take another one to two years for any change to go through our regulatory process. However, since most Americans can be very pig-headed (stubborn), many doubt a consensus will ever be reached. Therefore, many are hoping the FCC will simply give up on the consensus idea, deciding the issue based on what is needed, from a regulatory perspective, to meet the goals and purpose of the radio service. Nothing so far suggests they intend to do that anytime soon.

Unfortunately, too many in this country cannot separate code use from the code test. They view the possible removal of the code test as an assault on their CW identity or lifestyle. Another group views the code test as a filter to keep out undesirables ("those people" - a form of bigotry based on Morse code). Still another group views the code test as a solution to this nation's wider social problems (lowered education standards and so on). Whatever the case, almost all of these seem to forget that code testing is simply a licensing step into what is fundamentally a recreational activity (with meaningful undertones, but a recreation nonetheless).

Take care, Matt. Enjoy your new HF privileges. Perhaps all Amateur Radio operators here in the USA will one day be able to join you, and all those in other countries now without a code test, on those frequencies. If that happens, you can darn sure bet Americans will be among the last in the world to do so.

I'll try to sort it out, Rick. Albert is blaming me for what Clint said and I suspect "FT243" is blaming me for the subject line in this newsgroup thread. I don't think either one of them is actually reading what I've said, at least not without the anger carried over from what others have said. Does that make any sense? If not, don't worry - I'm getting confused trying to figure out what each one is actually talking about also.

Dwight Stewart (W5NET)

Hi guys and dolls

I was cleaning out the radio room the other day,
I have 2 "R" model 403 to 470 Mhz HT 1000's that
are collecting dust, these are 2 ch that have been
converted to 16, I used these for ham and commercial use
both radios work well, they are used but not abused.
these are the radio and antenna, no battery or chargers

I also have a new in the box, Battery elimanator/test box for
the XTS3000 series handheld and a CSI model 9800D micropatch
repeater controller/telephone interconnect that are collecting dust

some things I would consider in a trade or partial trade
or make me an offer on all or 1

low band 42 to 54Mhz handheld, pc or keypad/self programmable
or tri band handheld
mfj 259B or 269
2 or 3 port repeater controller (for an upcomming project)
Bendix king vhf eph 210 ch or self programmable vhf with dtmf
dual band mobile
kenwood TK-480 800 Mhz
pentium class laptop

or what you may have that I may be interested in

Thanks for taking the time to read this
Steve

Just because its old don't make it useless. Actually it just proves how useful it really is.

The opinion of the FCC about cw is not relevant. The present crew there doesn't have a good track record of late. I.E. BPL.

Dan/W4NTI

Gee, why so angry Paul ? Just another casualty of modern living I suppose.

I was actually interested in buying it and I wanted to make sure I didn't have the model numbers mixed up since the original poster had two different radios listed.

In the meantime good luck and keep your spirits up Paul.

Sure Pal, and you decided to do all this "number checking" via a newsgroup
posting and not by email?

Spoon-feed your BS to someone else who cares..................

Chill out Paul, all the guy asked was if it was the HTX-10. Easily confused
with the HTX-100. That's all he asked, but you accused him of being price
police with absolutely no provocation. Get up off yourself! Who made you the
newsgroup Nazi? Sheesh.

A new version of APRSPoint is available. It incorporates a lot of new
changes and enhancements and works with both MapPoint 2002 and 2004.
MapPoint 2004 was just released by Microsoft and is available as part
of the package. It contains lots of new additional map data for North
America and Europe. You are welcome to visit http://www.aprspoint.com/
for details. Thanks.

I'm passing this info along because I thought it was important for the group
(and before someone damages the radio they worked so hard for). The below

email was a response from an ICOM tech after an amateur op inquired about the performance of the 746 and 746 Pro on 60 meters. Take the info for what its worth.

73 de Paul

Good Morning....

Thanks for your e-mail.

The 746 final PA band pass filters were never designed to support operation outside of the amateur radio bands. They will "stretch" to accept normal operation in the MARS and CAP frequencies just above and just below the amateur radio spectrum, but they will not support operation down in the 5 MHz area. They will heat up and you will damage the radio. About the only two radios will have reasonable operation on the 5 MHz area are the 706MkIIG and the 718.

Best Regards;

Mike Hilton

I will sell or trade my amp for a decent short-wave receiver.

The Ameritron AL-811H operates on ALL ham bands 160 thru 10 meters. It is in excellent operating and cosmetic condition and less than one years old and has less than 1 hour operating time on it. Selling or trading because I am moving where I can't use the amp on a wire antenna and run QRP.

I would like $500 for the amp, hand carried to the buyer with 75 miles of my home. I paid $750. This amp will run 800 watts on the four tubes. I picked this amp up at Universal Radio, it was not shipped thus no shipper man handled it.

OR I will trade this amp for a quality short-wave receiver or BC-785 with optional digital board.

Remove nospam to email me IF you would like to deal.

Jim

I just bought an SX-117 and must make room by selling an SX-101A that is recapped and realigned and working well. Some of the knobs need some work. The main tuning knob is not original, and currently the receive/standby switch is serving the on/off function.   It has the added RF stage.

$150.00

I live in west suburban Chicago and will drive up to an hour to meet someone for delivery. At this time, shipping is not an option.

Over Thanksgiving I will be traveling to Beardstown, Illinois, and then north through the Quad Cities and Dubuque, Iowa, to Dodgeville, Wisconsin. I'd be happy to deliver along that route.

Please email with questions or offers.

Thanks,

Dave K9SW

Hi folks

I have a couple of shortwave items FA on eBay: a National Panasonic
portable receiver and a TRIO SM-1 preselector. here are the URLs

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3060893042

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3060893970

Thanks.

Sam

Hi all, if you're looking for a good place to sell amateur radio equipment, like the forsaleswap@mailman.qth.net groups and the like I have one it's on yahoogroups called amateur radio swap   to subscribe send a blank message to amateurradioswap-subscribe@yahoogroups.com   I do keep a close eye on new members, yahoo accounts and others that are known for spam are moderated for a little while, but really only until I see a legit message from that account. Anyway if you'd like to join come on board I just cleaned a bunch of bouncing email addresses off and would like to see that number of members go back up. thanks and 73

PS do not announce auctions on that list we took a vote when I started it in 99 and almost all don't want auctions advertised on there, that's what these newsgroups are for lol.

Hmmm, mine works OK! I have made numerous QSOs on 60m
but most were during the first week that it was opened!

Nothing melted in mine.

YET!   I think the prudent thing to do is make sure you are running relatively low power when operating on 60M. You are supposed to be

running maximum of 50W ERP. I'd think 10 or 20 watts out of the
transmitter would prevent over-heating of the band pass filter components.

The RS-6 is a goofy 'survival radio' in 4 parts which all interconnect.
All parts same size & appear as ugly, longish black sardine cans.

I need the 2 knob sets. One knob fits the RT-6 transmitter, the other
the RP-6 power supply.

Both knobs very shallow black plastic with bar-grip & .25" shaft socket
which, too, has a little bar. Can easily put up digital fotos if anyone
asks.

Of course affordable (~$7/ea) repros would be GREAT

Thanks!

Marty

---tiny history---

Only documentable use was part of a survival kit in B47s since no way cud get to E. Europe & back - they'd have to ditch.

But 1000s made after the 1st 50 or so the AF needed & most, probably, went
to Army special forces, etc. I say that since many came out thru
Army MARS in or near Ft. Bragg ~1959-61.   Many call them spy radios
since there's mild similarity to RS-1 (earlier) and GRC-109 (later and
really special forces)

My unpopular theory was they were p/o a political pay-back (boondogle)
to Emerson Radio of Waltham MA. Emerson that later became GTE.

Details here'd be more valuable to me than the 2 damn knob sets!!!

AND LOOK TO

  http://militaryradio.com/spyradio/

For Peter McCollum's amazing compilation!

Looking for an inexpensive 6 meter multmode rig. Brand not important. Older
riger (TS 600 , IC 551 etc welcome) Prefer VE land for shipping purposes,
but will consider US based rigs if the price is right.

Remove the NOSPAM to reply by email

Regards,
Gordon VE9GC

I have for sale or swap a Kenwood TS-940S/AT 160-10 meter HF transceiver in
very good shape. Included is a laminated manual, a Kenwood SM-220 scope,
and an MC-60A amplified desk mic. Asking $800 plus shipping or would
consider interesting trades for HF or satellite gear.

I also have a Kenwood TM-V7 dual band mobile radio with 3 meter separation kit. It is in excellent condition and comes with all original packaging and manuals. I am the original owner and a non-smoker. Asking $295 plus shipping.

Please reply via email to jcamp2@cox.net

Thanks and 73,
Jeff
N0WJP

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is
the latest offering from AOR in the 8200 series. This is a wide band
receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory
chanels and is all mode including super narrow FM plus wide and narrow AM in
addition to USB, LSB, CW and standard AM and FM modes. This radio has a
total of 30 minutes of monitoring on it and then packed in the box. I have
the box and all manuals and standard included accessories that came with the
unit. I will also include the optional soft case with this radio. It is a 10
out of a 10 electronically and cosmetically. I am asking $475.00 shipped
CONUS.
NO TRADES PLEASE

I have a nice Icom 761 with the rackmount handels. Have both service manual and operating manual. Also Org double box from icom. Also Heil HMI mic with cord and stand. Has had MARS mod done. And a few other items done during a recent checkup which are documented in the paper work. I would like 815.00 shipped Conus to your door. Radio is very HEAVY... Can provide a pic. Might entertain trading for an HF amplifier. Thanks for looking.

I need some of this stuff for antenna assembly. Anyone know where to get it?

For those who don't know what it is, it's a paste you get in a little can or tube that you smear on mating metals to avoid having them stick together after exposure to the elements. It's also used for soldering irons to make replacing tips easier.

I think it's molybdenum disulfide.

73, Bob

Bob:

http://bosunsupplies.com carries it (well,a t least one version thereof).
Bosun Supply is an excellent source for all sorts of stuff useful in ham
radio. Besides, when I order from them, I can pretend I own a 40 ft sloop.
<grin>

Any electrical parts place sells it. It is commonly known as Penetrox
or inhibitor paste. It is primarily used for aluminum wire contact with
terminal strips.

Two electronics stores and Home Depot didn't have it.

I finally found some at my auto parts store. I was told that Ham Radio Outlet had it for $8 but I only paid $3 for a decent sized tube of the stuff.

Thanks for your help, guys.

73, Bob

Bob

You can go to your local electrical supply house and ask for NO-LOX. It's used for making up alumunum connections in your electrical house panel. It's basically "never sieze" with conductive properties. Hope this helps.

73 K1SR Rob

The stuff I use is from Lawson...its simular to CopperCoat, but its 80%
copper and works great. it takes very little...*maybe* a tablespoon full to
do a 4 element tribander, but after 4 or 5 years in a really bad salt
environment(Treasure Island in San Francisco bay), everything that had been
put together with this stuff came right apart when the screws were taken
out...anything that didn't get the antiseize was junk.
The stuff is expensive but worth every penny.

Automotive anti-seize is not the same as electrical.
Different purpose.
The automotive is to keep steel bolts from binding in aluminum, magnesium, etc.
The electrical is to keep the coated materials from oxidizing while at the same time ensuring good electrical contact.

Here is a link to the Lawson stuff

http://webapp1.lawsonproducts.com/website/showItem?itemNum=59933

I have been using the same can for 20 years...a little bit goes a very long way....It works great for all kinds of other stuff too...lug nuts, exhaust manifold bolts, aluminium wire in breaker boxes etc.....

Hi Bob ... I applied Permatex anti-seize to the bolts on my tower and the
boom-mast-rotor hardware. The whole works came apart smoothly after being
up for 20 plus years. The material I used between the Al junctions on the
TH-6 was supplied by Hy-Gain in a little metal pill box. Likewise the stuff
worked great. SS hardware used on the antenna.

God Bless 73 Tom Popovic KI3R Belle Vernon Pa

May be for a different purpose but have used it on antennas for along time and have never had any problems with it. Seems to conduct just fine and will certainly let things come apart easy. Last use was on a TH6DXX, no ill side effects, still up and working without any problems. Antenna analyzer shows all is well.

======================================
In the UK a very good stuff for outer metal protection is Finigan Waxoyl,
available from many autoparts - and hardware shops.
 Living in a windswept area near seawater ,hence with a lot of salt spray ,I
use it on all bolts and nuts and galvanised metal clamps etc.
Of course it is NOT suitable to make galvanic contact between (dissimilar)
metal parts.

Yes, I have used the NeverSeez conductive grease, sold for automotive
repairs, on things like car battery terminals, to resist corrosion and
enhance conductivity. It does fine there.

As long as conductivity is good, and there is no capacitance created,
it should be fine.

Happy trails,

There are two varieties. One is a mix of graphite and moly in a syrupy solvent. One is a mix of copper dust and moly in a pasty solvent. Either one works well and we notice not a whit of difference in the conduction properties. In the aircraft industry, we use them rather interchangeably to coat the threads (lightly) on spark plugs so they won't pull out the helicoils in the heads when we go to change them annually, on manifold and muffler bolts so we don't have to drill them out when it comes time to work on them, and on any other thread that is likely to become corroded into place.

If necessary, you can go to an aviation supply house (Chief Aircraft, Grants Pass OR; Aircraft Spruce, Fullerton) and buy as much as you need by mail order. In a really well-stocked automotive supply house you can buy it by the dribble bottle, pint, or quart.

This is definitely a "me too."

Waxoyl is excellent stuff - a blend of wax and oil (surprise) plus
corrosion inhibitors that really work. I recently pulled out a rotating
pipe mast that had been sitting in a ground socket full of Waxoyl. 10
years of condensation had turned it into more like an oil/wax/water
emulsion, but the bare steel came out looking like new.
```

In more normal use on nuts and bolts, the oil dries out and the wax
coating hardens, so it also acts as a pretty good thread-lock.

Don't know if Waxoyl is available outside of Britain... but if it isn't,
it should be!

Looking in NW Texas for 100 ft or more of Rohn , preferably 25G but would
consider others.

Must be in decent shape.

I have a Excellent condition 101EX 10-160 meters. Still has the
plastic film on the faceplate of the radio. Looks Extra nice. Works
good, just like it should. I would call this a 9+ out of a 10. Only
one small mark on cabinet i could see. Excellent condition.
Have power cord and Manual for it. Has optional fan unit installed.
Would like 325.00 shipped on this Extra Nice Looking Yaesu. Open to
trades.

I have a brand new, never opened Icom IC-2720H dual band mobile radio for sale. I bought this with good intentions of installing it but have decided to go to a HF mobile rig instead. This radio is as it came from the factory.
I am asking $300.00 shipped CONUS.
NO TRADES PLEASE.

I have fore sale a brand new, never out of the box Diamond SX40C cross needle swr/power meter. This meter covers 144-470Mhz. I bought this meter to use with a new dual band mobile radio system for my car and decided to go with a mobile HF rig instead. Obviously this will not be required anymore. I am asking $55.00 shipped conus.

I have for sale a new Comet dual band mobile system which consists of the
following:
Comet C767 Dual band mobile antenna
Comet EM-B80 trunk lip mount
Comet CK3M5C coax assembly
This entire system is brand new and has never been out of its packaging. I
was going to install it on my car and decided I wanted to go with an HF
mobile rig and a screw driver antenna. I am asking $80.00 shipped CONUS.

One of Illinois' governors established his reputation as a Federal prosecutor who got convictions against several high powered state and local politicians. He is also a well known antique collector.

Strangely, he hasn't sent hoardes of "antique" dealers to the slammer. I guess he lost his touch.

WHO CARES! I'm 90 miles from the Tampa Bay area and don't use 2 meters anyway. Since you cross posted to many groups, you must figure that people even in the far reaches of the earth care about your local problems.

NOT!

About 25 years ago, they redefined the laws on antique and classic cars.
Cars have their own designation.

It is quite true that there are relativly few antiques.. Look under customs
law. That's were it's defined. For people who know the definition, look at
the antique association (don't knowtheir actual name).

OK, and antique firearms have their own legal definiation, too.

But assuming a 75 year old non-imported item was sold as an "antique" at
a fair market price, how could a person win a judgement in court? And
how would the US Customs service get involved?

Frank Dresser

I think it depends upon the item (which makes things even MORE complicated).

In most states, a 20-year-old car qualifies for an "Antique" license plate, and I don't think these states are worried about being sued for fraud.

It seems reasonable that radios would have a similarly short time period before becoming "antique." Now, exactly what that period would be is unclear.

Whenever I see something for sale with the word "antique" on it, I view it as just another adjective, like the word "deluxe" or "new and improved" -- in other words -- as "hype" used by the seller to make the item seem more precious.

-- Stinger

The only exception, according to the Customs  Service is cars. If anything
is misrepresented when sold, the seller is liable. Customs would have
nothing to do with that other than their law being precedent.

The state of Florida will issue a "collectable" license plate at 20 years.

U.S. Customs? Yeah so what? That is used simply for the purposes of levying an import duty (or not).

Whether something is considered to be an antique or not is simply a matter of convention or custom. Cars may have one designation, radios may have another, as does furniture. An old computer may be considered an 'antique'.

But it all depends with whom or what commodity one is dealing with. Different groups, by convention or custom, have decided what they consider to be 'antique'. It just happens that US Customs has settled on the 100 year mark, as have others, but they are not necessarily the final arbiter on what gets the designation of 'antique'.

In other words CW, you are wrong, wrong, wrong. Give it up...

Well, if the issue is misrepresention of an item as an antique, then I expect the buyer would have to show that the misrepresentation created a false expectation of an item's market value. In that case, the marketplace defination of an antique would be relevant.

I don't see how the US Customs defination would apply, unless there was some Federal beef about import taxes.

Well, I've got to hand it to you, CW -- you stick to it like a pit bull on a pot roast. ;^)

However, unless somebody logs on from US Customs, I don't think anybody else on this forum is going to support your position -- the chief reason being that (as you acknowledge) insiting on a 100-year vintage is absurd when dealing with radios.

Yet, if any of us saw a big 1940's-vintage tube powered "family radio," we would call it an antique. It has just become an acceptable catch-all name for old stuff, much like the word "Coke" substitutes for "soft drink" down south where I live.

FS: CABINET
I have a grey wrinkle cabinet (Bud?), measures 21.5"wX15"DX14"H,
and has louvres on sides and back. Back also is open, bottom 19.5"x3".
Cabinet has flip-open top, and is drilled/threaded for 19" rack mount
equipment. Front trim of red-lined chrome, top lid has round chrome
hardware handle. Cabinet is in pretty decent shape, some stains,
grunge, and about 1 sq. in. of chipped paint but will clean up OK.
Purists will want to repaint. $60 plus shipping. Can send photos. Tnx
& 73
Dan

I'm right. That's all that matters. If no one else is willing to pull their head out, that is their problem. The law is a legal definition of antique. Has nothing to do with customs other than it was defined at the urging of them. Until they had a legal definition, there was no way to classify "an old thing". They didn't care if it called antique anything more than 20 minutes old, they just needed a definition. There time frame was set by antique dealers associations. The law says nothing about customs. It is a definition, period.

-- the chief reason being
> that (as you acknowledge) insisting on a 100-year vintage is absurd when

That's true. That is why no radio should be called antique. None are old enough.

>

FWIW, I find it interesting that the Harmonized Code for US Customs uses
the the exact wording of "Antiques of an age exceeding one hundred
years" as the title of section 9706.00.00.
This is a duty-free import classification. Antiques of less than 100
years obviously exist and (they say) are dutiable @ 6.6% upon import.
If the antique label didn't apply at all then the radio item would be
classified and dutiable as some category of electronics.

Has little or nothing to do in determining if a 101-year old item is
legally defined as an antique and a 99-year old one is not in the
outside world. Their own explanation of their ruling specifically says
"In order to qualify as an antique for Customs purposes, the article
must be over 100 years of age...."

I hope this clears up any correlation (or lack thereof) between US
Customs and the definition of antique.

> understand the FCC regs.

I guess then every other ham that has opened the transmit on their tranceiver to get additional ham bands, MARS/CAP, etc., has "converted their...rig to CB" if in the course of the modification it does theoretically allow transmission on the CB band. following that logic, there's a lot of $5000 Icom, Yaesu, and Kenwood HF rigs out there that have been converted to CB's. I respectfully disagree that by adding 12 meters to this radio it shows I "don't understand the FCC regs." I would submit that it is YOU who doesn't understand the FCC regs. Well, I see that trying to get any sense through to the "radio police" is a hopeless cause. No matter, I've sold the damn thing. Now, on to opening up my new 706 for 5 MHZ......

```

> BTW, Ebay is so large that they usually do not go out of their way to look for items to ban. What usually happens is some dirtbags out there look for these radios and amps and e-mail ebay. Then "poof" your auction is ended. Even though there is nothing illegal with the item. Ebay is making way to much money to let a legal radio (or whatever) that someone "might" modify" to be sold on their system. They seem to be afraid of repercussions down the road.
> -------------
> With all ebays money how come they are afraid to have a telephone??
> ----------------

Funny thing is that I've spotted quite a few HR2600's on eBay both before and since I tried posting my radio. And no, I didn't email eBay about them nor am I going to post the links to the items (if the radio police want to, they can just search eBay to find them). One that has been up for several days even proudly advertises its Chipswitch mod that covers CB. Ummm, can you say "selective enforcement?"

Let's see, was that ALL antique dealers associations? And in what context and
commodity?

> The law says nothing about customs. It is a
> definition, period.

Yes, and it is simply THEIR definition, not necessarily EVERYONE'S definition.

Not necessarily. However, in this matter YOU are wrong, wrong, wrong.

To sum up, YOU are stuck on stupid, and locked on dumb.

It seems to me that folks have lost sight of the fact that HAMs are the
*only* ones that can legaly design, build/modify, and operate radios.
modifications/conversions don't mean squat as long as the equipment is
operated in accordance with 47CFR95 and 47CFR97.

which one of those is the one that Radio Shack just cleared out for $29.95, new-in-the-box, warrantied, etc ?

it was the HTX-10 right ?

CW...are you working for the government or a really good citizen?? I'll bet
that the word antique has got no definite meaning...from where I come
from...a 286PC is an antique...and they were produced in the late 1980s...so
I guess the guys only wanted to define a year thingy to charge taxes or
something...doesn't mean anything less than 100 years is not antique....

I just did a search on the entirety of "Title 19, USC" which is _all_ US
Customs laws. The word 'antique' is not mentioned *anywhere*.

This is readily verified by anyone -- <http://www.cornell.edu/uscode/19/>

19 USC 1489 "related to entry of antique furniture at certain ports",
but that section was _repealed_ in 1962.

You made the claim, now _can_ you back it up, or not?

I repeat:
   Can you provide a *LEGAL*CITATION* to back up your claim that -anything-
   claimed to be an 'antique' must be 100 years old?

   Or are you, in actuality, as ignorant of _actual_legal_facts_ as you
   claim others are?

   "Put up, or *SHUT*UP*" applies.

So you claim.  Now provide a cite to the the actual statute.

I've searched TITLE 19 UNITED STATES CODE (the laws regarding Customs and
the Customs service), and there is -no- mention of the word 'antique'
*ANYWHERE* in those statutes.

"Put up or *SHUT*UP*" applies
```

Can *YOU* provide any -proof- to back _your_ assertion that an 'antique'
must be 100+ years old?

There is *NOTHING* in the statutes (Title 19 UNITED STATES CODE) regarding
"Customs" to support such a contention. As *anybody* can verify by
using the search function at <http://www.law.cornell.edu/uscode/19/>

"Put up or *SHUT*UP*" applies.

This thread seems to have run it's course, but I'll toss in my two cents worth -

Here is an explanation from the Antiques Roadshow.

<http://www.pbs.org/wgbh/pages/roadshow/speak/antique.html>

Simply put, dealers and serious collectors tend to hold to the 100 year rule.

Others don't.

"...the word "antique" generally refers to an older object valued because of its aesthetic or historical significance. "

In article <A%7ub.224893$Tr4.667845@attbi_s03>,
CW <clinton.magers@comcast.net> wrote:
>
>
>Your inability is not my problem. Do the letters FO mean anything to you?

It's *your* "inability" that is under discussion.

YOU claimed, in article <lRDtb.163913$275.506596@attbi_s53>:

> "The 100 year rule applies to the US. If you were to sell as an item as an antique knowing it was only 75 years old, the buyer would have grounds for a lawsuit. They would win. ... It just shows how ignorant people are."

You said, subsequently, "Look under U.S. Customs Laws."

Guess what? I _did_ go look.

It is a PROVEN, *VERIFIABLE* FACT that CUSTOMS LAWS in the U.S. (i.e. "Title 19 United States Code") DO _NOT_ CONTAIN ANY REFERENCE to the word 'antique', let alone a "definiton" thereof. (verifiable at <http://www.law.cornell.edu/uscode/19/>

Title 19 of the Code of Federal regulations covers 'antiques' in section 10.53. The language used is "Antiques of the age prescribed i by subheading 9706.00.00, HTSUS..." The Harmonized Tariff Schedule of the United States (HTSUS), subheading 9706.00.00 says "antiques of an age exceeding 100 years". <verifiable at <http://cfr.law.cornell.edu/cfr/19/>, and <http://dataweb.usitc.gov/SCRIPTS/tariff/0310c97.pdf>

The term 'antique' is *NOT* defined _anywhere_ -- in any of 19 USC, 19 CFR, or the HTSUS.

ALL the references in 19 CFR and HTSUS, have to do with the import-duty exempt status of *some* antiques -- i.e. those antiques which are over 100 years old.

If an 'antique' was *legally*defined* as an object that was 100+ years old, there would be _NO_NEED_ for the repeated, and continuing, appearance of the qualifier "of an age exceeding 100 years" in the CFR and/or the HTSUS.

Thus, the fact that that qualifier _does_ so appear is *proof* that "antique" is a valid, *legal* description of artifacts _other_ than those "of an age exceeding 100 years".

Your continuing claim to the contrary demonstrates that *YOU* are one of those "people" you referred to, when you said:

> "It just shows how ignorant people are."

In fairness, that's not an accurate statement.

"Ignorance" is curable, by education.

You _refuse_ to be educated.

That makes the appropriate description "stupid". Stupidity is permanent.

You are *stupid*.

Since you appear to be incapable of being educated,
you are hereby notified that _every_ post you make,
containing your *proven*false*to*fact* allegations
will be followed up with the above _fact-based_
disproof of your allegation.

You have a choice:
  1) STFU
  2) have your *stupidity* exposed, _every_ time you
     open you yap.

The choice is yours. Choose wisely.

CW: The only thing you are right about is that your head is so far up your rectum that you think the sun went down. The only reason customs mentions 100 years old is to make a cut off point for collecting duty. They in no way define an antique as being over 100 years old. Look uo the defininition of antique in any of the online dictionaries and I think you will fall into one of the synanoms of antique.

If no one else is willing to pull their
> head out, that is their problem. The law is a legal definition of
antique.

If this jack-ass troll CW would have made even a 30-second web search, he would have done a dictionary.com search for the definition of antique.

http://dictionary.reference.com/search?q=antique&r=67

He then would have found this definition:

"An object having special value because of its age, especially a domestic item or piece of furniture or handicraft esteemed for its artistry, beauty, or period of origin."

Funny thing is, there is no 100 years, or any other quantity listed in any of the definitions. If he is relying on one US Customs definition, that he can't even verify, then he is purely trolling for his own enjoyment.

Another funny thing. Trolling is nothing new for him. It must be his favorite hobby.

We all know he is wrong. He knows it, too. He is just doing this to provoke people. He keeps coming back because we have been feeding his sick desire for attention. Let's all just try to ignore him, okay?

I'm done with this whole affair now that I've sold the HR2600 radio in question. A very educational and actually quite interesting discussion this has been. In closing I'd just like to say that there are still very many hams out there who have lent me a helping hand with many constructive comments. I've received quite a few emails from hams genuinely trying to help me with my questions. Thank You. There have also been a few (I don't know if they are hams or not since the dissenters usually won't post their callsigns) who have voiced their opinions as well. Thank You for those opinions also. It's helped me understand what all the fuss is about and the roots of the militant anti-freebanders. AND is a celebration of free speech. I say let it roll everybody and let's try to learn as much as we can from one another. But remember the old saying "divide and conquor." There's not that many people coming into any form of radio hobby anymore, and all the in-fighting will help no one in the end, when we wake up and all our radio spectrum has been taken from all of us. Let's pick our battles carefully. To the freebanders, I say get your ham license, to the hams I say open your hearts and minds to everyone who shows an interest in radio and being a good operator, including more than a few freebanders who fall in this category. And together we might just get the 11 meter band back. At the very least we'll protect the spectrum we've got.

So what? Radio Shack cleared out the DX-398 several months ago for $99.97
and as of this moment the fair market value of this radio is $150.

If you want to be a price cop, get a job at QVC.

As of last year, Motorola still did send their trade-ins to the crusher.
They did the same thing with engineering units. I can't tell you how many
XTS-3000s went to the crusher.

Your analysis might be true, IF there was any continuity to typical management. Businesses that have been "doing the right thing" for 50 years can suddenly do bizarre things, often from bringing in a "breath of fresh air" in the form of a manager hired from competition, or, even worse, from some totally unrelated industry. Or the management level fills up with lawyers and bean counters. Got synergy?

Other things, like management loosing their collective nerve or direction,
can also produce this effect. Remember Coke? For 90 plus years, brand leader
with an unchanging formula. Then the data comes in from some market focus
group, and we suddenly get New Coke!

BTW, this "news" about destroying obsolete products is very old news. Seems
like more than 10 years ago, HP was doing this on 141-series analyzer
mainframes. Come to think of it, HP ain't the old HP anymore, huh?

Ebay is a wonderful thing most of the time.
Yes, you get the most cash from whatever you sell (most of the time).
Ebay is watched all over the world and if someone really wants to
spend more than you might think is a fair price, well, it's up to
them. It's called free enterprise.   I look at some of the high
prices and shake my head, but If an item is wanted bad enough,

make it so. Who is to say what an item is worth to somebody looking
for it.
ALSO, these newsgroups are nice to find stuff too, BUT, You have no
recourse if something goes wrong. Like what happens if you pay for
something and you never get it? Or if is not working as described?
Or it's beat up and not mint like the posting says? You're screwed.
True, most hams are honest but there are some chumps also.
At least on Ebay there are actions that can be done. Also, using
paypal to pay for something is great. Yes it cost a very small amount
but if you don't get your item and the seller does not have any proof
that he sent it Paypal can and does get your money back from the
sellers account.
73

>If you "want a fair price", post it For Sale in any of these groups.

BTW, Ebay is so large that they usually do not go out of their way to
look for items to ban. What usually happens is some dirtbags out
there look for these radios and amps and e-mail ebay. Then "poof"
your auction is ended. Even though there is nothing illegal with the
item. Ebay is making way to much money to let a legal radio (or
whatever) that someone "might" modify" to be sold on their system.
They seem to be afraid of repercussions down the road.

With all ebays money how come they are afraid to have a telephone??

Wrong again, Doug: It's whining trolls like you who are responsible
for the "ban".

And if you continue to jam 2 meter repeaters in and around Toledo,
you'll get repeaters banned, too.

Pinhead? I guess you are.

Prove me wrong: Post it For Sale here. You'll get a "fair price".

But you didn't answer the question: How can you claim that you'll only
get "a couple of dozen at best"? A "couple of dozen" would only be the
flamers and trolls!

In this current time, NOTHING is as it used to be.. As the man pointed out
with management, ideas, formulas and so on, it seems all of what "used to
be" common sense has gone out the window. Nothing should come as a surprise
in this day and age.
But, speaking of trashing items, I too know of a few companies that trash
their items with no regard to future use, and so on.
This world is run by a whole different set of rules now and even they aren't
set in stone. It is a shame to see such equipment still with some life to it
demolished, but such is life. G.W.

  IIRC HP broke into several different companies - the one that makes
  computers absorbed Compaq (or was it the other way around) and the
  one that makes printer stuff is the "new HP".

  The one that made (from the start) and still makes some of the best
  test equipment now has a new name.

  It shudd'a been the other way around.

I have an FT-897 both filters 2 batteries and charger. There is some cosmetic scuffs and the RIT knob has been repaired.
MARS/CAP with frequency stabilizer.

I am the original owner.

I would swap for late model Icom 706MKIIG or FT-100D

I really would prefer a mobile rig and have not interest in QRP w/ batteries.

OK, everyone, as promised, I finally posted my radio on QRZ.com and www.eham.com. Price is $225 or best offer. Go to either of those sites and check out the description and photo.

Thanks again to everyone who helped me with advice. Much appreciated.

I'm selling my trusty Scout:

<http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3057949710>

Ten-Tec Scout with 40 & 20 meter modules, Bencher Iambic Paddle included. Unit has noise blanker/Jones filter built in and user manual/schematic is included. Radio has "Amp" jack for power but PowerPole adapter is included for emergency service interoperability. No microphone was ever used on this rig.

The Hamprice info is really neat. I saved the document for future reference. I figure then that my radio is priced just about right considering it comes with a pretty much new $50 aftermarket amplified mike, and the Chipswitch enhanced microprocessor which is about $100 installed. Throw in a 2510 service manual and two mounting brackets, and I figure all these extras have to be worth at least $75 over the Hamprice price (which is presumably for just the basic radio).

It's been years since I've sold any equipment, so one variable I don't know about is what the overall market conditions are like right now, but since Hamprice says all their #'s are since March 2003, it's obviously not too bad.

And yes, I've heard the 706 tends to get clobbered by intermod on 2 meters, but since I use it for a base radio and I live in an extremely quiet location, that's not a concern for me. In fact the main intended use for my new 706 is to monitor 2 meter SSB for band openings.

This is getting really crazy! After my bad experience with eBay, I posted a query in this newsgroup asking where I could sell my perfectly legal HR2600. One fellow ham helpfully suggested eham.net and qrz.com as viable alternatives. Well, I submitted my ad to qrz.com and it kept mysteriously disappearing so I kept reposting thinking I was doing something wrong (I rarely post anything for sale so I'm no expert, I was thinking). Well after the third time my posting mysteriously disappeared I got the following rather curt email from the moderator of qrz:

"I have deleted your posting for the illegally modified ten meter
radio. We
do not allow postings for this type of equipment. Please read the
posting
rules at the top of the forum page you are posting in before you post.
73

Bob
W8KT, Moderator, QRZ"

In fairness, I should post what my ad actually read:

"I just bought a 706 and wife says the 2600 must go. 2nd fastidious ham owner since new. Professionally installed Chipswitch giving this radio coverage of both the 10 & 12 meter bands. RD-104E hand mike recently bought new to replace stock mike that went bad (stock mike included if purchaser wants to fix later on). Includes original owner's manual, all documentation for the D-104 and Chipswitch, power cord, two mounting brackets, and all four original thumbscrews. I'm also throwing in a mint HR2510 service manual. Radio is in excellent condition and used mobile only a few times. Totally stock except for Chipswitch. I'm not a dealer...this radio's been in my shack for the last 5 years. $225 obo plus $15 shipping. Email me, Darren, W5DKE, at dream@alumni.utexas.net if interested or have questions. Thanks for looking at my ad!"

I had carefully read the rules before I posted and reread them again to make sure I had it right. This is what qrz.com's "rule" states:

"Amateur Radio equipment and related items only. For Sale ads only - no opinions, discussions. No illegal equipment, i.e. 10m Amps, 11m Amps, hacked CB's."

OK, now call me crazy, but I am some kind of idiot to have not realized my HR2600 was prohibited by qrz.com's "rule?" Bob, W8KT, seems to have implied that the only way for me to have not realized this was that I must not have even bothered to read the "rules" before I posted.

I used to be pretty militant about cracking down on "freebanders," "pirates," etc and had no sympathy for "whiners." [None of my HF radios have been "opened up" except for this HR2600 because that was a necessary side effect of expanding it to cover 12 meters.] But this is crazy. The anti-freebander crusaders have clearly gotten so militant and self-righteous they brand everone who possess a modified 10 meter tranceiver as scum of the earth. I'm being treated like a criminal for trying to sell a perfectly legal HF tranceiver to another ham. I am PRESUMED GUILTY just because I merely posess an HR2600. So what am I supposed to do with this radio? Since I've been banned everywhere (but not eham.net, thank you eham.net, and I even said 12 *through* 10 meters on that site) now I figure I have three options: 1) sell it at the truckstop, 2) donate it to the Boy Scouts (but then they'd be criminals), or 3) get rid of this equipment in the nearest dumpster before I get arrested especially now that the whole world knows I possess "illegal" equipment.

I've never had as bad of an experience as this in all my hamming days. This has really left a bad taste in my mouth especially when I realized it wasn't just the non-hams at eBay that were treating me this way (which I got over and it wasn't that big of a deal since I knew they were ignortant about ham radio), but now fellow hams are treating me like a criminal!

```
Someone please educate me and tell me what I'm missing here.

Darren
W5DKE

Welcome to the world of N8WWM & WA3MOJ. They
have been trolling Rec.Radio.CB for a couple of years
now, with nothing to add other than harassment, foul language,
sick sexual pictures, accusations, signing you up for Spam,
sending you virus's and all around trolling.
Sorry about your problems with QRZ, have you tried to
e-mail Bob direct, see if maybe things can be cleared up?

Landshark

QRZ and the "RF Keystone Kops" who fed them
the BS thereon are obviously paranoid.

The HR-2600 IS NOT..repeat...IS NOT capable
of being "modified" for out of band operation as was
it's immediate product predecessor radio the HR-2510.

I think the "kilocycle cops" who got your ad
cut off from QRZ don't know their freakin
ass from a hole in the ground. I and suprised
QRZ even fell for their line of BS.

Put it on E-Bay instead, and in so doing
tell QRZ.com to go pound sand.

> Sorry about your problems with QRZ, have you tried to e-mail Bob direct, see if maybe things can be cleared up?
>
> Landshark

Hi Landshark,

I did try to email him twice for a clarification, but have gotten zero response. All I got was the initial email telling me to "read the rules before I post then I would know not to post illegal equipment" (I paraphrase, see above for exact quote). It's not that big of a deal anymore...it's only a $200 radio at issue here after all...but I have gotten an education at how some hams just can't help being self-righteous asses. You know guys, there is a war on, and our country is going bankrupt, etc.. So you would think they'd find a bigger issue to get their panties in a wad over if they really want to go on a crusade. No wonder young people are not coming into the hobby. One slip up, and they get jumped. It's almost like these old cratchety hams would rather see the hobby die completely than morph into something they don't approve of. They can go down with their ship if they want to, but this sort of attitude is what is killing the hobby, in my opinion.

By the way, in an attempt to be done with this nonsense, I've dropped the price of the radio to $195 or best offer. Again, see www.eham.net (my new favorite site!) for further info and pictures.

Thanks

Darren

Montgomery Wards Model: Airline 62-2500

FOR SALE: BEAUTIFUL Montgomery Ward Airline 62-2500 floor model. AM
and 6 to 18 MC shortwave. Works wonderfully after a good warm-up of an
hour.
Seems I saw a label somewhere on the unit dated 1948. Tubes all check
out good. Replaced cracked AC cord. Rest is all original equipment.
$95 takes it. I would prefer pick-up or meeting. (I live in Southern
Michigan.) Will ship IF you are willing to pay for a professional
packing/mailing company to do the work. (Probably run you around $60.)
PLEASE CALL ME on this one to work out
details. It is a honey. (1.517.563.2613) 73 from Bill - WA8MEA ---
NEAT STUFF! Visit: http://qth.com/dwm

> Maybe he should auction that separately?)

Agreed. I noticed that it's really not worth that much. Whatever
it's worth, I figured the "market would decide" if I auctioned it. On
eBay I had it for sale with no reserve. It's not that I'm keenly
aware if it's value and wanted to get more than it's worth, just that
I don't really have the foggiest what the radio's worth so I was going
to auction it to make sure I at least go "about" what it was worth.
Right now it's up on www.eham.net for $195 or best offer. Hamprice
says it's worth about $150, so I figure with the Chipswitch and the
D-104 hand mike, I've got it priced roughly right.
The 2510 service manual is just a freebie. I'm not even concerned
about getting any money for it, I just would hate to throw it away.

the ron wright N9EE 146.640 repeater in tampa bay florida is home to a new jammer, he proudly says his call KG4LEG AKA coy roy on CB

www.QRZ.com reports him to be
Roy A Lepelletier
1703 Cypress Avenue
Belleair FL 33756
USA

roy will pick fights with other amateurs.
roy will key up and cary on an imaginary "full duplex" conversation with suposid CB'ers on channel 35.
he claims he has lots of friends on cb that are listening to him on 146.640 while they are talking back to him on CB ch 35. (that is total BS) hes just doing it to agitate the normal folk on 640. several people heard him keying up on CB 35 while claiming to talk full duplex on ham, wich would not be effective to talk to cbers anyway.
(basically roy is lieing about his intentions.)
he also will ramble on and on to himself that there are people making death threats against him. he also claims a guy named dickie or dicky hendricson or hendrickson is a child molester, and goes into deatail over the air what this dicky had suposidly done to childeren (fairly

graphic and not apropriate)
in other times he will say this hendricson is his friend. one amateur don KG4COQ tried to nicely get roy to change to another repeater and wanted to talk to roy about the guys that roy is talking about on that other repeater. roy turns it all around and says roy doesnot need any help with these people that are after him, but if anyone wanted to help, they could send roy cash. (roy said that several times)
when don continued nicely to try to get roy to change repeaters, roy twisted around this words and accused the don of wanting to meet up with him to start a fight, but don didnot say anything like that, then roy accused don of wanting to meet up with roy for some homosexual encounter, wich again don NEVER said anything about. roy has also commented about having been in the marines out in california, something about a "jar head" flight wing kind of position, but didnot go into detail about why hes out. he claims hes retired and wants to stay that way. roy also was throwing out the "im gonna sue you" to alot of people also. he was saying people were saying bad things when they wernt. new people would get on the repeater, and he would initiate a conversation with them, but immideatly jump into a platform about how hes on cb and running 200 watts, just like everyone else does on CB. he says things over and over. if everyone leaves him alone, he would usually key up every minite or 2 making a stupid CB comment or CB slang.

this guy is a head case, hes off his medication and someone needs to get him to the mental hospital :)

well the control operator is ron N9EE, he did shut the repeater off several times, but whenever it came back up coy roy was there.

on nov the 13, coy roy was back, and ron tried to make peace with roy, tried to pursuade him to fit in, and all has been forgotten and that he is welcome on the repeater anytime, and ron was handleing the situation quite well. roy did stop the agitation for several hours after the conversation.
a day later ron tried to talk to coy roy again, and coy roy didnot know who ron was, even tho ron had talked with him for 30 minutes the day before, much longer than anyone else talked to coy roy, this guy has some problems!

on 11/14/2003 KG4LEG roy said he was a tool and die maker in the marines, not a "jar head" in the marines flight wing like he said the day before.

coy roy also talks about another CB'er MENTAL MIKEY
other phrases he loves to use are "fag boy" "punk boy"

alot of this post is for archiving purposes in the newsgroups, so if people down the road have a problem with him, they can search the newsgroups and history will come up. the newsgroups are an invaluable tool of past history.
an archive system spanning several decades, and still growing every

hour.

```

Translate the dynamic range ie noise to max signal for a fair analog
scope and represent it in bits ; translates to 24bits or so with 100+MHz
bw cant do that with digital only 12 bits or so!!

Ive re recently had access to all types and demonstrated that to see a
.1mV 200MHz parasitic oscillation on a 10V 10MHz sin wave cant be done
on a modern scope (have to use analog spectrum analyser) but easy on a
good analog scope .
Cheap Analog still available from Japan we are being forced in that
direction bt Tech and Agilent/HP

Oh Lordy, here we go again. It might not be an "antique" in the UK
where they have the "100 year old rule" but
American Heritage Dictionary sez:

an�tique
(click to hear the word) (n-tk)
adj.

1. Belonging to, made in, or typical of an earlier period. See Synonyms at old.
2. Of or belonging to ancient times, especially of, from, or characteristic of ancient Greece or Rome.
3. Of or dealing in antiques.
4. Old-fashioned: wore a suit of rather antique appearance.

n.

1. An object having special value because of its age, especially a domestic item or piece of furniture or handicraft esteemed for its artistry, beauty, or period of origin.
2. The style or manner of ancient times, especially that of ancient Greek or Roman art: an admirer of the antique.

Well you can try one time, no response you know
where you stand.

Actually, it's not a Ham thing, it's more of a troll thing.
The individuals I mentioned before are nothing more
than trolls, a ham license has nothing to do with that.

> You know guys, there is a war on, and our

Yup, sad thing. It's those people that make you not want
to take the time, study, pass an exam if people like that
are on the airwaves. Believe me, if they talk like this
on the newsgroup, they can't be any better on the air.

It has nothing to do with crochety old hams and everything to do with
the fact that the guy converted his 10 meter ham rig to CB and can't
understand the FCC regs.

Don't blame eBay and the FCC for the fact you can't sell this radio
legally.

Blame the CB bootleggers, pirates and freebanders like Landshark,
Moparholic, etc. who operate illegally. They are the ones who forced
the FCC to ban these rigs.

The 100 year rule applies to the US. If you were to sell as an item as an antique knowing it was only 75 years old, the buyer would have grounds for a lawsuit. They would win. The definition in the dictionary simply reflects common usage, not law. It just shows how ignorant people are.

Darren,
your is probably not the only case. However, the HR2600 does have a nasty habit of opening into 11 meters when one does the chipswitch to open 12 meters. This is not neccessarily true in all cases (depending on the version of the chipswitch used).

you might want to take the radio in, have it examined by a tech with a G.R.T.O lic. from the FCC (commercial grade lic.). and then have him sign an affidavit attesting to the specifications the radio is currently capable of. submit a copy of that along with your posting back to qrz.com and see what goes. Thats all I can suggest.

oh really? I know of 4 shops here in the southwest that used to do routine
mods on the HR-2600 line of radios without a problem. What are you basing
your info on?

> Put it on E-Bay instead, and in so doing tell QRZ.com to go pound sand.
good point. list it as "HAM GEAR". make no mention whatsoever about CB in
the ad.

Can you provide a *LEGAL*CITATION* to back up your claim that -anything-
claimed to be an 'antique' must be 100 years old?

Or are you, in actuality, as ignorant of _actual_legal_facts_ as you
claim others are?

"Put up, or *SHUT*UP*" applies.

So why does the State of Illinois sell restricted use antique license
plates for vehicles over 25 years old?  Shouldn't they know "the law"?

I did a pretty extensive search, and I can find no law, statute, or covenant that states that there is a particular time period involved in a particular item being "antique", only a concensus that seems to have changed by virtue of common usage (ever hear of common law? It came about by virtue of a concensus.) One dictionary still states the 100 year figure, however, most do not. Lacking an actual statute, common usage, and not an old dictionary definition, would be what is considered in a civil suit.

Aside from that, if you were to hold to that 100 year figure, there will be very few antiques, all in the hands of the very rich, left within the next 50 years, as there is nothing that has been made in the last 40 years that will still be around then, and the supply of parts for that which was built before then will have long since been depleted..

Frank - this is how big business works. They're not in business to do favors for you, they're in business to make money. Period.

Teletype Corp. used to do the same thing with used Teletype machines. Motorola used to do the same with traded-in 2-way radios (I had a friend who drove the truck to the crusher.)

That's the way it works, Frank....

<snip>

Do you have hard evidence of this, such as an official statement from someone at Tektronix in authority to make such statements?

I think your local dealership is pulling your leg. I visited the Tektronix company surplus store less than four months ago, and found a generous assortment of older 7000 and 11000 series mainframes and plug-ins, many of which were in perfectly usable condition.

Don't even get me started on the seemingly vast quantity of Tek scopes and other such goodies that seem to be in constant availability on the surplus side of things (hamfests, stores like Kaiser Technologies in the Bay Area, etc.)

If this really is true, its a shame. I've been using and repairing old Tek scopes for about 30 years (!), and love to see kids, hobbyist, and hams get their hands on them.

Realistically, 'scopes Tek gets in
on trade will be a very small percentage of the number out there, so it should have little effect.

Steve

<Troll check>

Please supply the name of this Tektronix dealer or distributor -
I will make a personal call - and then if verified to Tektronix.

G. Beat

Yes, this is how business works, but that doesn't mean it works well, as many companies rely on their longstanding reputations as 'good guys'. The info I received came from the GM of Radar, Inc. in Spokane. Whether the policy was initiated by Radar or by Tektronix, or applies to any other brand, he didn't say. What he -did- say was that he has had to send several dozen scopes the the incinerator since this policy began not long ago -- and some nice ones, too.

Either way, it still sucks.

Has to have been Radar's policy (and a stupid one it is, too). I
don't see Tek doing it because Where do you think they get so much of
their inventory for the company surplus store?

A lot of the items at the Country Store are prototypes, special modified
units used as test fixtures, etc. that wouldn't have much appeal to
end-user customers as much as to experimenters.

If the policy exists, it is stupid. A used Tek scope may present some
compitition to a new Tek scope, but it presents much more compitition to
the new scopes of the lower price manufacturers.

You have to be a corporate "bean counter" on a rant to come up with
schemes like this. You're right, Frank, a $500 used model isn't hardly
competition to their latest-greatest $20,000 model. Mr. Bean-Counter
would like to think they could eliminate such competition but odds are
Mr. Bean-Counter wouldn't know a o'scope if it bit him in the arse.
If Tek is really doing this nowadays the only purpose it serves is to
make them appear as knuckleheads.

One rather large electronic mfr that I used to deal with had an "outlet
store" where they sold the trade-ins, factory refurbs, etc. Basically a
scratch-and-dent outlet. Prices were only maybe 25% less than the good
stuff...the biggest advantage was not having to step thru the corporate
ordering nightmare spending days, if not weeks, playing phone tag with
some "account representative" who was the only person authorized to take
your order.

The outlet store made too much sense so they closed it.

-Bill

Tektronix is a good and reputable company. Don't care what anyone might think, I know better. My uncle (Warren K. Dallas) helped establish the groundwork for a reputation since 1947, that prevails within Tektronix to this day. Any doubts, read the book "Winning with People: The first 40 years of Tektronix. I rest my case. 73 de Fred.

They certainly are proud of their gear!
Their prices are, IMHO, about 2-3x what they should be.

Check your fly, Fred. Something ridiculous is hanging out.
I've never heard anybody say Tek was a "bad" company or made bad gear.
Tempramental, maybe, but not bad. But this day in time (since the book
came out) big corporations aren't run by the good guys like Warren K....

I am not a regular user of eBay, so needless to say, I was quite
surprised when my HR2600 was banned. I emailed eBay and they
basically said the HR2600 has been deemed by the FCC to be an illegal
radio since it's used frequently for out-of-band pirate operation.
Since I am a licensed ham, bought the radio legally from another ham,
and have always operated it legally, I can't see how they can ban
these radios (other than the fact that they can because it's their
auction site and I know this trumps fairness).

So my question, is what is the best alternative auction site for those
10 meter ham refugees who have been banished from eBay? I've heard

Yahoo's site is pretty good, are there others I should consider? I'm not a dealer, just an ordinary ham wanting to get a fair price for my prized HR2600.

Thanks in advance for your advice and suggestions.

Darren

If you "want a fair price", post it For Sale in any of these groups.
The fact that you want to auction it suggests that you want more than
a fair price.

QTH.com is good.

Thats Ebay for ya, can't sell legal items but there are literally hundreds of low drive 10m amps listed there, and they are ALL illegal. Relist it but don't use HR2600 in the title, just put 10m transceiver.

Ebay reminds me of the Bush/Cheney/Ashcroft cartel. They do anything they want, legal or not, and they don't care what anyone thinks of their actions. Bunch of arrogant bastards.

Once I saw an item manufactured in 1999, "autographed" by a person who has been dead since 1990. It was being sold as authentic with a COA. I notified ebay of this obvious scam. They told me to mind my own business.

That is a stupid thing to say. On ebay you could have hundreds
of people looking at your item. Here you are limited to a
couple of dozen at best. You should use your cranium some time.

I know about the HR2600 ban and it does not make sense to include it with the Lincoln and the HR2510. Those radios are easily modified but the 2600 requires major surgery in order for it to operate out of band. Common sense doesn't seem to be all that common.

I did not see your auction so I don't know if this applies. I put up a very nice HR2600 on ebay this year. It had the Chipswitch so it was capable of 10 thru 12 meter operation. I mentioned in my auction that it would operate on 11 meters and ebay pulled it. I listed it again and only mentioned 10 and 12 meter operation and they left it alone. You could also list it without mentioning the model of the radio. Bidders could email you about specifics.

Could it be they don't want to do anymore service, perhaps it cheaper just
to replace those new off seas plastic cheap ones one under warrantee.
I called them about a Tek 2232 and someone on the other end got all pissed
off, said call GTE for service ?

I had quite the opposite result when I called them on an encoder failure on my TDS-420a

They were very helpful, and the replacement encoder was surprisingly inexpensive.
They took a few minutes to verify that we were ordering the right part, because of an ambiguity in the part number, but it was resolved quickly.
The whole thing was less than $50 and I even got spare encoders at that price, in case of a future failure.

Frank Gilliland wrote:

> Tektronix is trying to manipulate the oscilloscope market.

Perhaps. However I know in some industries, the same thing is done to prevent something like this happening:

Original owner of functioning, well cared for unit sells it at a flea market etc.
New owner modifies/breaks unit, then sells it to 3rd owner
3rd owner is dissatisfied and blames manufacturer, perhaps with little effect, perhaps with significant damage to manufacturers   reputation.

I know from first hand experience that this was the case with 2 well known 2 way radio companies. If you were caught sneaking a trade-in out of the path of the crusher, you got canned.

Yep, you guessed it. Same deal with mine. The wording I used was
operates "10 *through* 12 meters." I emailed them and proposed that
if I change the wording to "10 *and* 12 meters would it be ok. The
answer was that the wording didn't matter.

Below is the exchange I had this morning with eBay. It seems eBay is guilty of merely blind obedience to the FCC and that the problem lies with the FCC's determination that all HR2600's are "problematic" and are of a "prohibited nature." When I bought the radio years ago from its original owner (also a licensed ham) I liked that the radio had a Chipswitch so I could operate it on 12 meters where I have operated it extensively. An added side benefit is that I can monitor CB during long roadtrips (I don't own a regular CB but can see their usefulness out on the highway). I have never transmitted out of band nor have I ever wished to. I guess my biggest problem with all of this is that I feel like I've been falsely accused and assumed to be a criminal. I must say I was somewhat offended by the whole episode. Here's the exchenge with eBay:

Hello Darren,

Thank you for taking the time to write eBay with your concerns. I'm happy to help you further.

We absolutely understand that you did not intentionally violate our policies. However, the Uniden HR2600 model is simply not permitted on eBay. Regardless of how the item is described, it just isn't allowed. I apologize for the inconvenience.

Your item was ended because it was identified by the FCC as potentially problematic. At eBay, we are not experts on transceivers and the specifications of each model and how it may be modified. Therefore, we rely on the FCC for guidance. eBay was contacted by representatives from the FCC and asked to remove certain models of radios that, while legal, may be problematic. Therefore, you may contact the FCC if you have any further questions about the prohibited nature of your particular model.

For further information concerning why your model was ended, contact Ray LaForge at the FCC Laboratory, 7435 Oakland Mills Road, Columbia, MD 21046, (301) 362-3041, or E-mail: rlaforge@fcc.gov

We appreciate your patience and understanding regarding this matter, and wish you continued success on eBay.

Regards,

Lara
eBay Community Watch

Message: Re: Item #: 3058207918

Dear Sir or Ma'am,

I believe you may have misunderstood the nature of my item that was removed today. The radio is a fully FCC type accepted and approved HF tranceiver. It is designed and advertised by the manufacturer (Uniden) as a 10 meter HF tranceiver with 12 meter capability after minor modification. As a consequence of the modification it is, admitedly, capable of operating between the 12 meter and 10 meter amateur bands. However, it is NOT a so-called "export," "CB," or other non-type accepted radio. It's fully FCC approved. Many, many, hams have modified the Uniden HR2600 in this particular fashion to enable them to operate legally on 12 meters as well as 10, and is not at all inconsistent with perfectly legal operation on these bands.

There are also many other FCC type accepted HF radios capable of operation outside the amateur bands that are listed on eBay right now, so I'm not sure why my radio is different. In reviewing my item's listing, perhaps if I had said "operates on 10 and 12 meters" rather than "10 'through' 12 meters" or included a disclaimer that the operator of the radio must hold an FCC genral class or higher ham license, would my listing be ok?

Also, I would like to point out that I am a law-abiding ham radio operator who holds a General class amateur radio license, call sign W5DKE, and that I legally operate this radio on both 10 and 12 meter amateur bands. If a purchaser "might" operate the radio outside the legal amateur bands, that should not preclude my being allowed to sell the item. Otherwise you would have to end the majority of transceiver auctions I see in the Ham Radio Tranceiver section of your website.

Lastly, you can see from my selling history that I am not a regular user of eBay. Please understand that I in no way intended to circumvent or disregard your site's policies and if I have, please accept my apology.

Respectfully,

Darren Ream

Fellow Ham's,

I recently repaired a FT101E for a caregiver to present to a retired Catholic priest of the Maryknoll order in Los Altos hills, CA. While the caregiver got the radio for free and I repaired it for the cost of parts he lacks a microphone to go with it.

If you have a suitable microphone you could donate it would go a long way to get this going. The caregiver / Ham who is providing the radio is Dan Saunders / KI6FA.

Please reply to me via email if you believe you could donate a suitable mic. and I will pass the info on to Dan (he currently lacks access to USENET). When replying please remove nospam from my email address.

Thanks for taking the time to read this appeal!

Sam Severs WS6S

This is definitely not right.
Hell, by that grounds, a pencil is "problematic" because it might be used to plot a terrorist attack..

I'd forward the exchange back to riley and the arrl.

Since the HR2600 is only 10 through 12 meters, tell her you won't get very
much for it and it isn't worth selling.

Those things don't like to be around radio towers. 2 meters is useless
when the tower is a half mile away.

Talking to Ebay is like talking to M$. They really don't care as long
as they make $. The are very "reactive" to issues, not "proactive". I
see nothing wrong with the 2600 but lets talk about the 200 watt "Ham
Amps" for $1xx.00 that cover 12 and 10 meters? They are still around.
Also the "Amateur amps, 250 watts for $2xx.00 that only cover 24 to 30
mhz. Funny, they still get listed?

What do I know and its for sure Ebay does not care at all.

Just my 3 cents, John W5CGU

"A couple of dozen at best"? How do you figure that? Do you have any
clue? If that's true, why did you ask your question here?

BTW, I merely made an observation. But you proved it for me: The "fair
price" you could get here wouldn't be enough.

It's pirates, freebanders and keyclowns who are responsible for the
"ban" in the first place, yet they are the ones who bitch the loudest
about the "unfair" eBay and FCC.

And you are an assclown ranger. Really Doug, why don't you find a cause that matters? You spend your time here posting useless attacks and searching Google to find shit that matters to no one 'cept you. Why is it that you have no life? You think you bother folks here? All you really are is a punching bag for those of us that choose to reply to you, nothing more...nothing at all. You have no information in that is not available to anyone with Web access. Really man, with all your gay references and knowledge, think of the good you could do spouting all your information on some anti-aids or similar such website. Get a clue.

the last time frankenstein bought a scope it was $1200.00 new.....So
now he thinks the company sucks because he is a tight ass.

Hey Chapwoman, take your keyqueen buddy "jam3carrotsinmyass"'s advice:

"Its human nature to nonconform especially
```

concerning something as trivial as this."

Go back to yer coke sniffing faggotry.

Me too, but it was after many years of not being able to get them - read the stories by Wayne Green and Byron Kretzman about the machines that used to go to the landfill. Same with Motorola - a few hams spoiled it for everyone by reselling 2-way radio gear back into commercial service after they had "promised" (and signed waivers) that the equipment would be used only for ham radio use and not resold into commercial service.

Sometimes it's just cheaper in the long run to dispose of gear than try to support it and lose a potential new equipment sale.....

My God! Cut me to the quick why don't 'cha!

Still, the question remains, have you found yourself?  And I don't mean your
little thingy. Have you found a cause that matters?

By the way, thanks everyone for their responses.  I think I'll go
ahead and post it on eham and qrz and skip this whole auction thing
altogether.  When I post it for sale, I'll post a link here so
everyone can look it up.

Thanks again.

I have a flawless FT-1000MP Mark V Field for sale. I am the original non smoking owner. This radio has been used very little. It is a 10 out of a 10 electronically and cosmetically. I have the box and paperwork plus all of the standard included accessories. I also made a copy of the owners manual and put it in a hard binder so I wouldnt ruin the original. I will also include the technical overview manual to the FT-1000MP MK V Field. I am asking $1,500 plus actual shipping charges from 48026. I can be reached at n8ihs@comcast.net
73s
Dean

I have for sale an as new AOR AR8200 MarkIII B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.
NO TRADES PLEASE
I can be contacted at n8ihs@comcast.net

read the section you mentioned at the cornell website. it pertains to
the u.s. and its environs but no mention of people outside territorial
limits.
the world is a bigger place then what the u.s. dictates....

This is so, but you asked specifically what right the US government had to set regulations, it was stated that if you were a US citizen, it was granted by the Constitution, and by treaty.

Further, the ITU does have worldwide jurisdiction, and they are the ones who write the treaties, and every country is a signatory.

the itu is good for somethings but when it comes to freebands they have

little or no enforcement capabilities.

I shouldn't have to quote this twice:

>>>>If you are a US citizen......

And again with emphasis added:

>>>> =IF= you are a =US=CITIZEN=......

If you are still confused, call Twistedhed's imaginary shrink.

It's a difficult question. Do we applaud him for wanting to go legal? Or do we slam him for ever having operated illegally? I have known former pirate radio ooperators whose behaviour on the ham bands after they got a licence was exemplary.

If they have already been punished in some way by the courts, then the answer to your query is (or should be) yes. If they have not been punished in some way by the courts, then, de facto, they have not been found guilty of any crime, and are to be presumed innocent.

It's our system of law.  They taught it to us in junior high school social
studies.  I know I'm getting old, but I don't think things have changed all
that much...

aor ar1000xlt wide range monitor
some of the specs include:
continuous coverage from 500khz to 1300mhz
10 banks of 100 channels - 1000 channels total
included with sale:
rubber duck antenna
guide to the ar1000xlt
wall wart
case
belt clip
original box

This unit is in very good condition and operates as it should.
I'd guess it was made in the early 90's.
It does not appear to have been used much.

WRT to "freebanding" within the US and its territories, all I can say is to
go
ahead and do it. If you get popped, you have only yourself to blame.

J

Nice rig, but why would anybody take a chance on a
castrated unit 2nd-hand when they could buy one NEW?

TRADE?
Would like to sell or trade the following items for something useful
and of comparable value (?!?):

Hallicrafters TO keyer
Systron Donner frequency meter (accuracy to 0.1 Hz!)
HP Office Jet FAX/scanner/printer (B&W + color)
Two boatanchor cabinets (one Bud, one unknown)

Motorola 10A/13.6VDC power supply
OK Industries solder rework station

I can send pictures and other info. What have you?

Email me direct (remove the NOSPAM).

Thanks and 73

Dan (K0DAN)

There is a major difference between Federal laws and the Constitution. The
references that you cite are NOT sections of the Constitution. Please
retake your civics and political science classes.

Brenda Ann wrote in message ...
>
>The UK Radio Authority is much more

>harsh than the FCC.

Sorry, but I have to disagree.

Even at the height of CB, when 100s of thousands of people were running illegal CB in one way or another, the yearly "bust" figures were just into double digits - it has remained in the 20s and 30s.

Most illegal CBers get ignored, some get a "Please don't do that" verbal warning, some may get a written warning,.
So, what do the very few big busts get... �1000s in fines? Prison?
No... a couple of hundred pound fine if any - and the illegal equipment snatched.

If the RA were "harsh", they would consider illegal CBers as "Pirates"... and give them the very large Pirate fine.   Those using Amateur illegally would be hunted down like dogs and given the punisment available under UK law - prison.

When nearly everyone was using illegal antennas, they changed the antenna rules to make those antennas legal.
When CBers were illegally using the American frequencies, they legalised the band for CB use.
When they wanted American CBs out of the hands of CBers, they made it legal for Amateurs to convert the sets to 10 Metre - so they would buy them from CBers, make them legal, and save the RA the bother of chasing people.

If they were harsh, they would have put "No DX" and "no talking to foreigners" rules in place. They would ban the import and sales of the illegal CBs marked as "Amateur". They would ban the ownership or use of Amplifiers that work on CB.
America does all those - The UK does none of them.
I would say that our CB service has very few rules, and enforcement only as a last resort.

A few years back, a group of people set themselves up as self-appointed CB police. They went around looking for CB antennas and CBers - sending a list to the RA, for them to catch the licence dodgers.
You would think that the "bust" figure would have shot through the roof - but the RA couln't be arsed to do the chasing.
They now plan to remove the licence next year - so reducing the amount of illegal CBers even further.

Regards,

Peter.

Hello all, I have a icom 756 i preformed the MARS mod but it did not
work. anyone else have this problem?
Also i installed the 223 ssb filter. turned it on in the menu. it does
show up on the main filter menu.But you can not select it, is this
normal? Did a CPU reset. Even tried the Gen coverage button still will
not transmit MARS.
Everything else works as it should.
Any help would be greatly appreciated.
Chris NI4L

I have for sale an as new AOR AR8200 Mark III B hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.
NO TRADES PLEASE
I can be contacted at n8ihs@comcast.net

Montgomery Wards Model: Airline 62-2500

BEAUTIFUL Montgomery Ward Airline 62-2500 floor model. AM and 6 to
18 MC shortwave. Works wonderfully after a good warm-up of an hour.
Seems I saw a label somewhere on the unit dated 1948. Tubes all check
out good. Replaced cracked AC cord. Rest is all original equipment.
$95 takes it. I would prefer pick-up, but will ship IF you are willing
to pay for a professional packing/mailing company to do the work.
(Probably run you around $60.) PLEASE CALL ME on this one to work out
details. It is a honey. (1.517.563.2613) 73 from Bill - WA8MEA ---

Hi,

I am selling the following as a package (will not seperate-sorry):

Yaesu FT-847 (HF, 6M, 2M, 70CM)
Yaesu FC-20 Tuner (HF-6M)
Heil GM-5 Goldline Microphone
Heil PL-2 Balanced Microphone Boom
Heil SM-1 Shock mount for boom mics
Heil FS-2 Foot switch
Heil AD-1 Cable (Mic to Radio)

I have original boxes. Equipment is in prestine condition, purchased new in May 2003.
I have stock mic for radio which obviously I will include.

Retail price for package is $3000 + taxes

I'm asking $2500 CDN.

Only selling because my wife returned to school, and therefor is not working full time.

If you are interested, please call 905-789-9405

Greetings:

I've got 5 YO-YO-VEE prototypes I'd like to sell at discount. I wouldn't feel right selling them as new, because we did take them out in the field and test them. So even though they look new, technically they are used.

Some of you might be asking; "What the Sam Hill is a YO-YO-VEE?" If you're familiar with the Yo-Yo-Tenna Deluxe being featured in Worldradio magazine, or on banner ads at QTH.com and Eham.com, we've taken THAT antenna and placed a Budwig center insulator in the middle to make Inverted Vee operation a lot easier. (Easy mental picture to make since we don't yet have a "real" photo available. B&W AND color photos of the "Deluxe" also available at our website.)

Our retail on this will be $39.95 plus $7.95 shipping when available after the holidays. I'm selling these VERY SLIGHTLY "used" prototypes for $29.95 each plus HALF the shipping: $3.97

You're more than welcome to call me or even use our secure online form at our website. BE SURE to mention YO-YO-VEE prototype for the product description.

Again, I've only got five of these. We had six, but gave one away at our local club meeting for a door prize. So first e-mails get them!

Tektronix is trying to manipulate the oscilloscope market. Today I learned from my local dealership that they are required by contract to destroy every scope which is traded in for a new Tektronix scope, regardless of age or condition. So if you decide to trade in that old scope for a Tektronix, know ahead of time that it is NOT going to end up in the hands of a ham, or of some kid learning and experimenting in electronics on a tight budget like I was thir... er, twenty years ago. No, Tektronix needs to raise their profits by destroying every used scope they can get their greedy little hands on, regardless of who feels the pinch!

Interesting, last I heard (and that was only a few weeks ago) the Tek
Country Store was still in business, selling their used trade-ins, among
other things. Could your dealer be blowing smoke up your behind?

I am looking for the web site that lists the prices of ham radio gear.
The site lists the low, average and high prices of gear. The guy who runs it gets the prices from several web sites over a 6 month period.
Does someone have the URL to that site?
Please either respond here or e-mail me.

Thank you,
Kirk Mohror

I have a 25-watt 2-meter mobile FM transceiver, with digital VFO tuning, backlit LCD, 12 memory spots + settable "call channel", 5-segment LED s-meter/output meter. It supports standard 6khz offsets, plus you can combine memory channels to do odd splits like for the ISS up/downlinks. It comes with the power cord and microphone handset. The handset has a DTMF tone pad and I've added an external microphone/PTT jack for use with a headset or packet gear. I have documented all of the features and controls because the manual is hard to find these days; I'll include doc's with the radio.
Model number is KDK FM-2033.

Feel free to make any offer. I won't be insulted by low offers; I just might not take them.

ygs6gk(NOSPAM)@Gee-Enginuity.com
(remove the obvious)

Thanks.

Was purchased from "original" screwdriver designer Mr. Mobile: Don Johnson, W6AAQ. Never used, comes with balun.
Sorry I misplaced the original packet of info---large and full of /mobile hints and kinks by Don.
Is an easy install to 3/8-24 thread, use of common sense.
Will ship from WNY via USPS at $115. New cost this ant $150 + 15 shipping.
Only needs a PVC coil cover to protect from moisture and dust, I'll toss in a toggle switch. Can't use it on my auto.
Yes--there 'may' be some better and probably some lesser quality out there.

Serial Number 8L551464 with MH-36C mike. Taken from van broken into by smashing glass in sliding door. Antennas left behind; maybe frightened off by traffic. Entry to friend's yard gained by lifting gate off hinges on post. Unfortunately both pivot hinges pointed upward. If one up/one down, might not have happened.

Man, that's terrible!
Deepest sympathies; the 2500 looks like a nice rig.

I'm sorry if I have offended anybody with my for-auction post, but at a
glance I can see at least six other "FA:" posts on this NG and nobody has

complained about any of them. Could somebody please explain what I have done
to warrant complaints from three different people?
As for "selling extra stuff", if the buyer is concerned about this, I will
list the item as a "buy-it-now" sale so that it will be covered by eBay.
I am concerned about how people view me both on eBay and the newsgroups, so
if you have an issue, please tell me what I am doing wrong so I can correct
it.

Greg -- the answer to your question can be found at the rec.radio guidelines
at URL:
http://faqs.jmas.co.jp/FAQs/radio/personal-intro

Sez: The rec.radio.amateur .equipment group is NOT the place for buying or
selling
equipment, that's what rec.radio.swap is for.

Guidelines say -- rec.radio.amateur .equipment is for Amateur Radio Hardware
and software discussions.

Many folks post their FS FA WTB WTD items on all the newsgroups which
really is poor practice.
The rec.radio groups are broken down into several categories so one doesn't
have to see the same posts in all the NG's.
Just a way to TRY and keep order out of chaos.

However, it doesn't work well as folks do what they darn well please.
Since the groups are unmoderated -- little can be done about those who spam
all rec.radio NG's
The "at least six other FA posts" you cited are not following the
guidelines either. Doesn't make it "right"

Most everyone I know reads all of the rec.radio NG's -- so why spam em all
and be out of context on most of them ???

I am not playing NG cop -- just answering your question.
Continue with spamming all NG's if you want,
but be prepared for some heat from the regular readers
who will tell you to post within the guidelines.

I'm not offended, but since you asked..... I get really tired of
seeing Ebay ads here. I know where Ebay is, and if I wanted to
buy anything from Ebay, which I don't, I'd go look there.

But seems like if anybody got offended by your Ebay ad, then
they'd get offended about 13 times a day reading this newsgroup.

Spurious Noise/VHFRadioBuff:
Thank you for your replies. I'm sorry for adding to the garbage pile here; I previously had not read the posting guidelines for the rec.radio groups, and seeing all the for-sale and for-auction ads, thought it was a generally accepted practice to post them on the "equipment" group. Spurious Noise, thank you for the link to the guidelines article; hopefully I'll make wiser posting choices from now on.

Thanks!

Oscar, eBay has contacted me explaining the issue. I have re-written the
description to comply with eBay policy and re-listed the item.
I appreciate your concern; this has been a learning experience for me (I've
always been at the buying end of these transactions!).

Thanks!

73 de KG6SGY

"To me", they can post a FA, FS, WTB, what every if it pertains to the group in which it's posted.

They are at least as on topic as about 50% of the discussions, probably more.

The groups have grown and changed as has the internet and Amateur Radio.

Although the "market place is, or rather, *should* be the best, If I'm reading the antennas group and some one has an antenna for sale, or is looking for one, it seems a suitable forum to me. Besides they are probably more likely to find some one interested than the people going to the "market place". Although I keep that group and occasionally visit, I am far more likely to see something of interest is it's placed on the groups I read.

I say this never having posted a FS, or FA on any of the newsgroups as far as I can remember.

Sorry 'bout that. I had to re-list the item because I offered additional items for sale (power cords) in the item description, which ticked eBay off.
New link:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3049697146

Thanks!

Thank God Ebay was informed and you were stopped by the netcops.
Never know what kind of long lasting damage you could have done by
offering power cords. Some scumbags have nothing better to do with
their lives!

I gotta tell ya that through my many years of Ebaying, the only times
I've been ripped off were when I bought amateur radio equipment.
Maybe some of those self appointed netpigs need to do something about
them instead of a guy trying to make a few bucks legitimately.

It has my sig, I don't know what the news reader did to the top.
There was no quoting, my post was the only thing there on mine.

FOR SALE

Atlas 210X with microphone.
Excellent solid state HF transceiver covers 80 through 10m SSB and CW.
One of the best receivers you can get. It has a minor modification
for driving a transverter by adding a BNC connector on the back
from the driver stage.
To restore to normal operation, simply reconnect wiring
inside. Easily restored to original condition. Comes with the manual.

Will sell for $125.00 plus shipping

http://cgi.ebay.ca/ws/eBayISAPI.dll?ViewItem&item=3050119779

TM-231A 2m band mobile transceiver
-50/10/5 watts adjustable output power
-runs on 12V, perfect for car or base station
-excellent physical and operating condition
-includes manuals (not pictured)

This unit features:
-CTCSS/PL tone encoding and decoding
-Background paging/channel monitoring
-DTMF mic for autopatch and worldwide Internet Relay Linking
-Packet Radio compatibility
-MARS/CAP enabled
-Out of band reception (136MHz to 174MHz)

Also throwing in:
MFJ-1724B Dual band 144/440 magnetic mount antenna
Brand new, and is listed by the manufacturer here:
http://www.mfjenterprises.com/products.php?prodid=MFJ-1724B
Antenna comes stock with 15' cable attached; will also include 10' extension.

73 de VA3CSG! Good bidding!

To be fair, the reactionary flavor of the 'netcops' is due to the @$$holes
who would flood the groups with constant 'For Sale' items, only to be
adverts to go to EBay to go look at their auction. Guys would flood
multiple groups, then give 'countdowns' to the auction expiration.

People were fed up and took a hard line attitude. And personally, I
agree with it.

You want netcops to police EBay? Do it yourself. You'll have your
work cut out for you!

Mike

And look at that... He got a pretty decent bid after all.

I have never had any good luck with a KDK anything but maybe someone else
will.

I have a PK232MBX for sale. This unit has been sitting in storage for a couple of years. I am the original owner and I have added the DSP daughterboard. I will ship with the original manual (in grey plastic binder), DSP addendum, cable to connect to PC and original box.

Note: There are some scratches on the top of the unit and it was working the last time it was powered up approx. 18 mos. ago.

Asking $100.00 or best offer.

Please email off list if interested, and thank you for your time.

I have for sale or trade a Kenwood TMV7 dual bander with 9' remote mounting kit and original packing, manuals, etc. I purchased this unit new from AES several years ago and had it in my car for about 2 years. It probably has a grand total of less than 50 hours of time on it.

You can get more info on the radio from the Kenwood web site, but basically it's a true dual bander (receives 2 bands at once), has a ton of memories, easy menu system, blue LCD face, and 5/15/50 watts out on VHF, 5/15/35 watts out on UHF, built-in duplexor, and tons of other features. This radio is unmodified. Asking $295 plus shipping or swap for something interesting of equal value (Drake R4C, old Swan gear).

You can contact me at jcamp2@cox.net.

Thanks and 73,
Jeff

I'm looking for 4 225 MFD 300 VDC capacitors. The ones I'm replacing are
Mallory screw mounted cans from a Swan 1200 amplifier. If you have a set
that you can do without, please email me at jcamp2@cox.net with your price.

Thanks and 73,
Jeff

I think you'll find a few free 200uF, 400V caps if you part out some old
monitors or AT-power supplies.

FOR SALE: Johnson Ranger Transmitter

75 watts CW and 65 watts phone on 80 through 10 meter bands.
Full metering of all functions, and built-in VFO.

Comes with the manual and an original sales information sheet.
Fairly good condition. Front panel looks excellent.
I would repaint the case, but it is not dented or beaten up.

Needs new AC power cord and the three long cabinet screws.
May require some additional repairs, but appears to be complete
and in pretty good shape.
Picture available

Available for $325.00 plus shipping

(Remove the NOSPAM to e-mail me!)

I have for sale a nice Yaesu VX5R tri band HT with 2 Yaesu FNB58Li batteries, SU-1 Barometric Pressure option, MH-34 Speaker Mic, and original manual, box, and standard options including the 6 meter antenna extension, the NC-72B wall charger. This is the Black one. I have the original 2001 sales slip from the Ham Station. The radio works great. It looks good. Some minor wear around the edges of the case of the ht. Front panel looks great.
Price is $225 shipped in lower 48.
Thanks, Charlie Hugg, K5MBX

I have for sale a new Yaesu FT-8100R Transceiver. I got it from the original owner, an elderly fellow who purchased it awhile ago and never applied power to it. He told me that it was just too small. The Yaesu FT-8100R is a dual band (VHF/UHF) mobile radio. Radio is in 100% New Condition (10 out of 10). I used it for about one hour to check it out. The 8100R does cross band repeat. It runs 50 watts on VHF and 35 watts on UHF. The recieve freq. for the 8100R is 110-550 MHz & 750-1300 MHz. (cellular blocked). This radio is capable of recieving v/v u/u or v/u. Included is the mobile mounting bracket, original manual, circuit diagram, original sales receipt,and MH-36B hand microphone w/DTMF keypad,power cable,accessories packet, etc. Price is $295 shipped in Lower 48, Thanks, Charlie Hugg, K5MBX

You are right, you are insane.

There is hardley any existant demand for 'museum quality' Xmitter equipment.
I've tried to rid two of our stations of some quality RCA Xmitters when we
replaced them with Nautels.

We attempted to sell them to collecters, no go. No one wanted them for anything other than back-up. One went for $500. the other for $575.

If you can get $2,900.00 then you found yourself a sucker.

I have for sale an as new Icom IC-746Pro with the matching Icom PS-125 power supply. I am the original non smoking owner of this equipment. This radio has only been used a few hours after getting it and then put back in the box where it has remained ever since. I would also consider trading for a Drake R8B receiver with VHF converter in equal condition. I am asking $1,175 shipped CONUS.

73's
Dean

Still cleaning out my storage and found another treasure. It is the Hallicrafters SX-117 Receiver. This radio looks great, shinny knobs, beautiful face plate and cabinet but it doesn't work. I took it on a trade a number of years ago but never got to this project. The tubes light and all the dial lights work. I remember that when I first got it I was able to hear very weak signals on some bands and even its own crystal calibrator. It still comes on but I didn't put headphones or an antenna on it today.   I just need to find a good home for it. I will take the best offer over $50 plus shipping from zip 28139.

I have for sale an as new Icom IC-746Pro with the matching Icom PS-125 power supply. I am the original non smoking owner of this equipment. This radio has only been used a few hours after getting it and then put back in the box where it has remained ever since. I would also consider trading for a Drake R8B receiver with VHF converter in equal condition. I am asking $1,150 shipped CONUS.

73's
Dean

I have a Kenwood TS-940 ST in good condition that I would like to swap for a radio capable of working satellites on 2m/430. The 940 is used regiularly and is excellent operating condition. It has a few scratches and scrapes here and there, but none on the front panel. Also included is a Kenwood SM-220 station scope. It does not have the BS-8 panadaptor option. I'll also throw in a Kenwood MC-60 amplified desk microphone. It has the original manual, which has been laminated and re-bound. The SM-220 manual is a copy.

I'm interested in a Yaesu FT-847, but would consider an Icom 275H/475H pair, a Kenwood TS-790 w/1.2 GHz, or an FT-736 w/1.2 GHz.

You can reach me by email at jcamp2@cox.net.

Thanks and 73,
Jeff
N0WJP

The manual is for the TS-940, not the microphone. If you would like to hear this radio on the air, I'm on the 1721 group just about every night between 9:30 and 11:00 PM central time. The frequency is 7.280.5 until about 10:00PM, then we switch to about 7.260.5.

Thanks and 73,
Jeff

FOR SALE:  Johnson Ranger Transmitter

75 watts CW and 65 watts phone on 160 through 10 meter bands.
Full metering of all functions, and built-in VFO.

Comes with the manual and an original sales literature.
Good condition. Front panel looks excellent.
I would repaint the case, but it is not dented or beaten up.

Has a  new AC power cord. Needs the three long cabinet screws.
May require some additional repairs, but appears to be complete
and in pretty good shape.

Picture available at:
http://home.cfl.rr.com/happysurfer/radios.htm

Available for $325.00 plus shipping

(Remove the 'NOSPAM' to e-mail me about this)

I have for sale an extremely mint Icom IC-746PRO with the matching Icom PS-125 power supply. I am the original non smoking owner. The radio and power supply were only powered up for a few hours of mostly monitoring and then put back in the boxes where they have remained ever since. I am asking $1,150 shipped CONUS only.

73's
Dean

I recently swapped my old radio for an MT2000. I thought I had the RSS
software for it, but don't. If anyone could help me with the software, I'd
appreciate it.

I have the RIB and cables .. just need the actual software for it.

Thanks in advance!!

I have for sale an extremely mint Yaesu VR-5000 wide band receiver. The following options have been installed:
FVS-1A - Voice Synthesizer
DSP-1 - DSP Unit
DV-4 - Digital Voice Recorder

I am the original non smoking owner and have all of the boxes and paperwork that came with the radio and the accessories. This receiver has seen very little use and has been covered.
I am asking $575.00 plus shipping from 48026.

Motorola will be happy to sell you the appropriate software if you will execute their license agreement and pay up. I recall it runs about $270. This will work a lot better than risking the wrath of mother 'M's lawyers (yes, they can and will go after individuals or large corporations alike -- it makes not the slightest difference to them if they think their sacred-cow RSS is at stake).

If you just need a programming job, I can also help. Assuming you're planning to program all 160 channels, it'll probably run you between $40-$50, ground shipping included.

MAKE MONEY FAST WITH ONLY $6.00. THIS REALLY WORKS! Make from $20,000 to $50,000 in as little as 4 - 6 weeks with only an initial investment of $6, by using a simple secure internet account called Paypal that takes only a few minutes to join and get started. Sign up for a FREE paypal account by clicking on the link below. https://www.paypal.com/mrb/pal=H6MNNZW27Y8D4 I�ve actually taken the 10 minutes it requires to join this wacky bunch of optimists and I�m hoping that there are others out there that will spare the change to try this. READ ON. I found this on a bulletin board and decided to try it. "A little while back, I was browsing through news groups and came across an article similar to this that said you could make thousands of dollars within weeks with only an initial investment of $6.00! So I thought, "Yeah right, this must be a scam", but like most of us, I was curious, so I kept reading. Anyway, it said that you send only $1.00 to each of the 6 email addresses stated in this article. You then place your name and address at the bottom of the list at the #6th position and email it to your friends as well as post this message (with your email address in the list) to at least 200 newsgroups. (There are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured "what have I got to lose except $6.00, right?" So I invested the measly $6.00. Well GUESS WHAT!! Within days, I started getting money coming into my Pay Pal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00 which means that 25 people joined the group after they saw my posted messages. By the end of the second week I had made a total of over $1000.00! In the third week I had over $10,000.00 and it�s still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it�s still coming in rapidly. It�s certainly worth $6.00, and the few minutes it took to join Paypal. I have spent

Easiest Way To Make Money! Turn $6 into $6000!

MAKE MONEY FAST WITH ONLY $6.00. THIS REALLY WORKS! So I invested the measly $6.00. Well GUESS WHAT!! Within days, I started getting money coming into my Pay Pal account! I was shocked! I figured it would end soon, but the money just kept coming in. In my first week, I made about $25.00 which means that 25 people joined the group after they saw my posted messages. By the end of the second week I had made a total of over $1000.00! In the third week I had over $10,000.00 and it�s still growing. This is now my fourth week and I have made a total of just over $42,000.00 and it�s still coming in rapidly. It�s certainly worth $6.00, and the few minutes it took to join Paypal. I have spent more than that on the lottery! Let me tell you how this works and most importantly, why it works. Also, make sure you print a copy of this article NOW, so you can get the information off of it, as you need it. I promise you that if you follow the directions EXACTLY, that you will start making more money than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (Print it out or download it.) Follow the simple directions and watch the money come in! It�s that easy. It�s legal. And, your investment is only $6.00. IMPORTANT: This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk- it really works! If all of the following instructions are adhered to, you will receive extraordinary dividends. AGAIN, PLEASE NOTE: Follow these directions EXACTLY, and $20,000 or more can be yours in 4 to 6 weeks. This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. In this business your product is not solid and tangible, it�s a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay big bucks for quality lists. However, the money made from the mailing lists is secondary to the income which is made from people like you and me asking to be included in that list. Here are the 4 easy steps to success:

STEP 1: Take a few minutes to join Paypal. https://www.paypal.com/mrb/pal=H6MNNZW27Y8D4 The Internet's most trusted Internet banking system for your future income. When creating your Paypal account make sure you use the same Email address as your user name in the list below so people can send money to your account.

STEP 2 Once you have a Paypal account running, use Paypal to post $1 to EACH of the 6 Email Addresses below because you pay people with an email address in Paypal. To do this you may need to use a credit card, which is very easy, and secure so nobody but Paypal may see it. If you don�t have a credit card show this great lucrative offer to someone that has one and get them to help you pay the $6. What you are doing is creating a service. This is absolutely legal! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. But I looked around and did some homework and found it was perfectly legal. Here are the 6 individual Email addresses that you have to send $1 to through Paypal for this to work properly and for you to receive money. (If you don't send the money and decide to post the message with your name in it anyway, Paypal will instantly pick this up and terminate your account. If you did this you could get into serious trouble because it is fraud. So follow the instructions and post the $6 and you will make lots of money with no hassles.)

1) jordanron4@aol.com
2.) melindabarrera@tiagris.com
3.) caper1974@lycos.com
4.) michaelance22@Yahoo.com
5.) jamartl@aol.com
6) tonymel_13@shaw.ca

STEP 3 Now take the #1 Email Address off the list that you see above, move the other Email Addresses up (6 becomes 5, 5 becomes 4, etc.) and add Your Email Address as number 6 on the list.

STEP 4 Change anything you need to, but try to keep this article as close to the original as possible. Now, post your amended article to at least 200 newsgroups (there are thousands of groups). And email your message to as many people you can. But remember, the more you post and email the more money you make! This is perfectly legal! If you have any doubts, refer to Title 18 Sec. 1302 & 1241 of the Postal lottery laws. Keep a copy of these steps for yourself and, whenever you need money, you can use it again and again. PLEASE REMEMBER that this program remains successful because of the honesty and integrity of the participants and by their carefully adhering to the directions. You are simply paying into a money making chain of participants and if the chain is broken you are screwing someone else out of their fair share. So, as each person who joins the family and the directions are followed, six members will be reimbursed for their participation as a List Developer with one dollar each. You then insert your Email Address into the list and it will move up geometrically so that when your name reaches the #1 position you will have potentially received thousands of dollars in your account!!! What an opportunity for only $6.00 ($1.00 for each of the first six people listed above). To begin, please send you're joining fee now and then add your own Email Address to the list and you�re in business! HOW TO POST TO NEWS GROUPS Use Netscape or Internet explorer and try searching for various newsgroups (on-line forums, message boards, chat sites,

discussions.) Log on any search engine like yahoo.com, google.com, altavista.com, excite.com, etc., then search with the subject ''millionaire message board'' or ''money making message board'' or ''employment message board''or ''money making discussions'' or ''money making forum'' or ''business message board'' etc.You will find thousands & thousands of message boards. Click on them one by one and you will find the option post a new message. Post this article as a new message by highlighting the text of this letter and selecting copy then paste from the edit menu. Fill in the Subject, this will be the header that everyone sees as they scroll through the list of postings in a particular group, click the post message button. You're done with your first one! Only takes about 60 seconds to complete postings on message boards after you catch on. REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE MORE MONEY YOU WILL MAKE!! BUT YOU HAVE TO POST A MINIMUM OF 200! That is it! You will begin receiving money in your account from around the world within days! JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT. Now the WHY part out of 200 postings Say I receive only 5 replies (a very low example). So then I made $5.00 with my name at #6 on the letter. Now, each of the 5 persons who just sent me $1.00 make the MINIMUM 200 postings, each with my name at # 5 and only 5 persons respond to each of the original 5, this is an additional $25.00 for me. Now those 24 each make 200 minimum posts with my name at #4 and only 5 replies each. This brings in an additional $125.00. Now those 125 persons turn around and post the MINIMUM 200 with my name at #3 and receive 5 replies each, I will make an additional $625.00. Ok, now here is the fun part, each of those 625 people post a MINIMUM 200 letters with my name at #2 and they receive 5 replies each. That just made me $3,125.00!!! Those 3125 persons will all deliver this message to 200 newsgroups with my name at #1 and if still 5 persons per 200 react, I will receive an additional $15,625.00!! With an investment of only $6.00!! AMAZING! When your name is no longer on the list, you just take the latest posting in the newsgroups, and send out another $6.00 to Email Addresses using Paypal on the list, putting your name at number 6 again. And start posting again. The thing to remember is that thousands of people all over the world are joining the Internet and reading these articles everyday. JUST LIKE YOU ARE NOW!! So, can you afford $6.00 to see if it really works?? I think so! People have said, "what if the plan is played out and no one sends you the money? So what! What are the chances of that happening when there are tons of new honest users and new honest people who are joining the internet and newsgroups everyday and are willing to give it a try? : Anyway, it is only $6.00 for a chance at thousands. Estimates are at 20,000 to 50,000 new users, every day, with thousands of those joining the actual Internet. Remember, play FAIRLY and HONESTLY and this will really work. There's no use trying to cheat for only $6.00 *** Please use only opt in resources for this material, it will work for you and it works much faster without soliciting or spamming and higher responses***

YOUR MOMMA IS THE ONE MAKING MONEY IN YOUR FAMILY.
I JUST SAW HER RUNNING DOWN THE STREET WITH A MATTRESS
ON HER BACK, LOUDLY YELLING "CURB SERVICE"

JUST MY OPINION OF YOUR FAMILY FINANCIAL PLANNING

I have for sale an extremely mint Yaesu VR-5000 wide band receiver. The
following options have been installed:
FVS-1A - Voice Synthesizer
DSP-1 - DSP Unit
DV-4 - Digital Voice Recorder

I am the original non smoking owner and have all of the boxes and paperwork
that came with the radio and the accessories. This receiver has seen very
little use. I am asking $550.00 plus shipping from 48026.

I have a Tick II and failed to find any data sheet for it. I had previously hooked it up to an old portable phone battery 3.6v and wondered if it could be connected to a 5v src.

Also any links to Embedded Research, schematics or operating instuctions would be helpful.

Thanks N7UJU

Hello there,

I'm looking for used CSI Brand LTR (trunking) controllers you may want to
sell or trade away. The specific models are the 4200 and 4900 units.

If you have a TP-163 tone panel, I'd also be interested in talking with
you to sell or trade.

Email me off the www.radiowrench.com web page and I'll get right back with
you. You can also take the NOSPAMPLEASE out of my Email header below to

contact me.

thanks
skipp

skippNOSPAMPLEASE@pilotNOSPAMPLEASE.ucdavis.edu

http://www.radiowrench.com   has an Email icon that works well.

cheers...

To bad, your loss.
By the way, this was sold (yes, SOLD) on ebay MANY months ago!
Why is it still around??

Anything with FA is ignored.

```

I have for sale a new Icom hard cover 756PRO II log book for sale. The inside cover of this log book has a signed color picture of the President of Icom. The front cover has the Icom name embossed on it. The hard cover binding has a simulated leather look. There are 40 heavy weight pages with each page having a 25 entry capacity. The last 2 pages has the DXCC entities list.
I am asking $20.00 plus shipping from 48026.

73's
Dean

Motorola Spectra UHF Was 175.00 Now 155.00   While they last!!

Good Display and Receive works GREAT and Transmit also works GREAT!!
Now thats a deal!

Motorola Spectra Transceiver UHF Its on 450 MHz now. Model #
D44KMA7JA5BK Range 3 40Watt Comes with Motorola [wire cut]
Speaker
/Microphone/Bracket for radio/Power Cord/Accessory plug/
Scan and alphanumeric diasplay and also do MDC-1200
PTTID Also PL/DPL/etc

Its a 450-482MHz Dash Mount Transceiver. 128 Channels A5 Head
PriceWas175.00   Now 155.00  As Stated Works GREAT!!!

Have about only 9 or so left!!
Will not be Dead on arrival!!

Motorola Spectra UHF Was 175.00 Now 155.00   While they last!!

Good Display and Receive works GREAT and Transmit also works GREAT!!
Now thats a deal!

Motorola Spectra Transceiver UHF Its on 450 MHz now. Model #
D44KMA7JA5BK Range 3 40Watt Comes with Motorola [wire cut]
Speaker
/Microphone/Bracket for radio/Power Cord/Accessory plug/
Scan and alphanumeric diasplay and also do MDC-1200
PTTID Also PL/DPL/etc

Its a 450-482MHz Dash Mount Transceiver. 128 Channels A5 Head
PriceWas175.00   Now 155.00 As Stated Works GREAT!!!

Have about only 9 or so left!!
Will not be Dead on arrival!!

I have for sale a Kenwood TS-940S/AT in good condition. It has been used daily for quite some time. There are a few scratches along the top front, but none on the face. Everything works very well -- full output on all bands and the receiver is exceptionally good. The original manual is included. The previous owner laminated the manual and rebound it. Also included is a Kenwood MC-60 amplified microphone and a Kenwood SM-220 band scope (does not have the BS-8 panadaptor option). A rough copy of the SM-220 manual is included. Asking $825 plus shipping from 68132 or will consider a reasonable offer.

If you would like to hear this radio on the air, email me and we can arrange for a demo in the General section of any band except 160. Please contact me at jcamp2@cox.net.

Thanks and 73,
Jeff

If you have any dealings with this clown be warned, if he will if
excited, email all sorts of porn to you and your families email
addresses. A few unfortunate hams have had dealings with this person
and got the dose of porn dumped on them. YOU HAVE BEEN WARNED!!! Good
Luck to us all!

I have for sale an as new AOR AR8200 MarkIIIB hand held receiver. This is the latest offering from AOR in the 8200 series. This is a wide band receiver that covers 500 KHz to 3GHz cell blocked. It has 1000 memory chanels and is all mode including super narrow FM plus wide and narrow AM in addition to USB, LSB, CW and standard AM and FM modes. This radio has a total of 30 minutes of monitoring on it and then packed in the box. I have the box and all manuals and standard included accessories that came with the unit. I will also include the optional soft case with this radio. It is a 10 out of a 10 electronically and cosmetically. I am asking $475.00 shipped CONUS.

NO TRADES PLEASE

I can be contacted at n8ihs@comcast.net

I have a flawless FT-1000MP Mark V Field for sale. I am the original non smoking owner. This radio has been used very little. It is a 10 out of a 10 electronically and cosmetically. I have the box and paperwork plus all of the standard included accessories. I also made a copy of the owners manual and put it in a hard binder so I wouldnt ruin the original. I will also include the technical overview manual to the FT-1000MP MK V Field. I am asking $1,500 plus actual shipping charges from 48026. I can be reached at n8ihs@comcast.net
73s
Dean

I have for sale a SBE Sidebander II, Model 121CB/T, 23 Channel Transceiver
that has been converted to the 10 Meter Ham Band. It covers 28.510 to
28.800. It has a Clarifier that provides for coverage in between channels.
This rig  runs 12 Watts PEP. It works on LSB and USB and AM. It comes with
the original SBE hand Mic, the Mobile Mounting Bracket, the Power Cord. It
has an effective Noise Blanker. The transceiver looks and works great.
Price is $35 and I will split shipping costs. Thanks, Charlie Hugg, K5MBX

I am interested in expanding my freeband hobby but do not wish to take t
he General class hammie test until the code is dropped. My question is d
oes anyone know when the code will be dropped and how long woould I need
 to wait until the written General test is simplified such as the Tech t
est is now?

Plase email me a WAV of morse code so I can hear what it sounded like wh
en the old hammies used it.

The future of the code is still in limbo, and could be resolved in several months, or years. As far as the written, it is about as easy now, as it ever has been.

Organized, long term freebanders are very aware where they
operate and take great measure to ensure against talking on an amateur f
requency or one that isn't heavily used on the freeband.
If the non-U.S. stations can operate ssb there, why shouldn't I,
especially if I want to have a nice DX contact with one of them?

Many of us LIKE the law as it is, it keeps "yes men" off the freqs. Same
analogy as the gun issue...when guns are outlawed only
outlaws will have guns...no, yoo won't find many freebanders lobbying fo
r change to open the freqs because the law as it reads, doesn't bug us.

No rationalization is even needed except to reply to folks
that repeatedly ask over and over, "Why?" It is these folks
that feel they need a reason why we do what we do, not us.

I've been a so-called "freebander" since the late sixties but rarely for DX. The primary reason I talked outside of allotted frequencies was for privacy or to contact a specific distant station I wouldn't normally hear on the allotted band. We used to run Ch. 16 -5khz down and 15A a RC Channel running slightly above stock power on 3-4 element directional and easily talk 75-100 miles. I spoke all over the world with better than 1000 confirmed QSL contacts from a slightly peaked Golden Eagle Mark III/IV running through a 4 beam element at 60 feet from Central NJ.

I will probably be dropped soon, but the FCC has to go through standard procedures with all the pending petitions. The international requirement was dropped on July 5th, so by next July it should probably be gone in the US.

actually a good point. if i were to use the freq's the u.s. gov said i can
then what is the problem with slipping +/- 5kc's between 'channels'? is
that freebanding?
better yet, who the hell is the u.s. gov to tell me what is legal or
not? if i were to float out to bermuda and xmit would i be freebanding
there? do our friends to the north and south really care what the fcc
says what americans can/cannot do? not likely....

The frequencies that the US govt. says you can are those specific frequencies that constitute the 40 standard CB channels. The distance away from the center of any channel is tightly regulated, and you can't be more than 0.005% away from that center (~1.3 KHz), which is actually pretty broad when compared to say, broadcast AM, which is only allowed a 20 Hz leeway).

> better yet, who the hell is the u.s. gov to tell me what is legal or
> not?

If you are a US citizen, they are granted that right by the constitution, and by treaty.

if i were to float out to bermuda and xmit would i be freebanding
> there?

You would then be under the jurisdiction of whatever radio authority covers Bermuda. Aren't they a British colony? The UK Radio Authority is much more harsh than the FCC.

do our friends to the north and south really care what the fcc
> says what americans can/cannot do? not likely....

Actually, yes. The treaties for use of various frequencies are there to protect all the various countries that are signatories to them. The Canadians are pretty hard on pirates (though they also have some rules in place to give greater latitude on some bands than we do). I don't know what communications law is like in Mexico, but I imagine that they deal with people operating out of band/off channel too.

There are international treaties also that regulate such things. So just
floating out to Bermuda doesn't help.

that is what the u.s. gov proclaims. my point is they have no say so
outside territorial waters. whether or not the gov abides by itu
standards on this matter is open.

treaties not withstanding have you heard 10 & 11 meters recently? the
developing world is looking for the cheapest way to communicate with
their expatriates (sp?) in the u.s. one way to do it is using a setup
that after an initial outlay for equipment is basically free. their
problem is propagation not the gov.

just make it worse for every body next thing you know
they'll require a digatal id on all transmitters or they'll be
terrorist and arrested without due process.

Looking for reasonably priced NC-183. It doesn't need to work - I can fix but would like to find one that's not too beat up physically and has its knobs. It doesn't matter if its dirty and dusty- I enjoy cleaning. I don't care if it's the single or double conversion "D" model- either is fine. Email me with what you have. thanks, dave austerman, n5wnm

Please let the rest of us know where we, too, can pick up that radio for $25.   I'd like to have a few more, myself!

Ed

My first radio as a kid in the mid-1960s was one my father bought for me -- a Lafayette Explor-Air kit radio. He built it, and I used it well. It was a three-tube regenerative unit for AM and three SW bands. It was Lafayette model KT-135, and it looked like this:
http://hometown.aol.com/kc0imn/explorair.jpg

Osterman prices it $25-35 (Shortwave Receivers Past & Present, p. 255). There's another pic there as well for those who have the book.

I would very much like to acquire one unit, working if possible (although I would be happy to acquire one even if not), to present to my father at an anniversary event in December 2003. I will pay $100 plus shipping to anyone who has one they're willing to unload.

Thanks very much!

Sorry about ur brother....I also had a Knight-Kit T-50. I now have another
one, and it works great.   I'm rebuilding my Novice/1st General Station.

I figured you left a number out.... just didn't really know what the number was. Your figure, $265, is the same price Gigaparts is selling them ...... you may pay some shipping, but you get a warranty.

Perhaps obviously, ebay is your best bet. I've seen quite a few there over the years.

Hi all I am after some parts for the Icom M-800 HF Marine Radio

I need a remote controller unit with all the leads and I need another set of connector leads and a mic Oh and the proper DC Leads :0)

does any one out there have any of these parts or any contacts for these parts ????

I have two Radio bodies and one controller but no connector leads or mics ..

The controller part number is EX-803 Remote Controller
DC Power cable for Controller 12v-1 amp OPC-089A
Interface Cable for Controller OPC-172A

Main Unit Power Cable 12v-30 amps OPC-077

Also is there a mod available to get general coverage TX ???

Please feel free to reply to my email.

maleaton@bigpond.net.au

My Kindest Regards to the Group.

73 De VK3UME

Mal

I have FS a very nice Yaesu FRG-7000 Communications Receiver. This receiver sold for around $600 when new and was the upgrade to the FRG7. It has a digital frequency readout and a digital 24 Hour clock. It works and looks great. It is very stable and receives SSB exceptional well. Price is $275. Thanks, Charlie Hugg, K5MBX

I am staring as I type, at the Heath GR-54 my late brother and I built
together while in high school in the 60's. We passed it back and forth for
nearly 40 years, and I'm glad it was in my possession when he passed away in
'94.

I have for sale a very nice condition 51J-2 receiver. The front panel is cosmetically about a 9 of 10 and not a repaint. The receiver has the correct band change knob and meter but no top cover. The receiver has the Lankford product detector mod and performs GREAT. Pictures available to interested buyer. $450 plus shipping from 76001.

> The Ham Station in Evensville, Indiana has the NC-183-D for sale in
> their used section. $100 or best offer.

I would be leery of that one. They have a National NC98 further down in the listings with its matching speaker for $250 (and that is WAY too much). The point is that the 183D might be a basket case they are trying to get rid of and will accept a below maket price for it. If the 183d was working properly or was restorable, they would be asking over $200 for it without the speaker. Matter of fact, the more I look at their 18d3D, the more it looks like a parts set.
Just an opinion.....
rgds,
Mark S.

This ICOM IC-7100 scanner is in mint condition, perfect working order, no cosmetic blemishes. It has many powerful features and can be controlled very effectively through a PC with the addition of the CT-17 Serial Interface, which I also have listed for sale. The unit comes with power cord and original manual.

This ICOM SP-20 speaker is in mint condition, perfect working order, with virtually no scratches or cosmetic blemishes.

The ICOM SP-20 is designed for use with a wide variety of communication equipment. It is equipped with four separate audio network filters for maximum control of the audio characteristics of received signals. It also features two audio input jacks (3.5 mm mini jack). Input A or B may be selected from a switch on the front of the speaker. There is also a Speaker On/Off switch and a 1/4 inch headphone jack on the front panel.

One CT-17 connected to a standard RS-232c PC connection port can simultaneously control four different receivers/transceivers from a single PC.

This CT-17 is in mint condition. I have included in the sale the power supply and a serial interface cable. Both of these items did not come in the original package from ICOM, for some unknown reason.

Sell it on eBay and get $250.00 to $280.00 for it but don't take anything
less then $250.00 if you have the programing cable and software for it.

I am subscribed to rec.ham-radio.swap and rec.radio.amateur.swap and
they seem to be the same thing.  Which one should I delete?

Take your pick. I prefer rec.radio.swap   It seems to have many more
posts. YMMV.

I'm looking for a Swan Mark II amplifier for my collection.  If you have one
that you'd like to part with, please email me at jcamp2@cox.net.  I'd like
to make a deal for cash or amateur gear or a combination of both.  I'm also
looking for a nice 700CX if you have one of those you'd like to get rid of.

Thanks and 73,
Jeff

: Burb........ Driftronix CB set with amature bands

In reality, the actual drift from cold start to full warmup was not bad.

There were a number of us adding special reverse temp caps which kept the drift within 1khz, not too bad.

It is/was an Amateur Radio with CB band receive capacity.

KLM 70 WATT 2 METER LINEAR AMPLIFIER
This is a KLM 2 meter linear amplifier in great condition . It takes 10 watts in (5-15 input) gives you approximately 70 watts out!

I tested this amp last night and it was working perfectly. I used it for several years on an occassional basis but I now have a 55 watt rig in the shack and am getting a 100 watt satellite rig so I can't use it any longer.

Here is your chance to get a nice amplifier for your mobile or base station. 8 amps 12V DC 6.5� X 10� X 2� simple "IN/OUT" operation.

Wt. 5 Pounds from 97035 Zip Code

Will accept MO or Paypal. Would reluctantly accept personal check with 10 day delay on shipping.

Paypal preferred.

"Dave Munroe" <DaveMunroe2003@yahoo.com> wrote in message
news:acec502.0308050806.6b5b4584@posting.google.com...
> Dean,

Does he know what he's talking about Dave?
<<In part of the message By.   Spongeboy Bucketmouth>>
>>false promises and exaggerated claims, religion.<<

(None of this had ever been a $ thing, or at least not when it began.)
Politicians use it for power, they will use anything they can find to get
their way. Speak of the devil, I'm almost there if I wanted
To run for anything. (But I don't want to end up on the dark side of this
thing.) The Wars of this thing are here, and you have to ask yourself,
What Side Do I Want To Be On.
Don't you think it's at least a little strange that everything that's
happening today is in the Bible? Written 1000s of Years Ago.
Everyone is starting to dumbly follow everything the UN Says to do. This
would be the beast the Bible says that
Everyone starts to follow.
And there's also the chip they want to put in our heads or in our right
hands. The speed of this chip is 6.66Mhz, but when a computer starts
working with it, or runs programs on it, the computer takes the (.) and
turns it to numbers kind of like this. 010001101010 and the number
Becomes 666
But I forgot, your a pure atheist, and none of this will make any sense to
you.

Dennis E Strausser Jr   (Raichu!!), don't fear my electric : I won't use
it if I feel safe.

Please see my Drake TR7 Transceiver up for auction, ending today. This is a
nice late SN unit that has been gone over by John Kriner, the Man
Electronics. It has all of the filters, the latest mods and looks and works
great. See at:

rec.radio.amateur.equipment:45427 rec.radio.amateur.swap:4663
rec.radio.amateur:5700

I'm taking my Technician-class exam soon, and am going to be needing a
radio.
I have very little money available to invest in this, so I was
wondering if somebody had one they didn't need and could sell for
cheap.
A simple 2-meter transceiver will work fine for me; I've heard it's a
popular band. However, a multiband one would be nice...
I've only got about $50 max to spend here, maybe a tiny bit more. I'd
be willing to build or scrounge up some pieces, e.g. speaker box,
microphone, antenna, cables, etc. so if it's missing a few
accessories, that's OK.
Can someone help me out?

Thanks!
-Greg Courville

I have a nice older radio in good condition that I could sell you for $50
plus shipping. Shipping to San Jose shouldn't be much at all. E-mail me, the
mail's good.

I have a Bencher BY-1 in excellent condition (the "Bencher" sticker looks a little worn) that I recently swapped for and I don't use. I am trying to get back into CW and I think I would be better off jumping back in with a straight key.... SO

The BY-1 is not wired, although I have the adjustment wrench and phono plug for it. I do not have the original box nor any written material.

If you have a Good straight key in Good condition that you would like to trade, please contact me off list.

Thank you.

 Wow thats a big picture there. Double WOW to the price on those green
laser pointers. Why do those things cost so much Mitchell?

I will be bringing some nice boatanchors to the Huntsville Alabama hamfest this weekend:
Heathkit HA-10 Warrior 1KW H.F. amplifier
Heathkit RX-1 receiver with matching speaker
Heathkit DX-40 transmitter
Heathkit VF-1 VFO
Also a Swan Cygnet Model 260 SSB transceiver.
All these items will be for sale or trade for newer HF equipment.
SEE YOU THERE!

First you people complain that his price was too high.

Now because he is posting several times.

You really need to find a new hobby.

I have a SignaLink SL-1 for sale that has only been used to decode, never transmit. It is in excellent condition and comes with an un-terminated connector (RJ45 on one end, open on the other), jumper wires, the original manual and original box.

Asking $30.00, you ship.

Please contact me off list if interested.

I have a mint with box, manual, antenna, software / serial cable, BC780XLT.
Has never left the desk. Photos upon request. I need the money for another
radio purchase. Paypal best way. Buyer can pay exact shipping from 32780

Thanks

Come on over to the Gainesville Texas hamfest this saturday! Flea market
opens for early set-up at 5am saturday morning and general public is in at
7am!
All you radio operators in north Texas and Southern Oklahoma load up all
your unused radio gear! There will be indoor tables for $10.00 and outdoor
tailgating will be a mere $6.00
The location is the Gainesville civiv center which it located right off of
I-35 at the California Street exit on the west side of I-35 directly behind
the Taco Bell.
Talk in is on 147.340 or 442.775.
Let's make this a great event! COME ON DOWN!

I have two unused forty foot lengths of aluminum irrigation tubing I need to unload. One is 4" in diameter and the other is 3" in diameter. Wall thickneses are around 0.060". A number of years ago I built several fullsize 40M yagis for fellow club members and I used this tubing for the booms, etc. I've been storing these "leftover" tubes ever since but now I have to either find a home for them or scrap them. I'll give them away gratis to anyone who will pick them up. The 4" tube would make a nice light-duty easy-up guyed tower for instance. The location is Clifton Heights PA in the southeastern suburbs of Philadelphia. E-mail to w3rv <kelly@dvol.com>

August 2003

Dear Amateur Radio Club Members,

As summer fades and we anticipate a return to the rigors of fall, you will be reinvigorating Amateur Radio club operations in your communities. But before you club launches its activities, I hope you can take a moment at your next meeting and consider a disturbing and critical topic - Broadband over Power Lines (BPL).

BPL is a devastating threat to the Amateur Radio spectrum - especially the HF bands. There has been a lot of publicity on this issue - articles on the ARRL website (www.arrl.org/bpl <http://www.arrl.org/bpl>) and other ham radio sites. Your ARRL is at the forefront of the campaign to defeat BPL and will continue to work tirelessly to protect your Amateur Radio bands. And you can help.

This summer individual hams - and clubs - have responded generously to fund ARRL's efforts to fight BPL, and have filed comments to the FCC. But we still need to raise an additional $55,000 to fund the field measurements and document filings necessary to defeat this threat. We're all in this effort together, so I hope your club will jump on the bandwagon and support the campaign financially. We've received club contributions ranging from $50 to $2000. If your organization has already made a donation, thank you.

And if your club is considering a contribution, I hope you'll do so right away. With a contribution of $100, $250, $500 or more, your club can join the roster of clubs that are joining the effort. Your commitment will make a tremendous difference. And we'll put a list of contributing clubs on the ARRL website this fall as our way of saying thank you.

If you need more information on BPL for your club, go to the ARRL website (www.arrl.org/BPL <http://www.arrl.org/BPL>) for the full story, including copies of the two FCC filings and a video that graphically demonstrates the interference radio amateurs would experience from BPL. The video can be downloaded and played at your next club meeting, and there's a PowerPoint presentation you can use. Just follow the link above to an "Understanding the NOI" page and a resource page where you'll find the presentation.

ARRL President Jim Haynie calls BPL the biggest threat to Amateur Radio in decades - and hams have lent their voices to the cause. If BPL becomes a reality, many Amateur Radio activities, like Field Day, will be meaningless. Your club's support with a generous financial contribution now will help fund this effort.

Thank you for considering this request. Contributions can be made on-line at www.arrl.org <http://www.arrl.org>, or by mail to BPL Special Spectrum Defense Campaign, ARRL, 225 Main Street, Newington CT 06111.

73,
Mary M. Hobart, K1MMH
Chief Development Officer

I have a Yaesu FT-847 for sale. The rig is in as new condition and I have the original box and manual. In addition, I have replaced the stock SSB filter with an Inrad 2.1 SSB filter. The package also includes the following items:
- LDG AT-11MP Autotuner (as new)
- Buxcomm digital interface (HF and VHF cables)
- Yaesu FP-1023 power supply (as new)

I can only sell the complete package at this time and the price is $1450.00 firm.

John, KB2COP

I have a Yaesu FT-847 for sale. The rig is in as new condition and I have the original power cord, hand mic., box and manual. In addition, I have replaced the stock SSB filter with an Inrad 2.1 SSB filter (although the stock filter will be shipped to the purchaser as well). The package also includes the following items:

- LDG AT-11MP Autotuner (as new)
- Yaesu FP-1023 power supply (as new)

I can only sell the complete package at this time and I am asking $1300.00 (facilitate purchase of a new radio).

John, KB2COP

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.

Pictures available to interested buyer. $400 plus shipping from 76001

It's been my experience that used transceivers which are still in production maintain a high percentage of their selling price, and then only begin to fall after the model is discontinued. If you want a current model, and the G707A is a nice radio, pay the few extra dollars and get a new one,in the box, with a warranty. You sound like the type of guy who wants to buy a top quality rig at bottom dollar, and I can't fault you for it, but buying a low priced current model usually invites problems from someone who mistreated it or powered it once from 240 volts.

Howdy Everyone.

I have some radio equipment that I'm putting up for sale.

Collins 75S1 receiver with Waters filter
Drake 2B/2BQ receiver & Q Multiplier
Drake MS4 speaker
Grundig YB300PE AM/MW/SW/FM receiver
Heath HR-10B receiver
Heath HW-8 QRP Transceiver
Uniden HR2510 10M Transceiver
Icom IC22A 2M Transceiver
Kenwood TH-315A 220 HT
Kenwood TW-4000A 2M/440 Transceiver
PRO 2023 Scanner
Swan 250 6M SSB Transceiver

If you are interested, please have a look at it at
www.rjoerger.com/forsale/radios/index.htm

If you think a price is out of line, please e-mail me off line.
I'm not trying to rip anyone off or start a flame war.

Thanks, Rich wb4ehg

I have not posted about mobile antennas lately, but I just wanted those in the market for a good-looking, good- performing mobile antenna to visit my site at www.qsl.net/k4kwh . Based on the famous screwdriver antenna, it is a solid value for the money, cheaper on the old wallet and handles much higher power than many of those in the market today. Its parts are of high-quality, rugged materials to take the harsh enviroment dealt out in mobile service. Also type in "Carolina Cyclone" on Google for descriptions and eham review. I have these antennas represented from coast to coast and Alaska!

BTW, if your coil cover has cracked, split, or crumbled despite efforts to patch it, I offer replacement covers that will LAST for years to come! They are made of 1/8" wall Lexan and will last for many years without cracking, discoloring, or splitting!

And for those of you who run any version of Icom 706, 746 or 756 I also include the little tune module for your Cyclone I or II for FREE! These simple, effective litttle units plug into the back of your set, "fool" the rig into thinking there's a tuner attached, and emit a tone and carrier for about 15 secs. This lets the driver/operator resonate his screwdriver (hopefully Carolina Cyclone, LOL!) easily, quickly and safely without having to spend time looking down his driving. Separately, they are $15.00 or 2 for $25.00 shipped within conus.

I am not a big name builder; I build the Carolina Cyclone as both a hobby and as a small supplement to my pension. I LOVE fooling with antennas, and it gives me something to do in my shop. You can look anywhere on the 'net and find no bad marks about me; my call and reputation is too important to risk! I build good products, build them economically (Gosh, how can a screwdriver cost $500????????), and stand behind what I do. If I say I will do something, I will do it! Period. If you break one of my antennas, I will fix it or replace it without no questions (come on, now, don't expect to bang your antenna under the garage door header and have me fix it for free-just be reasonable!)

Won't you go mobile with the Carolina Cyclone today??

73
Jerry

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.
Pictures available to interested buyer. $400.

New Sony ICF-SW7600GR + Service Manual CD-ROM for sale at a fixed price (no bidding) - $148.95:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3045942276

The radio has never been removed from its box. It is NOT refurbished or remanufactured. And unlike some other Sony radios on ebay, this one is not a grey market product and comes with full US warranty until August 2004.

The bonus CD ROM contains, among other things, searchable PDF copies of the multi-lingual Operating Instructions (242 pages), and the Service Manual (26 pages, includes full color schematics, parts list, disassembly instructions and much more).

Thanks for looking

I got these from my friend, the old organ tuner. I've had nothing but good experience with the tubes I have received from him in the past. He bought these new about 35 years ago, as best as he can recall. He used to use a lot of 2A3's back then. There's not that much demand for them anymore in this Iowa town of 900.

These are "garden variety" RCA 2A3's, i.e. not "black plate" or "single plate" or anything exotic like that.

Of course any RCA 2A3 is kind of exotic anymore.

All three tubes have been tested on a mutual transconductance tester to make sure everything is as it should be with N.O.S. units. Everything is. If by any chance a problem arises with these tubes, please contact me within 3 days of receipt and return them (with filaments intact). I will issue a full refund plus 2 X shipping upon verification of tube identity.

Thanks for looking,
Tom - "theponyengine"

I have for sale a very nice condition 51J-2 receiver.
The front panel is cosmetically about a 9 of 10 and not a repaint.
The receiver has the correct band change knob and meter but no top cover.
The receiver has the Lankford product detector mod and performs GREAT.
Pictures available to interested buyer.  $400 shipped to Continental USA.

Thanks to all who pointed out my absurd asking price...

Original RT Systems programming disc for Icom IC-T2A, T7A, W32, T8A and T81.
Also cable for programming IC-W32A.

$25.00

Thanks,

John,

I use linux too, but I still get my ISP's mailbox stuffed
with the results of this trojan horse.  About 80 a day.

I have a very clean PW1 for sale. Don't need two amps, have an Alpha 87A
that I use most of the time. Will pay for shipping (lower 48). Has all the
hookup cables and remote control head. Has 10/12 meter mod included.
Instruction manual included. New ones go for over 5k. Asking $3500
delivered. Contact Stu, W6TA, at 310-544-8226 or email to w6ta@arrl.net

4382 virii currently quarantined in Postini for my benefit... 20 have sneaked through and been gutshot by Snortin' Futilities Antivirus... have already deleted 1500 virii friday and saturday and gave up to see what the count rises to. so we're around 5600 for the weakend.

and there were folks at my home ISP who had 4800 by noon saturday.

clearly these script kiddies are not very clever... they could have directed all this excitement to, say, whitehouse.gov or verisign.com, and done something useful. or to microsoft.com, where by rights they really belong :(

My Unix gSnot devaluator doesn't recognize those terms and they all came
up in Chinese characters on my mailreader after it enountered the fact
that you actually COUNTED 4382 virii.
Might you have a set of Dymo labels in this language that I can tape
onto my computer box? Red would look best.

Kenwood TV-502 2 Meter Transverter.

Very rare and collectible. Works with Kenwood TS-520 and TS-820 series of HF transceivers (please check your manual to be sure).

In good physical condition. Some minor scratches and marks. No dents or dings. From a non-smoking environment. Comes with like-new original manual and schematic.

Comes with very rare, hard to find, original, multi-pin connector cable.

Rare, vintage, collectible and very sharp looking Kenwood QR-666 Receiver.

Very nice ham radio and general coverage receiver. Covers 10, 15, 20, 40, and 80 meter ham bands. On 6 bands, covers 11, 13, 16, 19, 25, 31, 41, 49, 60, 75 Meters short wave. Solid state. Works on both A.C. and D.C. power. Even has a battery compartment and whip antenna for portable use. Really nice audio.

This phenomenal receiver is jam-packed with features � too many to list them all. Covers 150 kHz to 30 MHz and all modes: SSB, CW, AM and FM. Digital 50 Hz step VFOs with excellent stability. Famous for its excellent receiver sensitivity and warm audio quality. Multiple tuning speeds. Frequency lock switch. Multiple memories store Frequency, band and mode data. Lithium battery backup. Memory scan and programmable band scan. Dual 24 hour clocks with timers (e.g. one for local, one for GMT). Three BUILT-IN IF filters. Narrow and wide. Squelch, AGC, RF attenuator and noise blanker. Handy record output on front panel.

Remote terminal connector on back. Multiple antenna inputs. Foldout foot stand.

Included is the original 80 page, multi-lingual manual and power cord. Will also include original color sales brochure.

Rare Kenwood TS-60S 6 Meter Amateur Transceiver.

This phenomenal transceiver is jam-packed with features � too many to list them all. Covers the 50-54 MHz, 6 meter band in SSB,/AM,/CW (double conversion), FM (triple conversion) and digital modes. Can receive 40-60 MHz. Direct digital synthesizer with fuzzy logic control. 100 memory channels. IF shift. Noise blanker. Dual VFOs. Output is nominal 90 watts. Extremely sensitive receiver (e.g. 0.16 uV or less on SSB). Very compact � excellent for mobile use. Get mobile on the hot 6M band now or use it as a base station.

In excellent, like-new condition. Very few scratches if any. Very few operating hours � mostly in storage. Never used mobile. From a non-smoking environment. You will not likely find a nicer one than this.

Included is the Kenwood mobile microphone, mobile bracket with unopened screw set, manual (sorry, can't find original but will include a photocopy and a PDF softcopy manual for you to have on-line and print out) and, unused warranty card, and original box.

MFJ 945-E Mobile Antenna Tuner.

Covers 1.8 to 60 MHz and will match virtually any transmitter to almost any mobile whip, dipole, inverted-vee, vertical, beam, random wire or other antenna. Has 300-watt and 30-watt settings. Has a cross-needle meter so that forward power, reflected power, and SWR can all be read simultaneously � very handy feature. Meter lamp can be powered by 12 volts DC.

I found this mobile antenna tuner worked exceptionally well with my mobile HF transceiver, although no doubt it will do famously with just about any rig. Very small yet very functional. Excellent for backpacking, camping, boating, RVing, flying or any other mobile environment when space and weight counts, but when performance is still important. Can also be used in the shack.

In excellent, like-new physical shape. No noted scratches, dings or dents. Very clean. Comes from a non-smoking environment. Comes with like-new original manual and schematic, and original box.

Very Rare Thermor World Time & Touch Alarm Clock

This is a perfect clock for amateur radio (ham radio)! Has more features than the Kenwood or Yaesu clocks. Perfect for contesting and dx-ing. Great conversation piece for your shack. Made in Japan. Seems to keep very good time.

Very large LCD time area, PLUS a touch pad covering 27 world time zones and over 30 notable, major world cities to quickly help you find the time zone you want. Displays the Day, Date, Time and Zone. Also has an alarm feature to wake you up in the wee hours of contests!

Just program in your local time and the year, decide on 12 or 24 hour time display and then you can instantly find out what time it is in whatever time zone you want. Has quick adjustment button for daylight savings. Very easy and intuitive to use.

In very good physical shape. Several small scratches on black body. LCD appears to be perfect. Everything works. Batteries will be removed for shipping. Comes from a non-smoking environment.

Kenwood TS-520SE (Special Edition) HF Radio.

Covers 160-10 (No WARC bands) and WWV. 200 watts PEP SSB. 160 watts DC for CW. Runs on 120v/220v. Solid state electronics except for driver and finals. Famous for its receiver sensitivity and warm audio quality. Was working perfectly when too high SWR caused the finals to pop. Receiver still works but does seem to have a slight warble. I put in a new set of 6146W finals but have not repaired the radio yet. So please bid accordingly. I will throw in a service manual so you can get it back up to 100% real quick.

In very nice physical shape, with only very minor scratching. Marked with security identification in inconspicuous areas. From a non-smoking environment. Very clean. Nice radio overall. I always received excellent reports with this radio.

I will include the optional and very hard to find CW filter, a hand microphone and the original manual and schematics, and an original TS-520S service manual. Finals will be carefully and individually packed.

Kenwood AT-200 Antenna Tuner.

Covers 6 amateur bands from 1.8 to 29.7 MHz, 200 watts. Switchable
20/200 watts measurement on in-line watt meter. 2 coaxial inputs, 1
long-wire input and 1 dummy load connector.

Although designed to match Kenwood TS-520 and TS-820 series of HF
transceivers, should work with virtually any rig.

In good physical condition. Was working well when last used before
stored. Clear and bright dial and lettering. Some scratches and one
lighter area where sticker used to be. Marked with security
identification in inconspicuous areas. From a non-smoking environment.
Comes with original manual and schematic. Also comes with excellent
condition original box.

The subject says what I'm looking for ... must be in excellent-very_good
condition, capable of MINIMUM of 30 sq. ft. wind loads in 100 mph
wind, within reasonable distance of Allentown, PA, and priced
reasonably.  Would prefer disassembled on the ground, but will consider
taking down a tower that I'm comfortable is structurally sound.

No rusted-out clunkers, please.

73,
Carl - wk3c

I have a good working ICOM IC-03AT HT 220 MHz radio. Front and top are very clean, back of rig has wear from holding it. Comes with rubber duck, belt clip, wrist strap, manual, box and super BP-8 battery.

Asking $90 + shipping

Roland, NK2U

I was trying it w. a 10W (out) 75M AM rig & the 811As show color quickly, their sum dissipation being 130W vs. 572B's 320. Not good.

Personal experiences?

tnx,

Marty AA4RM

The TS-850SAT HF Transceiver is one of the finest radios that Kenwood ever built!! The TS-850SAT transmits on 160 through 10 meters including the WARC bands. It Recieves from 100khz to 30Mhz. It Operates in SSB, CW, AM, FM and FSK. The TS-850Sat is a fantastic radio with super sensative reciever and low noise floor. When test by QST it recieved the best reciever specs ever. Th IF filtering is dual slope adjustable, Inaddistion, this radio has dual VFos 100 memory channels,built in keyer, built in antenna tuner, and numerous other options. This radio is in excellent condition and will make a great addition to any Ham shack. It also comes with the service manual. the price is $875.00

OK, ok... maybe I shud ask if anyone's got a SINGLE 572B out there

I have 1 Cetron that tests 25 on the scale of 36. 36 is 'minimum'
on a TV-7U checker set for 811s

PeeEss 811 for 572B nay-sayers. They're same tube except for plate dissipation
& max. voltages

Tnx,

Marty AA4RM

Excellent condition Drake MN-2700 tuner with optional B1000 balun installed.
It has the sticky cabinet, but it is in good shape. Front Panal is great.
Included is the original manual Price is $375 plus shipping. Thanks,
Charlie Hugg, K5MBX

I have for sale a nice Drake TR7 Transceiver and PS7 Power Supply. The TR-7 is a late one, SN 9283. It is loaded with all filters including the wide and narrow SSB filters, the CW filter and the hard to find AM filter. It has the non sticky cabinet which is very clean. This transceiver has been completely gone through in March of 2002 by John Kriner, The Man Electronics. He installed the latest mods including the Static Discharge mod and the mod that enables transmit on all bands including the WARC and 60 meter frequencies. He installed new bluing for the meter and PTO and other parts necessary to bring the rig up to 100%. He also performed a complete alignment. Documentation of this work in included. The PS7 works great. It has a small light installed on the front panel that glows red when the PS is on. Fans are installed on both the radio and the ps. This transceiver is equivalent to a TR7A except for the noise blanker. Original Manuals are included. Price is $675. Thanks, Charlie Hugg, K5MBX

I have for sale a  nice Drake TR7 Transceiver and PS7 Power Supply. The TR-7
is a late one, SN 9283. It is loaded with all filters including the wide and
narrow SSB filters, the CW filter and the hard to find AM filter. It has the
non sticky cabinet which is very clean. This transceiver has been completely
gone through in March of 2002 by John Kriner, The Man Electronics.  He
installed the latest mods including the Static Discharge mod and the mod
that enables transmit on all bands including the WARC and 60 meter
frequencies. He installed new bluing for the meter and PTO and other parts
necessary to bring the rig up to 100%. He also performed a complete
alignment. Documentation of this work in included. The PS7 works great. It
has a small light installed on the front panel that glows red when the PS is
on. Fans are installed on both the radio and the ps. This is a really nice,
clean
transceiver. It  is equivalent to a TR7A except for no noise blanker.
Original Manuals
are included. Price $595. Thanks, Charlie Hugg, K5MBX

I am looking for a 120V to 120V isolation transformer, or a dual voltage unit, does not matter as long as it will handle at least 2KVA and as much as 3.5KVA and do 120 in 120 out, 60 Hz.

Proposed use is to connect to a 120VAC gasoline driven generator set, and thereby obtain 240VAC by 'stacking' the isolated 120VAC under the generator's 120VAC.

I have also been told that a 120 to 240 VAC center tapped transformer would do the job.

If you think you have something suitable to sell reasonably, and are within perhaps 100 miles of Dallas Texas, please let me know. hi-resolution images are welcome.

"best viewed with 'courier new' font"

Hi,

Does anybody have a spare Japan Radio Company NVA-92 speaker that they would like to sell. I recently acquired a NRD-92 receiver but it didn't come with the speaker.

BTW: Any info or experiences with this radio would be appreciated also.

Best regards,
Mike

```

HEY....The Crane, Missouri hamfest is THIS saturday!!! It Is held at the
Crane City Park!
Admission is a whopping $2.00...
Crane Missouri is located in the Ozarks of Missouri near Springfield and
Branson Missouri!
Hamfest hours are from 8am until 2pm.
Load up all your surplus ham gear and come on down to the Crane hamfest!
Rad-Comm Radio from Lubbock, Texas (one of the BEST independent amateur
radio vendor in America!) will be there selling new Icom, Yaesu, and Alinco
radios!
SEE YOU SATURDAY!

Looking to trade an Alpha-Delta VRC (manual included, can't locate the original box) in as new condition for an Inrad 2.1 SSB filter for a Yaesu FT-847.

Would be willing to sell for $150, you ship from 11786.

Please contact me off list if interested or if you have any questions.

Thank,
John, KB2COP

Hey there,

Another shameless plug for the Swan - Siltronix 1011 web page which can be found at http://sonic.ucdavis.edu/siltronix

If you visit the main Amateur Radio Page, there are various Siltronix Manual downloads which are free. Some of the pdf type manuals require you download the free viewer from Adobe. Enjoy...

cheers
skipp

>
>Proposed use is to connect to a 120VAC gasoline driven generator set, and thereby obtain 240VAC by 'stacking' the isolated 120VAC under the generator's 120VAC.

Wouldn't it be a lot easier just to modify the regulator so the field coil
of the generator is twice as high, rather than dicking around with stepping
up the stuff coming off the armature? Be a lot easier just to start out with
the higher voltage to begin with.

I ran a 1011-C for years on 10 meters with absolutely no drifting problems. It was the CB'ers that had the drifting problem because they wanted to power up the radio and talk 1.5 minutes later without letting the radio thermally stabilize.

The secret to the 1011-C(D) was that one had to keep the radio powered up constantly. Mine stayed on for 2 years straight.

Up for sale is my MFJ-962C antenna tuner.Will handle up to 1.5
killoWatts,(Handled my
inverted vee antenna with no problems) Looks an 8 out of 10.Just needs
a little touch up
paint.$150.00 or B/O.I prefer either money order or postal money
order. Personal checks need
to clear first before shipping.Buyer pays for there method of shipping
and insurance from
zip code 14215. Works but as with any used electronics sold as-is.Any
questions,feel free to
ask.Thank you for looking.

Hey group!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4669&item=2542814411

Ham Band Capable

SPECS
- Model # D27KGA5JB5FK
- Trunking Type I & II
- 12 Watts
- 128 Modes
- 900MHZ UHF

I DO have a few of these if you need a quantity........I was looking for $99 OBO on each. I am "blowing this one out the door" on eBay.

Thanks,
Adam / kc7ljq

I have the above items to trade for a quality iambic paddle or high quality straight key. The tuner is in excellent condition and comes with the original manual and box. The preamp. is also in excellent condition, but has two small holes in the top (was mounted under a desktop). Sorry, no manual nor box for this item.

Please e-mail off list if you have something to offer.

Thanks and -73-

John, KB2COP

I have a Kenwood TM-231A 2-meter band (144-148 MHz) transceiver.

50 watts output, scalable down to 10 and 5. Expanded receive frequency from 137-174. Has PL/CTCSS built in for repeater access. DTMF keypad.

This unit served me quite well, but I no longer have a need for it. Please make an offer. Buyer pays shipping, but item is available for pickup in Toronto, Canada.

I have for sale an as new Icom IC-746 Pro with a PS125 power supply. This
radio was inteded to be used as a secondary rig in another part of the
house. I have only had this powered up twice and it has been in the boxes
ever since. This equipment is no more than 4 months old and I am the
original non smoking owner. I am asking $1,300 plus shipping from 48026.

I have for sale a nice Yaesu SP-5 Speaker with the built in Timewave DSP-59Y digital noise reduction unit. Included is the notebook manual for the DSP-59Y, the original box for the SP-5, and the 12 volt Power Cube for the DSP. This unit looks and works great. There are two digits out on the DSP display. When you dial up 2400kHzs for example it show 24. Other than that it is perfect. Price is $350 shipped in lower 48. Thanks, Charlie Hugg,
K5MBX

Hello:

I have FOR SALE: two BRAND NEW, NEVER OPENED ProComm 40 meter mobile antennas. (These are VERY similar to the Lakeview HamSticks.) Also...a BRAND NEW, NEVER USED Lakeview Dipole Mount. Together, these make a

```
portable dipole antenna system. You can mount either vertical or
horizontal. Needless to say, you can order more antennas from ProComm
or Lakeview to get you on other bands. I'll even toss in some coax.
I've been bitten by the 2 meter sideband bug, and am just not up to
any HF operation right now. $39 takes it off my hands. I'll even pay
for the shipping. 73 from Bill, WA8MEA

I have for sale an as new Icom IC-746 Pro with a PS125 power supply. This radio was inteded to be used as a secondary rig in another part of the house. I have only had this powered up twice and it has been in the boxes ever since. This equipment is no more than 4 months old and I am the original non smoking owner. I am asking $1,300 plus shipping from 48026.

re: Want EF Johnson Two-Way Radio Mic for spare(s)

Hello there,

-

I'm looking for at least one or more spare mics that work on the common EF Johnson two-way radios. We have a 483MHz band, Johnson Radio in service at a local Vol Fire Dept. I donated my last spare mic yesterday... let's just say they are a bit rough on them.

-

The older EF Johnson 8615 and similar type 800/900 trunking radio mics
swap right in to this rig. It's uses the now standard modular plug/jack
setup. Your old unused trunking radio seems to be a good source of mics
for this vintage 483Mhz unit.

If you have a dead or spare radio around with a possible working mic, I'd
love to try and beg/buy/swap you out of it. I'll pay a reasonable price
for a mic and or trade you for some other mic I might have. I can also
trade you for some other item or service I might have to offer.

Thank you for reading this post.
Please take the NOSPAMPLEASE out of my Email header and drop me a reply
when you can.

cheers
skipp

skippNOSPAMPLEASE@pilot.ucdavis.edu

Please take the NOSPAMPLEASE of the Email address to contact me.

Please, no spam or unrelated unsolicited Emails.

```

I have for sale an as new Icom IC-746 Pro with a PS125 power supply. This radio was inteded to be used as a secondary rig in another part of the house. I have only had this powered up twice and it has been in the boxes ever since. This equipment is no more than 4 months old and I am the original non smoking owner. I am asking $1,300 shipped CONUS only..

FS: is my Yaesu FT-726r all mode rig.Comes with 2 meter module 12
watts out, and
the Satt-trak module installed. Room for up to 2 more modules that can
be installed.Runs on either 120 volts AC or 12 volts DC.Comes with,
are the owners manual,repair manual,and an UN-wired YM-48 hand mic.
Works but as with any used electronics sold as-is.Looks about 7 out of
10 rating. $275.00, and buyer pays for shipping and insurance of there
choice from zip code 14215.Any questions,feel free to ask. Thanks for
reading,

Up for sale is my MFJ-962C antenna tuner.Will handle up to 1.5
killoWatts,(Handled my inverted vee antenna with no problems) Looks an
8 out of 10.Just needs a little touch up paint.$140.00 or B/O.I prefer
either money order or postal money order. Personal checks need to
clear first before shipping.Buyer pays for there method of shipping
and insurance from zip code 14215. Works but as with any used
electronics sold as-is.Any questions,feel free to ask.Thank you for
looking.

I have a HP 410B VTVM. No, it does not have the tube in the AC probe. I wish it did! It is in good condition.

Tubes light up and seems to work fine. Probes/wires are showing their age, plastic from ohms probe gone. I hate to leave it laying around. I don't use it. $20 plus shipping. USPS from 62521. I'll have to weigh it. It is not light!

Email me please. If I don't get a good offer I'm going to throw it away!

Dan, KB9JLO

Compaq LTE5400 laptop, P150MHz, 32 MB RAM, 2 GB hard drive, sound, color,
Windows 98 is on it. Nice basic laptop. Battery won't hold charge for
long. I was using it in my kid's room. Has floppy but no CD. I will throw
in some kind of PCMCIA modem if you want it. Price is $85 shipped & insured
(shipping and insurance would be $25!), OBO.
Need money for car repairs. Prefer PayPal.
Please email me. Thanks.

Yaesu VX-1R dual band & wideband receiver/scanner handheld in great condition. Li 750 mAh battery, AC adapter, and manual. Will throw in (2) four conductor plugs to make a data cable and audio cable; a copy of the programming software; and a dual band mag mount with SMA-BNC adapter.

This is a versatile radio, see:

http://www.icongrp.com/~sllewd/vx1rmain.htm

Will do cross band split, cell, free band, MARS/CAP. Has desirable A105 firmware. I hate to sell but need the money for car repairs.

Price is $95 shipped and insured, OBO. Prefer PayPal.

Please email me.

50 watt Kenwood TM-261 2m VHF Mobile Transceiver with Backlit DTMF microphone.
$100 COD from Salem, OR
blissninny at comcast.net
503-371-3131

Details:

High RF power output
Rugged construction (MIL-STD)
61 multi-function memory channels plus 1 call channel
Memory Name (MN) function with 6-digit alphanumeric display
DTSS selective calling
Multi-scan capability
Dual menu system
Multi-function microphone with backlit keys

High RF power output
The TM-261A puts out an impressive 50 watts. Also has mid- and low-power settings.

Meets MIL-STD requirements
Strict MIL-STD environmental standards for vibration (MIL-STD 810C) and physical shock (MIL-STD 810D) are fully complied with.

61 multi-function memory channels plus 1 call channel
For quick access, essential data -- transmit and receive frequencies, frequency step, tone frequency, etc. -- can be stored in the 62 memory channels. All channels can store transmit and receive frequencies independently for odd split repeaters.

Memory Name (MN) function
All 62 channels can be identified alphanumerically (max. 6 characters) instead of by frequency. This is particularly convenient for repeaters and club channels. It is also possible to switch to a channel number display.

DTSS selective calling
Built-in DTSS (Dual-Tone Squelch System) allows DTMF access: the squelch is opened only when a specific 3-digit code has been received. Using the wildcard asterisk, group calling is also possible.

Multi-scan capability
Choose from several scan modes: full band scan, programmable band scan, and memory scan with programmable memory channel lock-out. There are also 2 scan stop modes: TO (time-operated) and CO (carrier-operated).

Dual menu system
Two menu modes -- A and B -- offer full control over such settings as frequency step and the time-out timer, when required.

DTMF memory function
Up to ten 15-digit DTMF codes with ID can be stored for auto-dial and autopatch use. Redial is also provided.

Built-in CTCSS tone encoder and optional decoder
The decoder enables the setting of different tones for transmit and receive.

Backlit DTMF microphone
This multi-function microphone has backlit keys to facilitate operation in low-light situations.

Other Features:
  Tone scan
  Wireless cloning function
  Auto repeater offset
  Repeater reverse switch
  Lock function
  Busy channel lockout
  Auto power-off
  Time-out timer

Dimensions (W x H x D)
  140 x 40 x 160.5 mm (5.51 x 1.57 x 6.31 in.)

I am looking for the ATAS-100 for my FT-100D.

Please let me know your asking price, or items you are
willing to trade for, I have several computer components,
hard drives/monitors/motherboards, Alinco 440 HT, etc.

Remove the nospammmm from my email address to
reply.

Thanks!

Hi,

I'm looking for an Icom IC-3AT 220 MHz handheld. If you have one, please
let me know!

Remove the "nospam" in my email address to reply!

Thanks,

John

I have an Alliance HD73 Rotor for sale. Control unit is in excellent shape as well as motor unit. A bolt broke in one of the half shells that holds the mast (not one of the bolts that goes into the motor unit.) Someone with a drill press could drill it out.

Any reasonable offer will be accepted. Prefer local pick up in North New

Jersey or New York since the unit is heavy.

Roland Stiner, NK2U

Looking (for a friend of course) for a 50A1 "ballast tube" for a multi band tube receiver.

I see net dealers with them with some crazy prices.

If you have one you'd care to part with, I'd like to try and buy it at a reasonable price. Please drop me a reply using the Email address below (cut and paste), not the one that appears in the reply header.

I'd also be willing to trade you for some type of tube you might need/want. I plan on giving the 50A1 away to someone, so even a working used one would work.

I've also read about solid state replacements for the 50A1. If you can provide me a refernce article on the web, I'll just make him one. I hate to reinvent the wheel.

thanks much for reading this

cheers

skipp

skippNOSPAMPLEASE@pilot.ucdavis.edu

Take the NOSPAMPLEASE out to reply, thanks.

I would like to sell this Yaesu FT301D and FP301 power supply. I bought them from my cousin in 1978 together with his car, before he moved from Canada to the US (the car is long gone), with the intention of getting my licence. That won't happen in this lifetime.

It was briefly hooked up in 1979, and has not been used since. It was top of the line equipment then, but I'm sure new technology exceeds its capabilities.

Any interest? Any offers? It's time to clean out my basement.

Hartley Garshowitz
Toronto

I am interested in trying APRS Tracking.
If you have a Alinco DR135T/TP or /TPG you would be interested in selling
please email me at K4KAL at ARRL dot NET with price.

Thanks,
Keith, K4KAL

I have for sale or trade a Kenwood TS-940SAT HF transceiver in very nice condition. Everything works as it should and the radio gets great signal reports. Comes with a copy of the manual. Asking $795 or will consider trade for items listed below.

Also have an Alpha 374A HF amplifer in excellent condition. This unit has bandpass tuning which essentially means you just set it to the band you want and start talking. Puts out 900-1100 watts in bandpass mode and much more if you tune it manually. Asking $1200 or will consider trade for items listed below.

I'm looking for the following items and would be glad to work out a swap for the 940 and/or 374A plus or minus cash.

Drake R4C
Kenwood TS-950SDX
Ameritron AL-82 or AL-1200
Ameritron ALS-600
Icom 706 MKIIG
UHF repeater
Kenwood TS-850SAT
Swan 600 Twins
Swan 700CX
Drake L4B
Icom IC-910

I can be reached via email at jcamp2@cox.net.

Thanks and 73,
Jeff
N0WJP

Several monobanders available. They've been stored for about ten
years, guess that means I won't be needing them anymore.
1-HyGain 204 (4 ele 20m)
1-HyGain 155 (5 ele 15m)
1-HyGain 105 (5 ele 10m)
all these have 24 foot booms, stainless hardware. The 15 m had a bent
element, but I may have the replacement parts...it has been so long
that I have forgotten.
1-DX Engineering 5 ele 15m on 38 foot boom. Never put this one up,
though I did assemble it. (long story, we won't get into that)
1-DX Engineering side mount for Rohn 45 tower. A heavy duty
contraption allowing a beam to be side mounted to the tower and
rotated some 300 degrees or so. Angle iron construction.
Maybe more stuff...a free (to antenna buyer) 19 foot heavy pipe

```
mast...it held all those HyGains through wind, ice storms, typical
Wisconsin weather for a few years.
Stored partially disassembled. I don't especially want to ship them;
pickup preferred. About 50 miles from Madison.
I'll get around to figuring out the prices soon (i.e.: I still need to
see what the going rate is), and am open for offers.
Email will work the best as I seldom check this group.

it's in excellent working condition, with a few scratches
on the heat sink.  also got a copy of the instructions manual.
had to replace the master power switch several years ago,
(ouch $30).  $375 will get it to your door via insured, usps priority mail.

For sale/trade:

Motorola MT1000 16 channel portable radio

Band: VHF, 134-152 mHz bandsplit, perfect for Ham
Power: 5 watts
Channels: 16, with user-programmable scan
Battery: Good battery
Antenna: VHF
Condition: Excellent, no significant marks or scratches

This radio is one of Motorola's best. It'll take a beating and still work every time. Perfect for ham use, as well as public safety.

Photos available at http://www.acoustic-heterodyne.com/mt1000.html

I am looking primarily for a trade. I'll take anything comperable. If not Motorola, I would consider a dual-band Ham portable. Make an offer!!

I will also arrange to have this radio totally programmed for you at no additional cost.

If I get no offers of trades, I will be putting this radio on eBay.

This is a great radio. Don't let it pass you by!

I can be reached at ve3hbd@rac.ca

http://www.acoustic-heterodyne.com/mt1000.html

Thanks,

Bryan

Need manual for Kenwood TS-450S/AT transceiver. Prefer original, but would accept a good copy. I need help on this. Kenwood cannot provide this for me from their database, and I know of no other place to check. Many thanks for your help!

Nominally stamped at 7147.5 kHz., it actually excited my 2-NT at 7147.7 kHz.
You mileage will vary slightly, depending on your rig, of course.  I love
this freq. because it puts you out in the clear, between SWBC stations where
people can find you with ease, even at 0200Z.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3026817650

Thanks for looking,
Tom  - N�JMY - AAR7FV

Hi,

I would like an ICOM AT-180 antenna tuner, preferably with the mounting bracket, cables are a must. I have an IBM Thinkpad 600 PII 300 laptop in excellent condition for trade. Please e-mail me if you are interested, and I'll give you more detailed specs on the laptop.

Thanks,
Jason VE3TYG

This is a great FM transceiver and has performed flawlessly for me. It has
the 200 MHz band unit, providing coverage on 2 meter, 220 MHz, and 440 MHz
FM. It is in excellent (or better) condition. I'm asking $350 and will
consider reasonable offers. Thanks and very 73.

FS Yaesu FT-2400H 2 meter FM Transceiver

This radio is truly mint and has had VERY little use. I bought it new for my son, who never really carried on with ham radio. I am asking $195 and will ship it within the continental US.

Thanks and 73,

Jim K9RII

```

For sale/trade:

Motorola MT1000 16 channel portable radio

Band: VHF, 134-152 mHz bandsplit, perfect for Ham
Power: 5 watts
Channels: 16, with user-programmable scan
Battery: Good battery
Antenna: VHF
Condition: Excellent, no significant marks or scratches

This radio is one of Motorola's best. It'll take a beating and still work every time. Perfect for ham use, as well as public safety.

Photos available at http://www.acoustic-heterodyne.com/mt1000.html

I am looking primarily for a trade. I'll take anything comperable. If not Motorola, I would consider a dual-band Ham portable. Make an offer!!

I will also arrange to have this radio totally programmed for you at no additional cost.

If I get no offers of trades, I will be putting this radio on eBay.

This is a great radio. Don't let it pass you by!

I can be reached at ve3hbd@rac.ca

http://www.acoustic-heterodyne.com/mt1000.html

Do you think you could make your post just a little harder to read??? Good lord buddy - learn a bit about formatting. I was interested until I almost went blind trying to read this crap. And what's with the 'compare new' ? It AIN'T new, so why would I want to compare new?

Obveiously you are so STUPID you do not know the Differance between
FA = For Auction   FS = For Sale, Or you are an insignificant TROLL or
mabe nothing more than a "Rip Off Artist".. A Liar for sure!!!!

Just My Opinion

Bob

Giving away old QST magazines. You can pick them up in Richland, Washington, I can mail them via US Media Mail rate, or I can deliver to select locations in the Pacific Northwest. US Media Mail postage rate is about $2 for 2 issues and approximately $3.50-$4.00 for 12 issues.

Bearing the name sticker of JAN Crystals of Ft. Myers, Florida, this is a very active xtal in the old 40-meter novice (now tech-plus) band. It excited my 2-NT at 7130.8 kHz. You mileage will vary slightly, depending on your rig, of course.

Ends Sunday, Jun-22-03 12:46:12 PDT (19:46:12Z)

Made in 1955, by Gamble-Skogmo, Inc. apparently of Chicago (?). Included in this kit are:

The stranded copper wire for the "flattop" -my guess is about 75 feet

(Instructions say Aluminum, but sure looks Copper to me).
A roll of insulated lead-in wire, probably about the same length.
A pair of porcelain strain insulators.
A pair of "screw eyes" for anchoring the ends.
A brass gizmo for connecting the lead-in to the flat-top.
A pair of porcelain "nail knob" stand-off insulators.
An under-the-window lead-in strip with fahnestock clips at each end.
A beautiful Knox porcelain lightning arrestor with mounting hardware.
A heavy-duty ground clamp for ground-rod or water-pipe.

Just in case it rains the day you get it, you can sit inside and read bits of the packing material: Chicago Daily Tribune, Thursday, Aug. 18th, 1955. The Indians lost 9 to 3. Indians? What about the Sox?

Ends Sunday, Jun-22-03 18:43:33 PDT (Monday 01:43:33Z)

This is a VS-1 synthesizer for a TS-940S Kenwood radio. It came out of my working radio which I sold to someone who did not want the synthesizer.

For Sale $58.00

Very easy to install. At the back of your manual is instructions on installing this unit. I do not have the 4 screws. They should already be on your radio.

Contact me at my e-mail gary92027@cox.net or

Call me: Gary   760-743-1866 KA6OCA

If you have such a critter, and it works, I'd be interested in a
purchase.

Otherwise, my little Icom 735 is now dead in the water :-(

Up for saleis my Kenwood TS-430s HF rig.Comes with owners
manual,repair manual,power cord,YK-88a AM filter,YK-88s-sideband
filter,and YK-88cn CW narrow filter (not installed).NO MIC! Looks an
8.5 out of 10.This item will be double boxed for shipping.$375.00 or
B/O.
I prefer either money order or postal money order. Personal checks
need to clear first before shipping.Buyer pays for there method of
shipping,and insurance,from zip code 14215.
Works (NO known quirks) but as with any used electronics sold as-is.
Any questions,feel
free to ask.

--------------BB38DA8F5340D32A1A6FF7B3
Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

Hi all, Im trying to put an odd step on the UHF side.
I want to use 442.735 to receive and 448.650 for TX
and store this into memory.
Is this possible?  I'm not sure how to change the step or
the repeater shift to accomplish this, other than the stock
settings which I can't change.  Any clues???
Please e-mail me direct at:  mrrusso@optonline.net

THANKS FOR YOUR HELP!!

<html>
Hi all, Im trying to put an odd step on the UHF side.
<br>I want to use 442.735 to receive and 448.650 for TX
<br>and store this into memory.
<br>Is this possible?&nbsp; I'm not sure how to change the step or
<br>the repeater shift to accomplish this, other than the stock
<br>settings which I can't change.&nbsp; Any clues???
<br>Please e-mail me direct at:&nbsp; mrrusso@optonline.net
<p><b>THANKS</b> FOR YOUR HELP!!
<br>&nbsp;</html>

Hello there,

Thanks for taking a moment to read this post.

I have for sale, an original Kenwood BS8 Pan Adapter Module; works with
the SM-220 scope unit.

Comes with the proper cable(s) and works really well, turns out the used
unit I bought actually came with one inside... much to the surprise of the
previous owner and myself. So I have an extra, of which I bought for
almost $200
The Kenwood SM-220 Manual shows how to install the unit, I can also supply
a photo copy if asked nicely...

I'm asking $135 or a reasonable offer/trade.

Thanks

I'm looking to move this equipment to fund the purchase of a couple new 2M/440 mobile rigs.

Pro-2005 - I purchased this one new, physically it's in great shape. I'll include an extra rubber keypad (these need to be replaced every few years) and an original whip antenna (I have a few spare parts for these scanners around). Bright display, I just replaced that about 2 years ago. Scans at 13/26 cps (instead of the original 8/16) since I swapped the original clock oscillator with a 10 MHz crystal when I bought the scanner - or shortly thereafter.

Icom R75 - Just over a year old now, includes the DSP option. I probably have no more than 20 hours on this rig. Used it side by side with my Kenwood R-5000. The R75 does a great job. Covers up to 60 MHz as well so you get some VHF-Lo and the 6M bands.

Please let me know if you have a dual band mobile rig (not an HT) for trade, or make a cash offer.

Thanks!

TM-D700 & TH-D7A(G)

I have the listed rigs in excellent condition. The H/T comes with the PB-38 & PB-39 batteries. Both radios will be shipped in original boxes with original manuals. Looking to trade both for a Drake R8B in as new condition, or HF rig (i.e. FT-897, Icom 7060MKIIG, IC-746...no QRP please) general coverage transceiver. Also have an Alpha-Delta VRC active speaker (in as new condition)that I can throw into the trade if necessary.

Additionally, will sell both for $825 + shipping

Please e-mail off list if interested & thank you.

John Schneider

For Sale: Kenwood UT-50S 6M module for TM-741 or TM-742 mobile radio

Kenwood 6 meter module for a Kenwood TM-741 or TM-742 mobile radio. This unit will turn your radio into a TRI-BAND transceiver.

This unit has been tested in a TM-742 radio. It transmitted fine, but the receive sensitivity was low. A friend of mine who is very knowledgeable on ham radio repair suspects that there are diodes on the input section of the unit that may have gone bad. I was going to have this unit repaired, but I got a good deal on a different unit, so have decided to sell it. Fix it and save a lot of money.

Module and original box only.

I can email pictures if desired.

$195.00 plus shipping.

Contact me by email at: tr93940NOSPAM@hotmail.com
(remove the NOSPAM from the email address)

1: Yaesu FT-50RD, with the FTT-12 digital keypad, 2 MAHA 9.6 Volt 1000mAh batteries (1 seems to be getting soft, other one just fine), FBA-15 battery case, CD-15 base charger, LCC10-S Swivel leather case (Motorola style), Pryme Speaker mic, manual. Radio is in excellent shape cosmetically, and operationally. Will take $160 shipped for it CONUS.

2: Yaesu VX-150. very lightly used. Has 10 minutes trasmit time on it at most. Used mostly to listen to the local police. Have a Pryme Speaker mic, plus leather case, original charger, manual. Perfect shape, still have the plastic tape on the display. $130 shipped CONUS.

If you want both, we'll work out a deal.

Looking for a 23 CM mobile rig. Doesn't have to be
monoband, can be dual 70cm/23cm if you have one.

I was looking particularly for a Kenwood TM-541
or even a TM-833s (I don't know if those were even
sold in the US, or even at all, I just came across the picture
at http://www.rigpix.com/kenwood/tm833s.htm)

or even a Yaesu FT-6200 would be nice.

Please let me know rig model, condition, must be
fully operational (100%), few scratches ok.
Prefer nice cosmetics. Don't we all? :) Doesn't
have to be perfect but will consider all. Pics would
be great if possible.

Thanks!

This Heathkit HX-20 mobile SSB transmitter was apparently a restoration project that was never finished. It's got a decent repaint job, not mint, and the dial stringing is intact. No visible evidence of burned components underneath. All linkages appear to be intact. It's missing a knob, the feet, and some cabinet screws. Final tube tests strong.

Thanks for looking,
Tom

I have for sale an Icom IC-228H 2 meter Transceiver. This is the high power one. It comes with the original mic, power cord, mobile mount, and a copy of the manual. It has has the Tone Board installed. Front Panel is great. All dial lights work. The top and bottom cabinet has some scratches but no dents. Works great and I get very good audio reports. Price is $95. Thanks,
Charlie Hugg, K5MBX

Hello - I have a like-new condition Kenwood TS-60 6 meter mobile rig for sale.
Barely ever used - never mobile. Comes with original box, manual and mic.
From a non-smoking environment. Asking $700 or best offer, plus shipping.

Thanks for looking.

Craig

Hello and thanks for looking - I have a Kenwood DSP-100 Digital Signal Processing unit for sale. Was used with my TS-450S which I sold awhile ago, thus I can't verify its current operation and must be sold "as is". But it was working fine last time I used it. This unit can also be used for the TS-850S. From a caring and non-smoking environment. Comes with original manuals (sorry, I don't have the original box or original accessories).

Asking $650 or best offer, plus shipping.

Regards,

Craig

I have for sale an as new Icom IC-746 Pro with a PS125 power supply. This radio was inteded to be used as a secondary rig in another part of the house. I have only had this powered up twice and it has been in the boxes ever since. This equipment is no more than 4 months old and I am the original non smoking owner. I am asking $1,300 plus shipping from 48026.

73
Dean

I have for sale a very nice Drake RV-75 digital VFO. This one has been gone through by The Drake Man, John Kriner, in May of 2000. At that time it was completel aligned and checked out. It has been used little since then. It comes with the original manual and cables including the RIT cable. I also have all of the paper work on the work done by The Man. This VFO works and looks great. Price is $775. Thanks, Charlie Hugg, K5MBX

I am looking for a solid-state receiver that will tune around 500 kHz CW and FSK (AFSK output). An old receiver that is "sour" on HF but is OK on MF will do just fine. 12V DC and digital tuning preferred.

```

I have for sale or trade a nice Kenwood TS-940SAT HF transceiver. The 940 is a solid state HF transceiver with a built-in AC supply, automatic antenna tuner, and many, many other features. Have original box and a good copy of the manual. Asking $700 plus shipping.

I also have an Alpha 374A HF amplifier in excellent condition. The amplifier puts out 900-1100 watts in bandpass mode and much, much more if you tune it manually. In bandpass mode you just select your band and start tallking. Asking $1150 plus shipping.

I am looking for the following items and would be happy to work out a trade:
Icom 706MKIIG
Drake R4C
Drake L4B
Icom 910H
Swan 600 twins
Ameritron ALS-600
Ameritron AL-1200
MFJ 986 antenna tuner
Kenwood TS-850SAT
UHF repeater

You can contact me via email at jcamp2@cox.net

Thanks and 73,
Jeff

Ends Sunday Jun-08-03 13:51:46 PDT

This xtal is good for working 40-meter cw as well as the old 15 meter novice
(now tech-plus) band. Nominally stamped at 7051 kHz., it actually excited
my 2-NT at 7050,8 kHz (the designated "Boatanchor hangout" and 21152.4, as
well.

Thanks for looking,
Tom - "theponyengine"

I believe this called a FT-171 holder (?) - it looks like a regular FT-243
on steroids. 7026.5 kHz should put it in the usable c.w. portion of the 40
meter band, just high enough in frequency to by used by Generals.  It would
look very nice in a piece of vintage-style homebrew gear.

Thanks for looking,
Tom  - "theponyengine"

This radio was a backup to my IC-781 and has had very little use. It looks like a new unit. The serial number is 01637 and it has at least one optional filter and one other optional accessory (the high stability crystal oscillator, I believe). I am asking $1995, shipped in continental United States. Thanks and 73!

Jim K9RII

Hi there,

Just as the story line reads... I'm looking for a T-Band UHF Motorola
GM300 or Maxtrac radio (or two). If you have one or more for sale or
trade, please let me know by Email.   Take the NOSPAMPLEASE out of my
return Email address and drop me a reply.

thanks

skippNOSPAMPLEASE@pilot.ucdavis.edu

I am posting here because of some of the nasty things I have read in this group and in QRZ discussions regarding freebanders. We who use the frequencies from 27.405 to 28.000 have more in common with hams than you might think. We are good operators and have knowledge of propagation and skip conditions. We use Yasus, Kenwoods and Icomm radios just like you do, so we know technical issues as well or better. However, the attitude of some hams toward us is rude and condescending. We are treated like 2nd class citizens. This should not be. We have the same rights under the constitution as legal hams do. For those that do not wish to be under Uncle Sam's thumb, freebanding is a viable alternative to getting a ham radio license. What I am saying is that maybe the next time you meet a freebander it might be wise to talk with him before you condemn him.

This article ought to clarify things, as I am the author: http://sporadic1.tripod.com/page7.html

I am QRT and standing by. (No flames answered. Please reply via email)

The fact of the matter is, regardless of the equipment you use or the
knowledge you claim to possess.... Freebanders are criminals, and are
to be treated as such.

Maybe some of the condemnation is directed at the activity (which happens to not be legal) instead of the person doing it.

You may be a nice guy, understand radio theory, be a good operator, etc., but you are still breaking the law.

And if you'd disregard one law, chances are you might just disregard many. So how do you expect to gain any respect from people when you openly admit to being a criminal ?

73, Jim KH2D

35 year old NEW Lafayette 9 volt battery still wrapped, mint, museum
piece, NO leakage.
Popped pin size probes through the wrapper to test voltage. STILL
has 9.2 volts!!!!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3028081469

Johnson Transceiver tester, near mint. Like the one you had or the one
you wanted in
your younger days.
